

## Rules and Regulations for Paper Submission

The papers submitted for the conference are required to be in accordance with the following rules and regulations of IEEE standard.

The composition of manuscripts should be the following: title page, abstract, keywords, body of paper, appendices, references, separate listing of figure captions, figures, and tables.

**Title Page:** This page should contain the full title of the paper and complete names, affiliations, addresses, phone and fax numbers, and electronic mail addresses of all authors. The contact author should be indicated.

**Abstract:** An abstract of not more than 200 words is required. It should contain not only a description of the subject and scope of coverage but also, in the case of research-oriented papers, discuss major results and conclusions.

**Paper Descriptions (Paper “Decks” and Table of Contents items):** Authors of approved papers should provide a 15 to 25-word description of the coverage of the paper and what the reader will learn from it.

**Keywords:** All papers must contain keywords or index terms. They are provided by the authors. They should be provided in alphabetical order, and as a final paragraph of the abstract section.

**Illustrations:** Figures and tables should be sent as separate electronic files and named numerically (e.g., fig1.eps, fig2.tif, table3.doc). The *Proceedings of the IEEE* is eager to publish color illustrations, especially in those cases where color enhances technical details and understanding; there is no additional cost to the author for publishing color figures.

**Units:** The International System of Units (the SI or "metric" system) should be used. Where desirable, non-metric equivalents can be included in parentheses.

**References:** References should be numbered in the order they are mentioned in the text, with numbers within square brackets. The reference section should be double-spaced and in the style shown below; however, if there is any doubt about the correct abbreviation of publication names, these should be given in full. Note that titles of papers plus beginning and ending page numbers should be included.

### **Authored Book:**

[1] A. Cichocki and R. Unbehaven, *Neural Networks for Optimization and Signal Processing*, Chichester, England: Wiley, 1993, ch. 2, pp. 45-47.

Article in an edited book:

[2] R.A. Scholtz, "The Spread Spectrum Concept," in *Multiple Access*, N. Abramson,

Piscataway, N.J.: IEEE Press, 1993, ch. 3, pp. 121-23.

Paper in a journal:

[3] R.K. Crane, "Estimating Risk for Earth-Satellite Attenuation Prediction," Proc. IEEE, vol. 81, pp. 905-913, June 1993.

Paper in a conference record:

[4] D.L. Crook, "Evolution of VLSI reliability engineering," in Proc. Int. Rel. Physics Symp., pp. 2-11, 1990.

Unpublished conference paper:

[5] T. Yamashita, K. Kotani, and T. Ohmi, "Real-time configurable logic circuits using neuron MOS transistors," presented at the 1993 Int. Solid State Circuits Conf., Feb. 1993.

Technical report:

[6] H. Freitag, "Design methodologies for LSI circuitry," IBM Tech. Rep. TR41736, pp. 80-82, 1983.

When a paper is accepted for publication upon completing the peer review process through an electronic version of the manuscript will be requested for use in editing and typesetting. Manuscripts should be submitted in Word / PDF.
