## **Objectives:**

The event is an exciting student competition where teams race with custom-designed electronic cars they have built themselves. Each team showcases their engineering skills and creativity by developing innovative, eco-friendly vehicles. The race tests the speed, efficiency, and technical performance of the cars, fostering teamwork and problem-solving. Students must balance speed with sustainability, as the competition encourages the use of clean energy solutions. This hands-on challenge combines engineering, design, and competition in a thrilling atmosphere of innovation and friendly rivalry.

## **Outcomes:**

Students learnt the importance of Teamwork and understood that speed is always not an important factor to win this or any other race they face in their lives. “Slow and Steady win the Race!”.
