Design and manage the correct data model based on business requirements. It's a must for new administrators, and we recommend completing this course before starting a Salesforce deployment or when taking over an existing deployment. This means that user interface design isn't about how a product looks, but rather about how it works. It's not just about arranging buttons and picking colors, but rather about choosing the right tools for the job.

Declarative vs. Programmatic Customizations

Building Your Data Model Declaratively

Crafting Your User Interface

Constructing Business Logic

Maintaining Record and Data Security

Automating Business Processes
