# Bachelor of Computer Applications Syllabus 2024-25

**I Semester** 

Bachelor of Computer Applications							
	Semester I						
	Problem Solving using C Programming						
		Theory					
Course Code	:	B24PSC101	CIE	:	50 Marks		
Teaching Hours L:T:P	:	3:0:0	SEE	:	50 Marks		
Total Hours : 45 Total : 100 Marks							
Credits		3	SEE Duration	:	3 Hrs		

Cou	Course Objectives						
1	To develop skills in solving problem.						
2	To obtain knowledge about the structure of the programming language C.						
3	To develop the program writing and logical thinking skill						

Module – 1	No. of Hrs					
Problem Solving techniques: Introduction, Problem solving procedure, Algorithm: Steps						
involved in algorithm development. Algorithms for simple problems: To find largest of three						
numbers, factorial of number, check for prime number, check for palindrome, Count no. of odd,						
even and zeros in list of integers.						
Flowcharts: Definition, advantages, Symbols used in flow charts. Flowcharts for simple						
problems mentioned in algorithms. Pseudo code.						
Module – 2	No. of Hrs					
<b>Introduction to C:</b> Overview of C Program, Importance of C Program, Basic structure of a C						
program, Execution of C Program.						
Constants, Variables & Data types: Character set, C token, Keywords & identifiers,						
Constants, Variables, data types, Declaration of variables, assigning values to variables, defining	09					
symbolic constants.						
Operators and Expression: Arithmetic, Relational, logical, assignment, increment &						
decrement, conditional, bit wise & special operators, evaluation of expressions, Precedence of						
arithmetic operators, type conversions in expressions, operator precedence & Associativity, built						
in mathematical functions.						
Module – 3	No. of Hrs					
Managing Input and Output operations: Reading & writing a character, formatted input and						
output.						
Decision Making and Branching: Decision making with if statement, simple if statement, the						
if else statement, nesting of if else statements, the else if ladder, the switch statement, the ?:	09					
operator, the goto statement.						
Decision making and looping: The while statement, the do statement, for statement, exit,						
break, jumps in loops						
Module – 4	No. of Hrs					
Arrays: Declaration, initialization & access of one dimensional & two-dimensional array.						
Programs using one- and two-dimensional arrays- sorting and searching arrays						
Handling of Strings: Declaring &initializing string variables, reading strings from terminal,						
writing strings to screen, Arithmetic operations on characters, String Handling functions, table	09					
of strings						
User defined functions: Need for user defined functions, Declaring, defining and calling C						
functions return values & their types						
Categories of functions: With/without arguments, with/without return values. Nesting of						
functions						
Module – 5	No. of Hrs					
Structures, union and Pointers: Structure definition, giving values to members, structure						
initialization, comparison of structure variables, arrays of structures, arrays within structures,	09					

### Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Structure and functions, structures within structures. Unions.

**Pointers:** Understanding pointers, accessing the address of a variable, declaring & initializing pointers, accessing a variable through its pointer, pointer expression, pointer increments & scale factor, passing pointer variables as function arguments.

Cours	Course Outcomes: At the end of the course, the students will be able to						
CO1	Describe the C Programming language which includes the structure of a C program,						
	Tokens, Expressions, Operators etc.						
CO2	Demonstrate conditional and iterative statements to write C programs						
CO3	Construct the C programs that use pointers to access arrays and strings.						
CO4	Illustrate the user defined functions to solve real time problems

Bachelor of Computer Applications						
Semester I						
	Fundamentals of Mathematics					
		Theory				
Course Code	:	B24FOM103	CIE	:	50 Marks	
Teaching Hours L:T:P	:	3:0:0	SEE	:	50 Marks	
Total Hours	:	45 H	Total	:	100 Marks	
Credits		3	SEE Duration	:	3 Hrs	

Cou	rse Objectives
1	The Curriculum supports the prerequisites to enhance their Mathematical knowledge towards understanding
	mathematical Concepts in the concerned fields.
2	Enhance problem-solving skills using mathematical models and algorithms.
3	Develop logical reasoning and analytical thinking
4	Understand the mathematical foundations of computer science, including discrete
	mathematics and graph theory
5	Apply mathematical concepts to computer science problems, such as algorithm design and analysis.

Module – 1	No. of Hrs
Introduction to Number System: Overview of number systems: Binary numbers, Number	
based conversion, Octal and hexadecimal numbers, Complements.	09
Module – 2	No. of Hrs
Propositional Logics: Mathematical logic introduction-statements Connectives-negation,	
conjunction, disjunction- statement formulas and truth tables- conditional and bi Conditional statements- tautology contradiction.	09
Module – 3	No. of Hrs
Set Theory: Operations on sets, power set, Venn diagram, Cartesian product, relations,	
functions- types of functions - composition of functions.	09
Module – 4	No. of Hrs
Matrix algebra: Introduction, Types of matrices-matrix operations, transpose of a matrix,	
determinant of matrix, inverse of a matrix, Cramer's rule.	09
Module – 5	No. of Hrs
<b>Differential calculus:</b> Functions and limits - Simple Differentiation of Algebraic Functions –	
Evaluation of First and Second Order Derivatives – Maxima and Minima.	09

		Theory						
Course Code	:	B24FOA103	CIE	:	50 Marks			
Teaching Hours L:T:P	:	3:0:0	SEE	:	50 Marks			
Total Hours : 45 H Total : 100 Marks								
Credits		3	SEE Duration	:	3 Hrs			

Co	Course Objectives						
1	Understand Core Accounting Concepts: Equip students with foundational knowledge of accounting						
	principles, processes, and standards, enabling them to accurately record and report financial transactions.						
2	Apply Practical Accounting Skills: Develop students' ability to manage various accounting tasks, such as						
	journalizing, ledger posting, and bank reconciliation, ensuring they can effectively handle real-world						
	financial data.						

Module – 1	No. of Hrs
MEANING AND SCOPE OF ACCOUNTING: History and Development of Accounting,	
Meaning, Objectives and functions of Accounting, Book keeping V/s Accounting, Users of	09
accounting data, systems of book keeping and accounting, branches of accounting, advantages	
and limitations of accounting.	
Module – 2	No. of Hrs
ACCOUNTING PRINCIPLES: Meaning of accounting principles, accounting concepts,	
account conventions, accounting principles and the institute of charted accounts of India,	09
Statements of accounting standards.	
Module – 3	No. of Hrs
FINANCIAL ACCOUNTING PROCESS: Journalizing transactions: Journals, Rules of	
Debit and Credit, Compound Journal Entry, Opening Entry. Ledger posting and trial balance:	09
Ledger, Posting, Relationship between journal and ledger, Rules regarding posting, Trial	
Balance.	
Module – 4	No. of Hrs
SUB-DIVISION OF JOURNALS & NEGOTIABLE INSTRUMENTS:	
Sub-division of journals: Cash Journal, Petty Cash Book, Purchase Journal, Sales Journal,	09
Sales Return Journal.	
Negotiable Instruments: Promissory Note, Specimen of Promissory note, Bill of Exchange,	
Cheque, Some Important Terms, Accounting Entries, Billes sent for collection,	
Accommodation Bills, Bills receivable and payable books.	
Module – 5	No. of Hrs
BANK RECONCILIATION STATEMENT: Advantages of keeping a bank account, causes	
of difference, Meaning and Objectives of bank reconciliation statement, Importance of bank	09
reconciliation statement, Technique of preparing bank reconciliation statement, where cash	
book balance has to be adjusted, Where the abstract from the Cash Book and Pass Book are	
given.	

Cours	Course Outcomes: At the end of the course, the students will be able to						
CO1	CO1 Explain the key functions of accounting and differentiate between bookkeeping and accounting.						
CO2	Describe core accounting principles and apply relevant accounting standards.						
CO3	Record transactions in journals and post them to ledgers accurately.						
CO4	Manage different types of journals and understand the accounting of negotiable						
	instruments						
C05	Prepare a bank reconciliation statement and identify discrepancies between bank and cash records

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Bachelor of Computer Applications									
Semester I									
	•	Indian Knowledge Sy	rstem	•					
		Theory							
Course Code	:	B24IKS104	CIE	:	50 Marks				
Teaching Hours L:T:P	:	2:0:0	SEE	:	50 Marks				
Total Hours : 25 H Total : 100 Marks									
Credits		2	SEE Duration	:	1 Hrs				

#### Course Objectives

- 1 To facilitate the students with the concepts of Indian traditional knowledge and to make them understand the Importance of roots of knowledge system.
- To make the students understand the traditional knowledge and analyze it and apply it to their day-to-day life.

Module – 1	No. of Hrs
Introduction to Indian Knowledge Systems (IKS): Overview, Vedic Corpus, Philosophy,	
Character scope and importance, traditional knowledge vis-a-vis indigenous knowledge,	09
traditional knowledge vs. western knowledge.	
Module – 2	No. of Hrs
<b>Traditional Knowledge in Humanities and Sciences:</b> Linguistics, Number and measurements	
Mathematics, Chemistry, Physics, Art, Astronomy, Astrology, Crafts and Trade in India and	09
Engineering and Technology	
Module – 3	No. of Hrs
Traditional Knowledge in Professional domain: Town planning and architecture	
Construction, Health, wellness and Psychology-Medicine, Agriculture, Governance and public	09
administration, United Nations Sustainable development goals.	

Cours	Course Outcomes: At the end of the course, the students will be able to							
CO1	Provide an overview of the concept of the Indian Knowledge System and its importance.							
CO2	Appreciate the need and importance of protecting traditional knowledge.							
CO3	Recognize the relevance of Traditional knowledge in different domains.							
CO4	Establish the significance of Indian Knowledge systems in the contemporary world.

Cou	Course Objectives						
1	To Create the awareness regarding the necessity of learning local language for comfortable and healthy						
	life.						
2	To enable learners to Listen and understand the Kannada language properly.						
3	To speak, read and write Kannada language as per requirement.						
4	To train the learners for correct and polite conservation.						
5	To know about Karnataka state and its language, literature and General information about this state.						

1. Introduction, Necessity of learning a local language. Methods to learn the Kannada language.  2. Easy learning of a Kannada Language: A few tips. Hints for correct and polite conservation, Listening and Speaking Activities, Key to Transcription  3. ವೈಯಕ್ತಿಕ, ಸ್ಮಾಮ್ಯಸೂಚಕ/ಸಂಬಂಧಿತ ಸಾರ್ವನಾಮಗಳು ಮತ್ತು ಪ್ರಶ್ನಾರ್ಥಕ ಪದಗಳು- Personal Pronouns,	06
2. Easy learning of a Kannada Language: A few tips. Hints for correct and polite conservation, Listening and Speaking Activities, Key to Transcription 3. ವೈಯಕ್ತಿಕ, ಸ್ಮಾಮ್ಯಸೂಚಕ/ಸಂಬಂಧಿತ ಸಾರ್ವನಾಮಗಳು ಮತ್ತು ಪ್ರಶ್ನಾರ್ಥಕ ಪದಗಳು- Personal	06
and Speaking Activities, Key to Transcription 3. ವೈಯಕ್ತಿಕ, ಸ್ಮಾಮ್ಯಸೂಚಕ/ಸಂಬಂಧಿತ ಸಾರ್ವನಾಮಗಳು ಮತ್ತು ಪ್ರಶ್ನಾರ್ಥಕ ಪದಗಳು- Personal	06

Cou	Course Objectives						
1	To enable the students to understand the skills required for effective communication at						
	different levels of an organization						
2	To enhance listening, note and presentation skills						
3	To build communication skills among the students required for Digital Platforms						
4	To build Business Correspondence Skills among the students.						

Module – 1	No. of Hrs
FUNDAMENTALS OF COMMUNICATION SKILLS: Introduction - Meaning of	
Communication; Objectives of Communication; Process of Communication; Principles of	
Communication; Effective Communication vs perfect Communication; Barriers to Effective	
Communication; Types of Communication (Meaning & Features) Interpersonal, Intrapersonal,	
Upward, Downward, Internal, External, Lateral, One-way, Two-way. (Communication in an	06
organization) Cross Cultural Communication; Meaning; Scope of cross-cultural communication	
skills; Limitations of Communication skills in business. Verbal and Non-Verbal, Formal &	
Informal communication Skills	
Module – 2	No. of Hrs
COMMUNICATION SKILLS:	
Listening skills: Meaning; Importance of Listening; Types of listening (Meaning& Benefits of	
types of Listening) -Comprehension, Critical, Attentive, Reflective, Discriminative, Biased,	
Evaluative; Listening Process; Barriers to listening skills; Overcoming from barriers to listening.	
Reading skills - Meaning; Importance of Reading Skills; Reading comprehension skills -	06
Inferential, Literal, Evaluative, Types of Reading Techniques: Skimming, Scanning, Intensive,	
Extensive and Guidelines for improving good Reading Skills. Note-taking skills: Meaning;	
Importance of note taking; Methods of note making. Presentation skill: Presentation skills & its	
importance in Business Communication; Types.	
Module – 3	No. of Hrs
COMMUNICATION MEDIA AND PLATFORMS:	
Communication Media/Channel: Meaning Importance of Communication Channels; Types of	
Communication Medium / channels: (a) Physical Media – Meaning & its Types. (b) Mechanical	
Media – Meaning & its Types. (c) Push and Pull Channels – Meaning and its Features.	
Communication Platform: Internal & External Platforms – Meaning and importance Internal	
communication Platforms – Intranet, Blogosphere, Portals, You tube, Google Hangouts, Skype,	06
Webcasts and zoom. External Communication Platforms: Corporate Website, Face book, Twitter,	
LinkedIn, You tube Accounts, Corporate Blog. (Each of the types only Meaning and Importance	
to be discussed) Technology in Business Communication: Introduction, Advantages &	
disadvantages of technology in communication.	
Module – 4	No. of Hrs
COMMUNICATION SKILLS & ETHICS: Introduction - Meaning; Importance of ethical	
communication; Ethical Communication & Business. Ethical perspectives – Utilitarian,	06
Universalistic, Religious, Economic, Legal, Humanistic, Dialogic, Situational perspectives in	
relation to business. Ethical issues in business communication – Respect, Honesty, Sensitivity to	

# Rajarajeswari College of Engineering (An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Cultural Differences. Ethical dilemmas involved in business communication – Whistle blowing,	
Rumors & Gossip, Secrecy, Ambiguity, Lying.	
Module – 5	No. of Hrs
BUSINESS CORRESPONDENCE: Writing Skills - Art of Condensation (Precis writing),	
Essay writing – Types of essays, features of an essay, Paragraph writing – structure of paragraph	
writing. Business Letters - Meaning; Importance and Advantages of Business Letters; Letter	06
components and Layout. Different Types of Business Letters. (a) Letters of Inquiries (b) Replies	
to Inquiries (c) Orders (d) Complaints & Adjustment Letters (e) Collection Letters & etc.	

Course	Course Outcomes: At the end of the course, the students will be able to								
CO1	CO1 Understand the skills required for effective communication at different levels of an organization.								
CO2	Enhance themselves with good listening, note taking and presentation skills								
CO3	CO3 Build good communication skills among the students required for Digital Platforms.								
CO4	Efficiently Manage with Business Correspondence Skills among the students

Bachelor of Computer Applications									
Semester I									
	Programming in C Laboratory								
	Practical								
Course Code	Course Code : B24PCL107 CIE : 50 Marks								
Teaching Hours L: P: S	:	1:2:0	SEE	:	50 Marks				
Total Hours : 14 Sessions Total : 100 Marks									
Credits		2	SEE Duration	:	3 Hrs				

Co	Course Objectives								
1	Write C programs to perform basic operations such as calculations, comparisons, and data manipulation.								
2	Implement and demonstrate control structures like loops, conditionals, and switch-case statements in C.								
3	Manipulate arrays and strings, including operations like finding duplicates, reversing, and applying string								
	functions.								
4	Demonstrate the use of pointers for advanced operations like swapping numbers and matrix manipulation,								
	and work with structures to manage complex data types.								

S.No	Experiments
1.	Print the value of y for given x=2 & z=4 and analyze the output.
	a. $y = x+++++x$ ;
	b. $y = ++x + ++x$ ;
	c. y= ++x + ++x + ++x;
	d. y = x>z;
	e. y=x>z? x:z;
	f. y = x&z
2.	Program to read two numbers and find the largest (demonstration on if else).
3.	Program to read percentage of marks and to display appropriate message (demonstration of switch case statement).
4.	Program to read numbers from keyboard continuously till the user presses 999 and to find the sum of only positive numbers (demonstration of do-while loop).
5.	Write a program to print sums of even numbers and sum of odd numbers from array of positive
	integers (demonstration of 1D array).
6.	Program to implement built-in string functions.
7.	Program to demonstrate call by value and call by reference.
	PART-B
1	Program to demonstrate library functions in math.h (demonstration of built-in functions).
2	Program to find the roots of quadratic equation (demonstration of else-if ladder)
3	Program to read a number, find the sum of the digits, reverse the number and check it for palindrome (demonstration of while loop).
4	Program to generate n Fibonacci sequence (demonstration of for loop).
5	Program to perform addition and subtraction of Matrices (demonstration of 2D array).
6	Program to check a number for prime by defining <b>isprime</b> () function (demonstration of user-defined function).
7	Program to accept USN, Student Name, marks of any 6 Subjects and calculate total marks, Percentage, grade and print the all the details in marks card format of a particular student (demonstration of structure).

RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (PRACTICAL)					
Components					
The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 50% of the maximum marks. A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. The student has to secure not less than 40% of maximum marks in the semester-end examination (SEE). In total of CIE and SEE student has to secure 50% maximum marks of the course.	100				
CIE marks for the practical course is 50 Marks					
• The split-up of CIE marks for record/ journal and test are in the ratio 60:40.					
<ul> <li>Each experiment to be evaluated for conduction with observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments designed by the faculty who is handling the laboratory session and is made known to students at the beginning of the practical session.</li> <li>Record should contain all the specified experiments in the syllabus and each experiment</li> </ul>					
write-up will be evaluated for 10 marks.	ļ				
• Total marks scored by the students are scaled downed to 30 marks (60% of maximum marks).					
<ul> <li>Weightage to be given for neatness and submission of record/write-up on time.</li> </ul>	50				
• Department shall conduct 02 tests for 50 marks, the first test shall be conducted after the 8th week of the semester and the second test shall be conducted after the 14 week of the semester.					
• In each test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voice.					
• The suitable rubrics can be designed to evaluate each student's performance and learning ability.					
• The average of 02 tests is scaled down to 20 marks (40% of the maximum marks). The					
Sum of scaled-down marks scored in the report write-up/journal and average marks of					
two tests is the total CIE marks scored by the student.					
MAXIMUM MARKS	50				

RUBRIC FOR THE SEMESTER END EXAMINATION (SEE)					
Components					
<ul> <li>SEE marks for the practical course is 50 Marks. SEE shall be conducted jointly by the two examiners of the same institute; examiners are appointed by the University.</li> <li>All laboratory experiments are to be included for practical examination. (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. OR based on the course requirement evaluation rubrics shall be decided jointly by examiners.</li> <li>Students can pick one question (experiment) from the questions lot prepared by the internal /external examiners jointly.</li> <li>Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners. General rubrics suggested for SEE is mentioned here, writeup-20%, Conduction procedure and result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)</li> <li>Change of experiment is allowed only once and 10% Marks allotted to the procedure part to be made zero.</li> <li>The duration of SEE is 03 hours</li> </ul>	100				
MAXIMUM MARKS	100				

Cours	Course Outcomes: At the end of the course, the students will be able to								
CO1	Develop the C Program which includes the structure of a C program, Tokens, Expressions, Operators								
	etc								
CO2	Demonstrate conditional and iterative statements to write C programs								
CO3	3 Construct C programs that use arrays and strings								
C04	Design user defined functions to solve real time problems								
CO5	Demonstration of Structure concepts & Pointers

	c. Apply formula to calculate "No. of classes attended" and "Attendance Percentage" columns.								
	d. Apply conditional formatting to highlight a student if "Attendance Percentage" is less than 85%.								
8	Create a power-point presentation to demonstrate the following:								
	a. Layout option								
	b. Insertion of date, time and slide numbers								
	c. Insertion of Symbols								
9	Create a power-point presentation to demonstrate the following:								
	a. Themes								
	b. Transitions								
	c. Animation								
10	Create a power-point presentation to demonstrate the following:								
	a. Rehearse Timings								
	b. Narrations								
	c. Slide Sorter.								

Course	Outcomes: At the end of the course, the students will be able to
CO1	Understand the identification, assembly language, disassembly and basic troubleshooting of
	computer hardware components, including peripherals, CPUs and system hardware
CO2	Gain hands on experience with networking basics including LAN and Wifi setup and
	configurations
CO3	Develop practical skills in installing and configuring various operating system including windows
	Unix/Linux and dual booting along with system maintenance using BIOS setting, Registry Editor
	and third party tools
CO4	Enhance proficiency in using office productivity software including word processors spreadsheets
	presentation tools and multimedia editing software
CO5	Apply logical thinking to create flowcharts and perform tasks using flowgarithms software for
	arithmetic operations shape calculations and understanding arrays and recursion

The student has to secure not less than 40% of maximum marks in the semester-end examination (SEE). In total of CIE and SEE student has to secure 50% maximum marks of the course.	100				
<ul> <li>CIE marks for the practical course is 50 Marks.</li> <li>The split-up of CIE marks for record/ journal and test are in the ratio 60:40.</li> <li>Each experiment to be evaluated for conduction with observation sheet and record write-up. Rubrics for the evaluation of the journal/write-up for hardware/software experiments designed by the faculty who is handling the laboratory session and is made known to students at the beginning of the practical session.</li> <li>Record should contain all the specified experiments in the syllabus and each experiment write-up will be evaluated for 10 marks.</li> <li>Total marks scored by the students are scaled downed to 30 marks (60% of maximum marks).</li> <li>Weightage to be given for neatness and submission of record/write-up on time.</li> <li>Department shall conduct 02 tests for 50 marks, the first test shall be conducted after the 8th week of the semester and the second test shall be conducted after the 14 week of the semester.</li> <li>In each test, test write-up, conduction of experiment, acceptable result, and procedural knowledge will carry a weightage of 60% and the rest 40% for viva-voice.</li> <li>The suitable rubrics can be designed to evaluate each student's performance and learning ability.</li> <li>The average of 02 tests is scaled down to 20 marks (40% of the maximum marks). The Sum of scaled-down marks scored in the report write-up/journal and average marks of two tests is the total CIE marks scored by the student.</li> </ul>	50				
MAXIMUM MARKS	50				

RUBRIC FOR THE SEMESTER END EXAMINATION (SEE)	
Components	Marks
<ul> <li>SEE marks for the practical course is 50 Marks. SEE shall be conducted jointly by the two examiners of the same institute; examiners are appointed by the University.</li> <li>All laboratory experiments are to be included for practical examination. (Rubrics) Breakup of marks and the instructions printed on the cover page of the answer script to be strictly adhered to by the examiners. OR based on the course requirement evaluation rubrics shall be decided jointly by examiners.</li> <li>Students can pick one question (experiment) from the questions lot prepared by the internal /external examiners jointly.</li> <li>Evaluation of test write-up/ conduction procedure and result/viva will be conducted jointly by examiners. General rubrics suggested for SEE is mentioned here, writeup-20%, Conduction procedure and result in -60%, Viva-voce 20% of maximum marks. SEE for practical shall be evaluated for 100 marks and scored marks shall be scaled down to 50 marks (however, based on course type, rubrics shall be decided by the examiners)</li> <li>Change of experiment is allowed only once and 10% Marks allotted to the procedure part to be made zero.</li> <li>The duration of SEE is 03 hours</li> </ul>	100
MAXIMUM MARKS	100

C	Course Objectives					
1	To explore methods for the sustainable use and conservation of resources such as water, soil, minerals,					
	and biodiversity					
2	To explore the social, economic, and ethical dimensions of environmental issues.					

Introduction to Environmental Studies: Multidisciplinary nature of environmental studies. Scope and importance; Concept of sustainability and sustainable development.  Ecosystems: What is an ecosystem? Structure and function of ecosystem; Energy flow in an ecosystem: food chains, food webs and ecological succession. Case studies of the following ecosystems:  a) Forest ecosystem b) Grassland ecosystem c) Desert ecosystem d) Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)  Natural Resources: Renewable and Non-Renewable Resources a) Land resources and land-use change; Land degradation, soil erosion and desertification. b) Deforestation: Causes and impacts due to mining, dam building on environment, forests, biodiversity and tribal populations. c) Water: Use and over-exploitation of surface and ground water, floods, droughts, conflicts over water (International & Inter-state). d) Energy resources: Renewable and non-renewable energy sources, use of alternate energy sources, growing energy needs, case studies.	06

sources, growing energy needs, case studies.	
sources, growing energy needs, case studies.	
Ü Ü	
	No. of Hrs
Biodiversity and Conservation	
a) Levels of biological diversity: Genetic, species and ecosystem diversity;	
Biogeographic zones of India; Biodiversity patterns and global biodiversity hotspots.	
b) India as a mega-biodiversity nation; Endangered and endemic species of India.	
c) Threats to biodiversity: Habitat loss, poaching of wildlife, man-wildlife conflicts, biological	06
invasions; Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity.	
d) Ecosystem and biodiversity services: Ecological, economic, social, ethical, aesthetic and	
Informational value.	
Module – 3	No. of Hrs
Environmental Pollution	
a) Environmental Pollution: Types, causes, effects and controls; Air, water, soil and noise	
pollution.	
b) Nuclear hazards and human health risks.	06
c) Solid waste management, Control measures of urban and industrial waste.	
d) Pollution case student system; Banking complaints and Ombudsman	
	No. of Hrs
Environmental Policies and Practices	
a) Climate change, global warming, ozone layer depletion, acid rain and impacts on human	

communities and agriculture.	
b) Environment Laws: Environment Protection Act; Air (Prevention & Control of	
Pollution) Act; Water (Prevention and Control of Pollution) Act; Wildlife (Protection) Act;	06
Forest Conservation Act. International agreements: Montreal and Kyoto protocols and	
Convention on Biological Diversity (CBD).	
c) Nature reserves, tribal populations and rights, and human wildlife conflicts in Indian	
context.	
Module – 5	No. of Hrs
Human Communities and the Environment	
a) Human population growth: Impacts on environment, human health and welfare.	
b) Resettlement and rehabilitation of project affected persons; case studies.	
c) Disaster management: Floods, Earthquake, Cyclones and Landslides.	
d) Environmental movements: Chipko, Silent valley, Bishnois of Rajasthan.	06
e) Environmental ethics: Role of Indian and other religions and cultures in environmental	
conservation.	
f) Environmental communication and public awareness, case studies (e.g., CNG vehicles in	
cities).	

Cour	Course Outcomes: At the end of the course, the students will be able to							
CO1	To understand the roles and responsibilities of various stakeholders in environmental management and							
	policy-making.							
CO2	To teach the principles and practices of natural resource conservation and management.							
CO3	To provide an understanding of the structure and function of natural ecosystems and the relationships							
	between organisms and their environment.							
C04	To analyze the impact of human activities on the environment, including urbanization,							
	industrialization, deforestation, and climate change.

RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (THEORY)								
Sl.	Components							
No								
1	INTERNAL TESTS: Students will be evaluated in test, descriptive questions with different complexity levels (Bloom's Taxonomy Levels: Remembering, Understanding, Applying, Analyzing, Evaluating, and Creating).  THREE tests will be conducted. Each test will be evaluated for 50 Marks. Finally Test Marks Will Be Reduced To 30 Marks.	30						
2	Assignment/Quiz/Seminar/Group Discussion/Case Studies/Practical orientation on Design Thinking/ problem Solving Exercises/Presentation of Research work/hack-a-thon/Code-a-thon conducted by reputed organizations/ any other.	Any two 20						
	MAXIMUM MARKS	50
