

RAJARAJESWARI COLLEGE OF ENGINEERING

An Autonomous Institution

Under VTU, Approved by AICTE, UGC & GoK

No. 14, Ramohalli Cross, Kumbalagodu, Mysore Road, Bengaluru

SCHEME & SYLLABUS

UG PROGRAM
BE 1st Semester
Chemistry Cycle

Effective from the Academic Year 2024-25

RAJARAJESWARI COLLEGE OF ENGINEERING

An Autonomous Institution

Under VTU - Belagavi, Approved by AICTE, UGC & GoK

No. 14, Ramohalli Cross, Kumbalagodu, Mysore Road, Bengaluru - 560074

Institute Vision

To empower young minds through technology, research, and innovation, to produce technically competent and socially responsible professionals in higher education.

Institute Mission

To deliver excellence in education through innovative teaching, impactful research, and continuous skill development, preparing students to meet global challenges with technical expertise and ethical responsibility.

To foster a transformative learning environment that integrates technology, research, and practical experience, empowering students to become skilled professionals and socially conscious leaders.

To cultivate a culture of lifelong learning and professional excellence by encouraging creativity, research, and community engagement, equipping students with the skills to thrive in a dynamic world.

To provide a holistic educational experience that combines advanced technology, hands-on research, and community-focused learning, shaping students into competent, ethical professionals who contribute positively to society.

Quality Policy

Rajarajeswari College of Engineering is committed to imparting quality technical education that nurtures competent, ethical professionals with global relevance. We ensure academic excellence through a dynamic, outcome-based curriculum, experienced faculty, and cutting-edge infrastructure. Continuous improvement is driven by innovation, research, and strong industry collaboration. We foster holistic development and a progressive environment that supports lifelong learning, teamwork, and professional growth.

Core Values

Academic Excellence, Integrity, Innovation, Global Competence, Continuous Improvement

Rajarajeswari College of Engineering

UG (B.E) Syllabus 2024-25

I Semester - Chemistry Cycle

Electronics and Communication Engineering (ECE)

Rajarajeswari College of Engineering (An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

SEMESTER I								
Mathematics-I for EE								
Course Code : B24MAEE101 CIE : 50 Marks								
Teaching Hours L: T:P	:	2:2:2	SEE	:	50 Marks			
Total Hours	:	50 Hours	Total	:	100 Marks			
Credits	:	4	SEE Duration	:	3Hrs			

	Course Objectives							
1	Develop the knowledge of Linear Algebra referring to matrices.							
2	Develop the knowledge of solving engineering problems of pedal equation and Taylors series							
3	Analyze engineering problems by applying Partial Differential Equations.							
4	Develop the knowledge of solving differential equations and their applications in engineering.							
5	Analyze engineering problems applying Ordinary Differential Equations.							

Module 1: Linear Algebra-I	10hrs.
Elementary row transformation of a matrix, Rank of a matrix. Consistency and Solution of system of linear	
equations - Gauss-elimination method, Gauss-Jordan method and approximate solution by Gauss- Seidel	
method. Eigen values and Eigenvectors, Rayleigh's power method to find the dominant Eigen value and	
Eigenvector.	
Self-Study: Solution of system of equations by Gauss-Jacobi iterative method. Inverse of a square matrix by	
Cayley- Hamilton theorem.	
Applications: Network Analysis, Markov Analysis, Critical point of an etwork system. Optimum solution	
Module 2: Polar curves	10hrs.
Polar coordinates, Polar curves, angle between the radius vector and the tangent, angle between two curves.	
Pedal equations. Curvature and Radius of Curvature- Cartesian, Parametric, Polar and Pedal forms (Proof	
only for Cartesian and Polar Forms). Taylor's and Maclaurin's series for a function of single variable	
(statements only) and problems.	
Self-study: Center and circle of curvature, evolutes and involutes	
Applications: Communication signals, Manufacturing of microphones and Image processing.	
Module 3:Partial Derivatives	10hrs.
Evaluation of indeterminate forms. Function of two or more variables, Partial derivatives, Differentiation of	
composite functions. Jacobians (direct examples). Taylor's theorem for function of two variables. Maxima	
and Minima of function of two variables.	
Self-study: Method of Lagrange's undetermined multipliers with single constraint.	
Applications: Series expansion in communication signals, Errors and approximations and vector calculus.	
Module 4:Differential Equations	10hrs.
LinearandBernoulli'sdifferentialequations.Exactandreducibletoexactdifferentialequations Integrating factors	
on $\frac{1}{N} \left(\frac{\partial M}{\partial y} - \frac{\partial N}{\partial x} \right)$ and $\frac{1}{M} \left(\frac{\partial N}{\partial x} - \frac{\partial M}{\partial y} \right)$, Orthogonal trajectories. Problems. Non-linear differential equations:	
Introduction to general and singular solutions, Solvable for p only, Clairaut's equations, reducible to	
Clairaut's equations -Problems.	
Self-Study: Applications of ODEs, Solvable for x and y.	
Applications: Rate of Growth or Decay, Conduction of heat	
Module 5:Ordinary Differential Equations of Higher Order	10hrs.
Higher- order linear ODEs with constant coefficients - Inverse differential operator, Particular Integral	
when $X = ke^{ax}$, $ksin(ax + b)$ or $kcos(ax + b)$ and X is a Polynomial, method of variation of parameters,	
Cauchy's and Legendre's homogeneous differential equations -Problems.	
Self-Study: Formulation and solution of Cantilever beam. Finding the solution by the method of	
undetermined coefficients.	
Applications: Oscillations of a spring, Transmission lines, Highway engineering.	

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

List of Laboratory experiments (2hours/week per batch) 10lab sessions+1 repetition class + 1 Lab Assessment

1	2D plots for Cartesian and polar curves
2	Finding angle between polar curves, curvature and radius of curvature of a given curve
3	Finding partial derivatives and Jacobian
4	Applications to Maxima and Minima of two variables
5	Solution of first-order ordinary differential equation and plotting the solution curves
6	Program to compute area, volume and center of gravity
7	Evaluation of improper integrals
8	Numerical solution of system of linear equations, test for consistency and graphical representation
9	Solution of system of linear equations using Gauss-Seidel iteration
10	Compute Eigen values and eigenvectors and find the largest and smallest Eigen value by Rayleigh power method.

Course	e Outcomes: At the end of the course, the students will be able to
	, , , , , , , , , , , , , , , , , , ,
COI	Test the consistency of a system of linear equations and to solve by direct and iterative methods.
CO2	Apply the knowledge of calculus to solve problems related to polar curves and its applications in determining
	the bentness of a curve.
CO3	Learn the notion of partial differentiation to calculate rate of change of multivariate functions and solve
	Problems related to composite functions and Jacobian.
CO4	Understand that physical systems can be described by Differential equations and solve such equations.
CO5	Analyze the solution of linear and non-linear Differential equations

CIE Evaluation

Assessment Details both (CIE and SEE)

The weightage of continuous Internal Evaluation (CIE) is 50% and for the Semester End Examination (SEE) is 50%. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50). The minimum passing mark for SEE is 35% of maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. Student has to secure a minimum 40% (40 marks out of 100) in the total of the CIE and SEE together.

The CIE marks for the theory component of the **Integrated Course** (**IC**) shall be 25 marks and for the laboratory component 25 marks

CIE for the theory component of **IC**:

- 1. Three tests each of 50 marks, after the completion of the syllabus 40%, 70% and 100% respectively.
- 2. Average of best two internal assessment tests each of 50 marks, scale down to 30 marks.
- **3.** Any two assessment methods as per regulations i.e. Two assignments / Two Quizzes/ Weekly test / project work for (20+20) marks, scaled down to 20 marks.
- **4.** Total marks scored (30+20 = 50 marks) scaled down to **25**.

CIE for the Practical component of IC:

- 1. On completion of every experiment / program in the laboratory, the students shall be evaluated and marks shall be awarded on the same day.
- 2. Each experiment is evaluated for 10 marks and scaled down to 5 marks
- 3. Laboratory test at the end of the 15th week of the semester / after completion of all the experiments shall be conducted for 50 marks and scaled down to 20 marks.
- 4. Total marks scored for lab component: 05+20= 25 marks.
- 5. The minimum marks to be secured in CIE to appear for SEE shall be 10(40% of maximum marks 25) in the theory and 10(40% of Maximum marks 25) in the practical.
- 6. The laboratory component of the **integrated course** shall be CIE only. However, in SEE, the questions from the practical component shall be included.
- 7. The maximum of 05 questions is to be set from the practical component and the total marks of all questions should not be more than 25 marks.

		Theory		
IA Test	Exam conducted	Scaled down to	Average of best two	Total
	for		tests	
IA-1	50	30		
IA-2	50	30	30	
IA-3	50	30		50/2=25
Two Assignments	2X10=20	10	10	
Two Quizzes	2X10=20	10	10	

LAB							
Continuous performance and record writing	Each experiments evaluated for 10 marks	Scaled down to 05 marks	5+20=25				
Internal Test + Viva voce	Exam conducted for 50 Marks	Scaled down to 20 marks					

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Semester End Examination (SEE)

- 1. The question paper shall be set for 100 marks and duration of SEE is 3 hours.
- 2. The question paper will have two parts: Part –A and Part B
- 3. **Part A** should contain minimum **Two or Four** quiz questions from each module of 02 marks/01 mark each. **Part A is Compulsory**and carries 20 Marks.
- 4. **Part-B**contains two questions of 16 marks (with minimum of 3 sub questions) from each module with internal choice. Students should answer five full questions, selecting one full question from each module.
- 5. Students have to answer for 100 marks andmarks scored out of 100 shall be proportionally reduced to 50 marks.
- 6. Question papers to be set as per the Blooms Taxonomy levels.

	Rubrics for Semester End Examination (SEE)						
Q. No	CONTENTS MARKS						
	PART - A						
1	Two or Four Quiz questions from each module of 2 marks / 1 mark	20					
	PART – B						
	(Minimum 3 subdivisions only)						
2 or 3	Module: 1	16					
4 or 5	Module: 2	16					
6 or 7	Module: 3	16					
8 or 9	Module: 4	16					
10 or	Module: 5	16

	SEMESTER I/II					
	Applied Chemistry for EE					
		Category: AS	C			
	Stre	eam: EEE (Common to EC	CE & EEE branch)			
		(Integrated)				
Course Code	:	B24CHEE102/202	CIE	:	50 Marks	
Teaching Hours L:T:P	:	2:2:2	SEE	:	50 Marks	
Total Hours : 50 Total : 100 Marks						
Credits		4	SEE Duration		3 Hrs	

Course Objectives

- To impart the knowledge of Chemistry involved in Electrochemical cells,
- Corrosion and its control; Conventional, electrochemical and renewable sources of energy
- Polymers; memory and display systems; Water treatment; sensors; e-waste management;
- Nanomaterials and Instrumental methods of analysis

	No.of Hrs
ELECTRODES AND CELLS – Introduction- Classification of cells - primary, secondary and concentration cells; Reference electrodes - Calomel electrode; Ion-selective electrodes - Glass electrode. Determination of pH using glass electrode, numerical on concentration cells. CORROSION - Definition, Electrochemical theory of corrosion, Types of corrosion - differential metal, differential aeration; Corrosion Penetration Rate (CPR), numerical. Corrosion control: Metal coating-Galvanization, Inorganic coatings – anodizing. Cathodic protection – Sacrificial anode, Metal finishing - Introduction, technological importance; Electroless plating: Introduction, Electroless plating of copper (PCB).	8
Module – 2	No.of Hrs
Energy: Sources, Conversion and Storage	110.01 1113
Chemical fuels: Introduction, Calorific value - definition, gross and net calorific values; Determination of calorific value of a solid / liquid fuel using Bomb calorimeter and numerical on calorific value; Petroleum cracking - fluidized bed catalytic cracking; Octane number. Sustainable energy sources: Hydrogen as a fuel - advantages, production and storage.Production of Biodiesel. Solar cells - Construction and working of Si based PV cell, advantages. Quantum Dot Sensitized Solar Cells (QDSSC's) - Principle, Properties and Applications. Electrochemical Energy Systems: Introduction to batteries, Classification of batteries - primary and secondary batteries; construction, working and applications of Lithium ion batteries.	8
Module − 3 Polymers for Engineering Applications	No.of Hrs
Polymers - Introduction, Molecular weight - number average and weight average molecular weight, Polydispersion index, numerical problems;; Plastics - Definition of resins and plastics; Synthesis, properties and applications of PMMA; Elastomers - Synthesis, properties and application of butyl rubber; Adhesives: Synthesis, properties and applications of epoxy resin. Polymer composites - Composites as structural material; Synthesis and applications of Kevlar; Biodegradable polymers - Introduction, Lactic acid - synthesis, uses.	8
Module – 4	No.of Hrs
Chemistry of Electronic Materials Conductors, Semiconductors and Insulators: Introduction, Band Theory with exampples	
Semiconductors: Introductoion, Production of electronic grade silicon, Refining- Float Zone method and Czochralski process. Memory Devices: Introduction, concepts of electronic memory. Classification of electronic	8
memory materials-organic/polymer electronic memory devices (organic molecules, polymeric	

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

materials, organicinorganic hybrid materials). Display Systems : Liquid crystals Introduction, classification, properties and application in Liquid Crystal Displays	(LCD's).
Photoactive and electroactive materials. (QLED's) and (OLED's) Properties and Appli	eations.
Module – 5	No.of Hrs
Sensors, Water treatment, and E - Waste Management	140.01 1115
Sensors: Introduction, working, principle and applications of, Electrochemical Electrochemical gas sensors for SOx and NOx. Water treatment: Introduction, hardness of water, types, determination of hardness method, removal of hardness by ion exchange method. BOD and COD - introduction significance in waste water treatment, experimental determination of COD of wast numerical on COD, treatment of waste water - primary, secondary and tertiary methods. E-waste Management: Introduction, sources, types, effects of e-waste on environ human health, methods of disposal. Extraction of copper from e-waste.	y EDTA and their water - 8 reatment

Course	Outcomes: At the end of the course, the students will be able to
CO1	Understand and apply the principles of chemistry involved in water treatment, corrosion, energy
	sources, polymers, nanomaterials, phase equilibria, alloys, ceramics and instrumental methods of
	analysis.
CO2	Analyse the Engineering problems and draw meaningful inferences through applied chemistry.
CO3	Implement sustainable solutions through concepts of Applied Chemistry in the field of Materials,
	Energy and Environment
CO4	Engage in self-study and make an effective oral presentation on contribution of Chemistry to society
CO5	Apply the knowledge of chemistry to investigate engineering materials by volumetric and instrumental
	methods and analyze, interpret the data to assess and address the issues of Environmental Pollution

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

PRACTICAL MODULE

A – Demonstration (any two) offline/virtual:

- A1. Synthesis of polyurethane
- A2. Determination of strength of an acid in Pb-acid battery
- A3. Synthesis of iron oxide nanoparticles
- A4. Electroplating of copper on metallic objects

<u>B - Exercise (compulsorily any 4 to be conducted):</u>

- B1. Conductometric estimation of acid mixture
- B2. Potentiometric estimation of FAS using K2Cr2O7
- B3. Determination of pKa of vinegar using pH sensor (Glass electrode)
- B4. Determination of rate of corrosion of mild steel by weight loss method
- B5.Estimation of total hardness of water by EDTA method

<u>C – Structured Enquiry (compulsorily any 4 to be conducted):</u>

- C1. Estimation of Copper present in electroplating effluent by optical sensor (colorimetry)
- C2. Determination of Viscosity coefficient of lubricant (Ostwald's viscometer)
- C3. Estimation of iron in TMT bar by diphenyl amine/external indicator method
- C4. Estimation of Sodium present in soil/effluent sample using flame photometry
- C5. Determination of Chemical Oxygen Demand(COD) of industrial waste water sample

D – Open Ended Experiments (any two)

- D1. Estimation of metal in e-waste by optical sensors
- D2. Electroless plating of Nickle on Copper
- D3. Determination of glucose by electrochemical sensors
- D4. Synthesis of polyaniline and its conductivity measurement

CIE Evaluation

Assessment Details both (CIE and SEE)

The weightage of continuous Internal Evaluation (CIE) is 50% and for the Semester End Examination (SEE) is 50%. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50). The minimum passing mark for SEE is 35% of maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. Student has to secure a minimum 40% (40 marks out of 100) in the total of the CIE and SEE together.

The CIE marks for the theory component of the **Integrated Course** (**IC**) shall be 25 marks and for the laboratory component 25 marks

CIE for the theory component of IC:

- 1. Three tests each of 50 marks, after the completion of the syllabus 40%, 70% and 100% respectively.
- 2. Average of best two internal assessment tests each of 50 marks, scale down to 30 marks.

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

- 3. Any two assessment methods as per regulations i.e. Two assignments / Two Quizzes/ Weekly test / project work for (20+20) marks, scaled down to 20 marks.
- 4. Total marks scored (30+20 = 50 marks) scaled down to 25.

CIE for the Practical component of IC:

- 1. On completion of every experiment / program in the laboratory, the students shall be evaluated and marks shall be awarded on the same day.
- 2. Each experiment is evaluated for 10 marks and scaled down to 5 marks
- 3. Laboratory test at the end of the 15th week of the semester / after completion of all the experiments shall be conducted for **50 marks** and scaled down to **20 marks**.
- 4. Total marks scored for lab component: 05+20= 25 marks.
- 5. The minimum marks to be secured in CIE to appear for SEE shall be 10(40% of maximum marks 25) in the theory and 10(40% of Maximum marks 25) in the practical.
- 6. The laboratory component of the **integrated course** shall be CIE only. However, in SEE, the questions from the practical component shall be included.
- 7. The maximum of 05 questions is to be set from the practical component and the total marks of all questions should not be more than 25 marks.

Theory							
IA Test	Exam	Scaled down	Average of best	Total			
	conducted for	to	two tests				
IA-1	50	30					
IA-2	50	30	30				
IA-3	50	30		50/2=25

Continuous	Each experiments	Scaled down to	F. 22. 25				
performance and	evaluated for 10	05 marks	5+20=25				
record writing	marks						
Internal Test +	Exam conducted	Scaled down to					
Viva voce	for 50 Marks	20 marks					

Semester End Examination (SEE)

- 1. The question paper shall be set for 100 marks and duration of SEE is 3 hours.
- 2. The question paper will have two parts: Part –A and Part B
- 3. **Part A** should contain minimum **Two or Four** quiz questions from each module of 02 marks / 01 mark each. **Part A is Compulsory** and carries 20 Marks.
- 4. **Part B** contains two questions of 16 marks (with minimum of 3 sub questions) from each module with internal choice. Students should answer five full questions, selecting one full question from each module.
- 5. Students have to answer for 100 marks and marks scored out of 100 shall be proportionally reduced to 50 marks.
- 6. Question papers to be set as per the Blooms Taxonomy levels.

Rajarajeswari College of Engineering (An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Semester I/II						
	Computer Aided Engineering Drawing					
		Category: ESC	C			
		(Common to all bra	nches)			
		(Practical)				
Course Code	:	B24CEDK103/203	CIE	:	50 Marks	
Teaching Hours L: T: P : 2:0:2 SEE : 50 Marks						
Total Hours : 40 Total : 100 Marks						
Credits		03	SEE Duration	:	3 Hrs	

Cours	Course Objectives				
1	To understand the basic principles and conventions of engineering drawing				
2	To use drawing as a communication mode				
3	To generate pictorial views using CAD software				
4	To understand the development of surfaces				
5	To visualize engineering components				

Module - 1	No. of Hrs
Introduction: Significance of Engineering drawing, BIS Conventions of Engineering Drawing, Free hand sketching of engineering drawing, Scales. Introduction to Computer Aided Drafting Software, Co-ordinate system and reference planes HP, VP, RPP& LPP of 2D/3D environment. Selection of drawing sheet size and scale. Commands and creation of Lines, coordinate points, axes, polylines, square, rectangle, polygons, splines, circles, ellipse, text, move, copy, off-set, mirror, rotate, trim, extend, break, chamfer, fillet and curves. Orthographic Projections of Points, Lines and Planes: Introduction to Orthographic projections: Orthographic projections of points in all quadrants. Orthographic projections of lines (Placed in First quadrant only). Orthographic projections of planes similar to Triangle, Square, Rectangle, Pentagon, Hexagon, and Circular laminas (Placed in First Quadrant only using Change of Position Method).	8 Hrs
Module - 2	No. of Hrs
Orthographic Projection of Solids: Orthographic projection of right regular solids Prisms (Square, Pentagon, Hexagon) & Pyramids (Square, Pentagon, Hexagon), Cones, Cubes & Tetrahedron. (Only Solids Resting on HP using Change of Position Method)	8Hrs
Module - 3	No. of Hrs
Isometric Projections: Isometric scale, Isometric projection of hexahedron (cube), right regular prisms, pyramids, cylinders, cones and spheres. Isometric projection of combination of two and three simple solids. (Conversion of simple isometric drawings into orthographic views)	8 Hrs

Rajarajeswari College of Engineering (An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Module - 4	No. of Hrs
Development of Lateral Surfaces of Solids:	
Development of lateral surfaces of right regular prisms, cylinders, pyramids and cones	
resting with base on HP only. Problems on applications of development of lateral	8 Hrs
surfaces ex: Funnels	0 111 5
Development of lateral surfaces of their frustums and truncations.	
Module - 5	No. of Hrs
Multidisciplinary Applications & Practice using CAD software (For CIE Only): Free hand Sketching: True free hand, Guided Free hand, Roads, Buildings, Utensils, Hand tools & Furniture's etc. Drawing Simple Mechanisms: (Only for ME with allied branches) Bicycles, Tricycles, Gear trains, Ratchets, two-wheeler cart & Four-wheeler carts to dimensions etc. Electric Wiring and lighting diagrams: (Only for EEE with allied branches) Automatic fire alarm, Call bell system, UPS system, Basic power distribution system. Basic Building Drawing: (Only for Civil with allied branches) Architectural floor plan, basic foundation drawing, steel structures-frames, bridges, trusses. Flow charts drawings: (Only for CSE with allied branches) Types of flow charts like Process Flowchart, Workflow Diagram, Swimlane Flowchart, Data Flow Diagram, System Flowchart, and Decision Flowchart. Electronics Engineering Drawings: (Only for ECE with allied branches) Simple electronics circuit drawings, practice on layers concept.	8 Hrs

Course	Course Outcomes: At the end of the course, the students will be able to				
CO-1	Draw and communicate the objects with definite shape and dimensions.				
CO-2	Recognize and Draw the shape and size of objects through different views.				
CO-3	Develop the lateral surfaces of the object.				
CO-4	Create a Drawing views using CAD software.				
CO-5	Identify the interdisciplinary engineering components through its graphical representation.

CONTINUOUS INTERNAL EVALUATION (CIE)

Assessment Details (both CIE and SEE):

- 1) The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%.
- 2) The minimum passing mark for the CIE is 40% of the maximum marks (20 marks) and that for SEE minimum passing marks is 35% of the maximum marks (18 marks).
- 3) A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject / course if the student secures not less than 35% (18 Marks out of 50) in the Semester End Examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

Continuous Internal Evaluation (CIE)

- CIE shall be evaluated for Max. Marks of 100 and later the same shall be scaled-down to 50 marks as detailed below.
- CIE component should comprise of continuous evaluation of drawing work of students as and when the modules are covered based on below detailed weightage.
- IA Test- 3 covering all the modules is to be conducted for Max. Marks of 100 and evaluation to be based SEE pattern, and the same is to be scaled down to 15 marks.
- The final CIE = Class work marks + Test marks.

RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (CIE)

Particulars	Marks	Evaluation Weightage in marks	Reduced to	Total
IA-1	50	Best of Two Internals	10	
IA-2	50	Dest of Two Internals		25
IA-3	50	Lab Mock Exam	15	
Sketch Book	20	Sketch Book + Assignments		25
Assignments	5	Sketch book + Assignments	-	25
			Total	50

Semester End Examination (SEE)

- 1) SEE shall be conducted and evaluated for maximum marks 100. Marks obtained shall be accounted for SEE final marks, reducing it by 50%
- 2) Question paper shall be set jointly by both Internal and External Examiner and made available for each batch as per schedule. **Questions are to be set preferably from Text Books.**
- 3) Related to Module-1: One full question can be set either from "points & lines" or "planes".
- 4) Evaluation shall be carried jointly by both the examiners.
- 5) Scheme of Evaluation: To be defined by the examiners jointly and the same shall be submitted to the university along with question paper.
- 6) One full question shall be set from each of the Module from Modules 1, 2, 3 and 4 as per the below table weightage details. However, the student may be awarded full marks, if he/she completes solution on

Rajarajeswari College of Engineering (An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Semester I/II						
Introduction to Electrical Engineering						
		Category: ESC-	I/II			
	$(\mathbf{C}$	Common to All Branches	except EEE)			
		(Theory)	_			
Course Code	:	B24ESCK142/242	CIE	:	50 Marks	
Teaching Hours L: T: P	:	3:0:0	SEE	:	50 Marks	
Total Hours	:	40 hrs	Total	:	100 Marks	
Credits		3	SEE Duration	:	3 Hrs	

Cours	Course Objectives				
1	To explain the power generation concepts and laws used in the analysis of DC circuits.				
2	To explain the behavior of circuit elements in single-phase and three phase circuits.				
3	To describe the construction and operation DC machines and Transformers				
4	To describe the application of renewable energy and introduction to EV				
5	To describe domestic wiring and safety measures.				

Module - 1	No. of Hrs
Introduction: Conventional and non-conventional energy resources; General structure	
of electrical power systems using single line diagram approach.	
Power Generation: Hydel, Nuclear, Solar & Wind power generation (BlockDiagram	08
approach).	08
DC Circuits: Ohm's Law and its limitations, KCL & KVL, Series, Parallel, Series-	
Parallel circuits. Simple Numerical.	
Module - 2	No. of Hrs
Single Phase Circuits: Voltage and current relationship with phasor diagrams in R,	
L, and C circuits, Concept of Impedance, Analysis of R-L, R-C, R-L-C Series	
circuits, Active power, Reactive power and Apparent power, Concept of power	
factor.	08
Three Phase Circuits: Generation of Three phase AC quantity, Advantages and	
limitations; Star and Delta connection, Relationship between line and phase	
quantities	
Module - 3	No. of Hrs
DC Machines: DC Generator: Principle of operation, Constructional details, Induced	
EMF expression, Types of generators, Relation between induced EMF and terminal	
voltage, simple numericals on EMF equation, DC Motor: Principle of operation,	
Back EMF and its significance, Types of motors, characteristics and speed control	
(armature & field) of DC motors (series & shunt only), Torque equation,	
Applications of DC motors	08
Transformers: Necessity of transformer, Principle of operation, Types and construction	
of single phase transformers, EMF equation, Losses of transformer, Efficiency,	
Simple numerical on Losses and Efficiency	
Simple numerical on Losses and Efficiency	
Module - 4	No. of Hrs
Applications of Renewable energy: Photovoltaic Systems, Solar distillation; Solar	
Pond electric power plant, Off grid solar inverter, Urban waste to energy conversion,	00
Hydrogen based transportation system	08
Introduction to EV: History, General block diagram, Application and Benefits	
Module - 5	No. of Hrs
Domestic Wiring: Requirements, Types of wiring: casing, capping. Two way and three	
vay control of load.	08

Rajarajeswari College of Engineering

(An Autonomous Institution, Affiliated to VTU, Belagavi & Approved by AICTE, New Delhi & Govt. of Karnataka)

Electrical Safety: Working principle of Fuse and Miniature circuit breaker (MCB), merits and demerits, Electric Shock, Earthing and its types, Safety Precautions to avoid shock

Electricity bill: Power consumption of electrical energy, Two-part electricity tariff, *Case study on calculation of electricity bill for domestic consumers*.

Course	Course Outcomes: At the end of the course, the students will be able to				
CO1	Understand the concepts of power generation and and solve DC circuit problems				
CO2	Analyze single-phase circuits, solve R-L, R-C, and R-L-C circuits, and comprehend three-phase circuit principles.				
CO3	Understand DC machines, transformers and their characteristics				
CO4	Understand the application of renewable energy and basics of EV				
CO5	Understand domestic wiring and safety measures

CIE Evaluation

Assessment Details both (CIE and SEE)

The weightage of continuous Internal Evaluation (CIE) is 50% and for the Semester End Examination (SEE) is 50%. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50). The minimum passing mark for SEE is 35% of maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. Student has to secure a minimum 40% (40 marks out of 100) in the total of the CIE and SEE together.

CIE for the theory:

- 1. Three tests each of 50 marks, after the completion of the syllabus 40%, 70% and 100% respectively.
- 2. Average of best two internal assessment tests each of 50 marks, scale down to 30 marks.
- 3. Any two assessment methods as per regulations i.e. Two assignments / Two Quizzes/ Weekly test / project work for 40 marks, scaled down to 20 marks.
- 4. Total marks scored (30+20 = 50 marks).
- 5. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50)

Rajarajeswari College of Engineering (An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Semester I/II						
Introduction to Python Programming						
		Category: PLC-	I/II			
		(Common to All Br	anches)			
		(Integrated)				
Course Code	:	B24PLCK152/252	CIE	:	50 Marks	
Teaching Hours L:T:P	:	2:0:2	SEE	:	50 Marks	
Total Hours	:	50	Total	:	100 Marks	
Credits		3	SEE Duration	:	3 Hrs	

Course	Course Objectives				
1.	1. Learn the syntax and semantics of the Python programming language.				
2.	Readily use the Python functions to facilitate code reuse and manipulate strings.				
3.	Apply various structuring the data using lists, tuples				
4.	Understand the need for working with various documents like Excel, PDF, Word and Others.				
5.	Understand the Object-Oriented Programming concepts in Python.				

Module - 1	No. of Hrs
Python Basics: The Python programming language, Program, Debugging, Variables, Expressions, and Statements, Entering expressions into the Interactive Shell, Your first program, Dissecting your program.	08
Flow control: Boolean Values, Comparison Operators, Boolean Operators, Mixing Boolean and Comparison Operators, Elements of Flow Control, Program Execution, Flow Control Statements, Importing Modules, Ending a Program Early with sys. exit ().	
Textbook 1: Chapters 1 – 2 Textbook 2: Chapters 1.1-1.3, Chapter 2.1-2.10	
Module - 2	No. of Hrs
Functions: def Statements with Parameters, Return Values, and return Statements, The None Value, Keyword Arguments, and print(), Local and Global Scope, the global Statement, Exception Handling, A Short Program: Guess the Number. Lists: The List Data Type, Working with Lists, Augmented Assignment Operators, Methods, Example Program: Magic 8 Ball with a List, List-like Types: Strings and Tuples, References. Textbook 1: Chapters 3, 4	08
Module - 3	No. of Hrs
Dictionaries and Structuring Data: The Dictionary Data Type, Pretty Printing, Using Data Structures to Model Real-World Things. Manipulating Strings: Working with Strings, Useful String Methods, Project: Password Locker. Textbook 1: Chapters 5, 6	08
Module - 4	No. of Hrs
Reading and Writing Files: Files and File Paths, The os.path Module, The File Reading/Writing Process, Saving Variables with the shelve Module, Saving Variables with the print.format() Function, Project: Generating Random Quiz Files, Project: Multi-clipboard. Working with Excel Spreadsheets: Installing the openpyxl Module, Reading Excel Documents, Writing Excel Documents.	08
Textbook 1: Chapters 8, 9 and 12	
Module - 5	No. of Hrs
Classes and objects: Programmer defined types, Attributes, Rectangles, Instances as return values, Objects are mutable, Copying,	

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Classes and functions: Time, Pure functions, Modifiers.

Classes and methods: Object-oriented features, Printing objects, Another example, A more complicated example, The init method, The str method, Operator overloading, Type-based dispatch, Polymorphism, Interface, and implementation.

Textbook 2: Chapters 15 – 17

Course	Course Outcomes: At the end of the course, the students will be able to						
CO1	Understand the fundamental programming constructs to solve basic computational problems.						
CO2	Learn the flow of execution and the need for debugging to rectify program bugs proficiently.						
CO3	Utilize the methods to create and manipulate the importance of data structures in problem-solving.						
CO4	Know the structured and modular code using appropriate Object-Oriented Programming paradigms.						
CO5	Apply the acquired skills to provide solutions to real-world problems.						

	Practical Component
Sl. No.	Experiments for Conduction
1.	a) Develop a program to read the student details like Name, USN, and Marks in three subjects. Display the student details, total marks, and percentages with suitable messages.
	b) Develop a program to read the name and year of birth of a person. Display whether the person is a senior citizen or not.
	a) Develop a program to generate Fibonacci sequence of length (N). Read N from the console.
2.	b) Write a function to calculate the factorial of a number. Develop a program to compute binomial coefficient (Given N and R).
3.	Read N numbers from the console and create a list. Develop a program to print mean, variance, and standard deviation with suitable messages.
4.	Read a multi-digit number (as chars) from the console. Develop a program to print the frequency of each digit with a suitable message.
	Develop a program to print the 10 most frequently appearing words in a text file.
5.	[Hint: Use a dictionary with distinct words and their frequency of occurrences. Sort the dictionary in the reverse order offrequency and display the dictionary slice of the first 10 items]
6.	Develop a program to sort the contents of a text file and write the sorted contents into a separate text file [Hint: Use string methods <i>strip()</i> , <i>len()</i> , list methods <i>sort()</i> , <i>append()</i> , and file methods <i>open()</i> readlines(), and write()].
	Implement a Python program to perform the following operations on an Excel spreadsheet:
7.	 Reading the first 5 rows of all columns Appending a new row / new column
	Delete row/column
	To perform aggregate functions
8.	Write a function named <i>DivExp</i> which takes TWO parameters a, b and returns the value of c, where

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

	c=a/b. Write suitable assertion for $a>0$ in function $DivExp$ and raise an exception for when $b=0$. Develop a suitable program which reads two values from the console and calls a function $DivExp$.
9.	Define a function which takes TWO objects representing complex numbers and returns new complex number with an addition of two complex numbers. Define a suitable class 'Complex' to represent the complex number. Develop a program to read $N(N \ge 2)$ complex numbers and to compute the addition of N complex numbers.
10.	Develop a program that uses class Student which prompts the user to enter marks in three subjects and calculates total marks, percentage and displays the score card details. [Hint: Use list to store the marks in three subjects and total marks. Use <code>_init_()</code> method to initialize name, USN and the lists to store marks and total, Use <code>getMarks()</code> method to read marks into the list, and <code>display()</code> method to display the score card details.]

CIE Evaluation

Assessment Details both (CIE and SEE)

The weightage of continuous Internal Evaluation (CIE) is 50% and for the Semester End Examination (SEE) is 50%. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50). The minimum passing mark for SEE is 35% of maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. Student has to secure a minimum 40% (40 marks out of 100) in the total of the CIE and SEE together.

The CIE marks for the theory component of the **Integrated Course** (**IC**) shall be 25 marks and for the laboratory component 25 marks

CIE for the theory component of IC:

- 1. Three tests each of 50 marks, after the completion of the syllabus 40%, 70% and 100% respectively.
- 2. Average of best two internal assessment tests each of 50 marks, scale down to 30 marks.
- 3. Any two assessment methods as per regulations i.e. Two assignments / Two Quizzes/ Weekly test / project work for (20+20) marks, scaled down to 20 marks.
- 4. Total marks scored (30+20 = 50 marks) scaled down to 25.

CIE for the Practical component of IC:

- 1. On completion of every experiment / program in the laboratory, the students shall be evaluated and marks shall be awarded on the same day.
- 2. Each experiment is evaluated for 10 marks and scaled down to 5 marks
- **3.** Laboratory test at the end of the 15th week of the semester / after completion of all the experiments shall be conducted for **50 marks** and scaled down to **20 marks**.
- 4. Total marks scored for lab component: 05+20= **25 marks**.
- 5. The minimum marks to be secured in CIE to appear for SEE shall be 10(40% of maximum marks 25) in the theory and 10(40% of Maximum marks 25) in the practical.
- 6. The laboratory component of the **integrated course** shall be CIE only. However, in SEE, the questions from the practical component shall be included.
- 7. The maximum of 05 questions is to be set from the practical component and the total marks of all questions should not be more than 25 marks.

Semester End Examination (SEE)

- 1. The question paper shall be set for 100 marks and duration of SEE is 3 hours.
- 2. The question paper will have two parts: Part –A and Part B
- 3. **Part A** should contain minimum **Two or Four** quiz questions from each module of 02 marks / 01 mark each. **Part A is Compulsory** and carries 20 Marks.
- 4. **Part B** contains two questions of 16 marks (with minimum of 3 sub questions) from each module with internal choice. Students should answer five full questions, selecting one full question from each module.
- 5. Students have to answer for 100 marks and marks scored out of 100 shall be proportionally reduced to 50 marks.
- 6. Question papers to be set as per the Blooms Taxonomy levels.

UG (B.E) Syllabus 2024-25

I Semester – Chemistry Cycle

Electrical and Electronics Engineering (EEE)

Rajarajeswari College of Engineering (An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

SEMESTER I								
Mathematics-I for EE								
Course Code	:	B24MAEE101	CIE	:	50 Marks			
Teaching Hours L: T:P	:	2:2:2	SEE	:	50 Marks			
Total Hours	:	50 Hours	Total	:	100 Marks			
Credits	:	4	SEE Duration	:	3Hrs			

	Course Objectives						
1	Develop the knowledge of Linear Algebra referring to matrices.						
2	Develop the knowledge of solving engineering problems of pedal equation and Taylors series						
3	Analyze engineering problems by applying Partial Differential Equations.						
4	Develop the knowledge of solving differential equations and their applications in engineering.						
5	Analyze engineering problems applying Ordinary Differential Equations.						

Module 1: Linear Algebra-I	10hrs.
Elementary row transformation of a matrix, Rank of a matrix. Consistency and Solution of system of linear	
equations - Gauss-elimination method, Gauss-Jordan method and approximate solution by Gauss- Seidel	
method. Eigen values and Eigenvectors, Rayleigh's power method to find the dominant Eigen value and	
Eigenvector.	
Self-Study: Solution of system of equations by Gauss-Jacobi iterative method. Inverse of a square matrix by	
Cayley- Hamilton theorem.	
Applications: Network Analysis, Markov Analysis, Critical point of an etwork system. Optimum solution	
Module 2: Polar curves	10hrs.
Polar coordinates, Polar curves, angle between the radius vector and the tangent, angle between two curves.	
Pedal equations. Curvature and Radius of Curvature- Cartesian, Parametric, Polar and Pedal forms (Proof	
only for Cartesian and Polar Forms). Taylor's and Maclaurin's series for a function of single variable	
(statements only) and problems.	
Self-study: Center and circle of curvature, evolutes and involutes	
Applications: Communication signals, Manufacturing of microphones and Image processing.	
Module 3:Partial Derivatives	10hrs.
Evaluation of indeterminate forms. Function of two or more variables, Partial derivatives, Differentiation of	
composite functions. Jacobians (direct examples). Taylor's theorem for function of two variables. Maxima	
and Minima of function of two variables.	
Self-study: Method of Lagrange's undetermined multipliers with single constraint.	
Applications: Series expansion in communication signals, Errors and approximations and vector calculus.	
Module 4:Differential Equations	10hrs.
LinearandBernoulli'sdifferentialequations. Exactandreducibletoexactdifferentialequations Integrating factors	
on $\frac{1}{N} \left(\frac{\partial M}{\partial y} - \frac{\partial N}{\partial x} \right)$ and $\frac{1}{M} \left(\frac{\partial N}{\partial x} - \frac{\partial M}{\partial y} \right)$, Orthogonal trajectories. Problems. Non-linear differential equations:	
Introduction to general and singular solutions, Solvable for p only, Clairaut's equations, reducible to	
Clairaut's equations -Problems.	
Self-Study: Applications of ODEs, Solvable for x and y.	
Applications: Rate of Growth or Decay, Conduction of heat	
Module 5:Ordinary Differential Equations of Higher Order	10hrs.
Higher- order linear ODEs with constant coefficients - Inverse differential operator, Particular Integral	
when $X = ke^{ax}$, $ksin(ax + b)$ or $kcos(ax + b)$ and X is a Polynomial, method of variation of parameters,	
Cauchy's and Legendre's homogeneous differential equations -Problems.	
Self-Study: Formulation and solution of Cantilever beam. Finding the solution by the method of	
undetermined coefficients.	
Applications: Oscillations of a spring, Transmission lines, Highway engineering.	

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

List of Laboratory experiments (2hours/week per batch) 10lab sessions+1 repetition class + 1 Lab Assessment

1	2D plots for Cartesian and polar curves
2	Finding angle between polar curves, curvature and radius of curvature of a given curve
3	Finding partial derivatives and Jacobian
4	Applications to Maxima and Minima of two variables
5	Solution of first-order ordinary differential equation and plotting the solution curves
6	Program to compute area, volume and center of gravity
7	Evaluation of improper integrals
8	Numerical solution of system of linear equations, test for consistency and graphical representation
9	Solution of system of linear equations using Gauss-Seidel iteration
10	Compute Eigen values and eigenvectors and find the largest and smallest Eigen value by Rayleigh power method.

Course Outcomes : At the end of the course, the students will be able to		
CO1	Test the consistency of a system of linear equations and to solve by direct and iterative methods.	
CO2	Apply the knowledge of calculus to solve problems related to polar curves and its applications in determining	
	the bentness of a curve.	
CO3	Learn the notion of partial differentiation to calculate rate of change of multivariate functions and solve	
	Problems related to composite functions and Jacobian.	
CO4	Understand that physical systems can be described by Differential equations and solve such equations.	
CO5	Analyze the solution of linear and non-linear Differential equations

Course Objectives

- To impart the knowledge of Chemistry involved in Electrochemical cells,
- Corrosion and its control; Conventional, electrochemical and renewable sources of energy
- Polymers; memory and display systems; Water treatment; sensors; e-waste management;
- Nanomaterials and Instrumental methods of analysis

	No.of Hrs
ELECTRODES AND CELLS – Introduction- Classification of cells - primary, secondary and concentration cells; Reference electrodes - Calomel electrode; Ion-selective electrodes - Glass electrode. Determination of pH using glass electrode, numerical on concentration cells. CORROSION - Definition, Electrochemical theory of corrosion, Types of corrosion - differential metal, differential aeration; Corrosion Penetration Rate (CPR), numerical. Corrosion control: Metal coating-Galvanization, Inorganic coatings – anodizing. Cathodic protection – Sacrificial anode, Metal finishing - Introduction, technological importance; Electroless plating: Introduction, Electroless plating of copper (PCB).	8
Module – 2	No.of Hrs
Energy: Sources, Conversion and Storage	110.01 1113
Chemical fuels: Introduction, Calorific value - definition, gross and net calorific values; Determination of calorific value of a solid / liquid fuel using Bomb calorimeter and numerical on calorific value; Petroleum cracking - fluidized bed catalytic cracking; Octane number. Sustainable energy sources: Hydrogen as a fuel - advantages, production and storage.Production of Biodiesel. Solar cells - Construction and working of Si based PV cell, advantages. Quantum Dot Sensitized Solar Cells (QDSSC's) - Principle, Properties and Applications. Electrochemical Energy Systems: Introduction to batteries, Classification of batteries - primary and secondary batteries; construction, working and applications of Lithium ion batteries.	8
Module − 3 Polymers for Engineering Applications	No.of Hrs
Polymers - Introduction, Molecular weight - number average and weight average molecular weight, Polydispersion index, numerical problems;; Plastics - Definition of resins and plastics; Synthesis, properties and applications of PMMA; Elastomers - Synthesis, properties and application of butyl rubber; Adhesives: Synthesis, properties and applications of epoxy resin. Polymer composites - Composites as structural material; Synthesis and applications of Kevlar; Biodegradable polymers - Introduction, Lactic acid - synthesis, uses.	8
Module – 4	No.of Hrs
Chemistry of Electronic Materials Conductors, Semiconductors and Insulators: Introduction, Band Theory with exampples	
Semiconductors: Introductoion, Production of electronic grade silicon, Refining- Float Zone method and Czochralski process. Memory Devices: Introduction, concepts of electronic memory. Classification of electronic	8
memory materials-organic/polymer electronic memory devices (organic molecules, polymeric	

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

materials, organicinorganic hybrid materials). Display Systems : Liquid crystals (LC's) - Introduction, classification, properties and application in Liquid Crystal Displays (LCD's) Photoactive and electroactive materials. (QLED's) and (OLED's) Properties and Applications.	
Module – 5	No.of Hrs
Sensors, Water treatment, and E - Waste Management	- 10101
Sensors: Introduction, working, principle and applications of, Electrochemical sensors. Electrochemical gas sensors for SOx and NOx. Water treatment: Introduction, hardness of water, types, determination of hardness by EDTA method, removal of hardness by ion exchange method. BOD and COD - introduction and their significance in waste water treatment, experimental determination of COD of waste water numerical on COD, treatment of waste water - primary, secondary and tertiary treatment methods. E-waste Management: Introduction, sources, types, effects of e-waste on environment and human health, methods of disposal. Extraction of copper from e-waste.	8

Course	Outcomes: At the end of the course, the students will be able to
CO1	Understand and apply the principles of chemistry involved in water treatment, corrosion, energy sources, polymers, nanomaterials, phase equilibria, alloys, ceramics and instrumental methods of analysis.
CO2	Analyse the Engineering problems and draw meaningful inferences through applied chemistry.
CO3	Implement sustainable solutions through concepts of Applied Chemistry in the field of Materials,
	Energy and Environment
CO4	Engage in self-study and make an effective oral presentation on contribution of Chemistry to society
CO5	Apply the knowledge of chemistry to investigate engineering materials by volumetric and instrumental methods and analyze, interpret the data to assess and address the issues of Environmental Pollution

PRACTICAL MODULE

A – Demonstration (any two) offline/virtual:

- A1. Synthesis of polyurethane
- A2. Determination of strength of an acid in Pb-acid battery
- A3. Synthesis of iron oxide nanoparticles
- A4. Electroplating of copper on metallic objects

<u>B - Exercise (compulsorily any 4 to be conducted):</u>

- B1. Conductometric estimation of acid mixture
- B2. Potentiometric estimation of FAS using K2Cr2O7
- B3. Determination of pKa of vinegar using pH sensor (Glass electrode)
- B4. Determination of rate of corrosion of mild steel by weight loss method
- B5.Estimation of total hardness of water by EDTA method

C – Structured Enquiry (compulsorily any 4 to be conducted):

- C1. Estimation of Copper present in electroplating effluent by optical sensor (colorimetry)
- C2. Determination of Viscosity coefficient of lubricant (Ostwald's viscometer)
- C3. Estimation of iron in TMT bar by diphenyl amine/external indicator method
- C4. Estimation of Sodium present in soil/effluent sample using flame photometry
- C5. Determination of Chemical Oxygen Demand(COD) of industrial waste water sample

D – Open Ended Experiments (any two)

- D1. Estimation of metal in e-waste by optical sensors
- D2. Electroless plating of Nickle on Copper
- D3. Determination of glucose by electrochemical sensors
- D4. Synthesis of polyaniline and its conductivity measurement

CIE Evaluation

Assessment Details both (CIE and SEE)

The weightage of continuous Internal Evaluation (CIE) is 50% and for the Semester End Examination (SEE) is 50%. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50). The minimum passing mark for SEE is 35% of maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. Student has to secure a minimum 40% (40 marks out of 100) in the total of the CIE and SEE together.

The CIE marks for the theory component of the **Integrated Course** (**IC**) shall be 25 marks and for the laboratory component 25 marks

CIE for the theory component of IC:

- 1. Three tests each of 50 marks, after the completion of the syllabus 40%, 70% and 100% respectively.
- 2. Average of best two internal assessment tests each of 50 marks, scale down to 30 marks.

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

- 3. Any two assessment methods as per regulations i.e. Two assignments / Two Quizzes/ Weekly test / project work for (20+20) marks, scaled down to 20 marks.
- 4. Total marks scored (30+20 = 50 marks) scaled down to 25.

CIE for the Practical component of IC:

- 1. On completion of every experiment / program in the laboratory, the students shall be evaluated and marks shall be awarded on the same day.
- 2. Each experiment is evaluated for 10 marks and scaled down to 5 marks
- 3. Laboratory test at the end of the 15th week of the semester / after completion of all the experiments shall be conducted for **50 marks** and scaled down to **20 marks**.
- 4. Total marks scored for lab component: 05+20= 25 marks.
- 5. The minimum marks to be secured in CIE to appear for SEE shall be 10(40% of maximum marks 25) in the theory and 10(40% of Maximum marks 25) in the practical.
- 6. The laboratory component of the **integrated course** shall be CIE only. However, in SEE, the questions from the practical component shall be included.
- 7. The maximum of 05 questions is to be set from the practical component and the total marks of all questions should not be more than 25 marks.

	Theory							
IA Test	Exam	Scaled down	Average of best	Total				
	conducted for	to	two tests					
IA-1	50	30						
IA-2	50	30	30					
IA-3	50	30		50/2=25				
Two	2X10=20	10	10					
Assignments								
Two Quizzes	2X10=20	10	10					

LAB								
Continuous performance and record writing	Each experiments evaluated for 10 marks	Scaled down to 05 marks	5+20=25					
Internal Test + Viva voce	Exam conducted for 50 Marks	Scaled down to 20 marks						

Semester End Examination (SEE)

- 1. The question paper shall be set for 100 marks and duration of SEE is 3 hours.
- 2. The question paper will have two parts: Part –A and Part B
- 3. **Part A** should contain minimum **Two or Four** quiz questions from each module of 02 marks / 01 mark each. **Part A is Compulsory** and carries 20 Marks.
- 4. **Part B** contains two questions of 16 marks (with minimum of 3 sub questions) from each module with internal choice. Students should answer five full questions, selecting one full question from each module.
- 5. Students have to answer for 100 marks and marks scored out of 100 shall be proportionally reduced to 50 marks.
- 6. Question papers to be set as per the Blooms Taxonomy levels.

Semester I/II								
Computer Aided Engineering Drawing								
		Category: ESO	C					
		(Common to all bra	nches)					
		(Practical)						
Course Code	:	B24CEDK103/203	CIE	:	50 Marks			
Teaching Hours L : T : P : 2:0:2 SEE : 50 Marks								
Total Hours : 40 Total : 100 Marks								
Credits	Credits 03 SEE Duration : 3 Hrs							

Cours	Course Objectives						
1	To understand the basic principles and conventions of engineering drawing						
2	To use drawing as a communication mode						
3	To generate pictorial views using CAD software						
4	To understand the development of surfaces						
5	To visualize engineering components						

Module - 1	No. of Hrs
Introduction: Significance of Engineering drawing, BIS Conventions of Engineering Drawing, Free hand sketching of engineering drawing, Scales. Introduction to Computer Aided Drafting Software, Co-ordinate system and reference planes HP, VP, RPP& LPP of 2D/3D environment. Selection of drawing sheet size and scale. Commands and creation of Lines, coordinate points, axes, polylines, square, rectangle, polygons, splines, circles, ellipse, text, move, copy, off-set, mirror, rotate, trim, extend, break, chamfer, fillet and curves. Orthographic Projections of Points, Lines and Planes: Introduction to Orthographic projections: Orthographic projections of points in all quadrants. Orthographic projections of lines (Placed in First quadrant only). Orthographic projections of planes similar to Triangle, Square, Rectangle, Pentagon, Hexagon, and Circular laminas (Placed in First Quadrant only using Change of Position Method).	8 Hrs
Module - 2	No. of Hrs
Orthographic Projection of Solids: Orthographic projection of right regular solids Prisms (Square, Pentagon, Hexagon) & Pyramids (Square, Pentagon, Hexagon), Cones, Cubes & Tetrahedron. (Only Solids Resting on HP using Change of Position Method)	8Hrs
Module - 3	No. of Hrs
Isometric Projections: Isometric scale, Isometric projection of hexahedron (cube), right regular prisms, pyramids, cylinders, cones and spheres. Isometric projection of combination of two and three simple solids. (Conversion of simple isometric drawings into orthographic views)	8 Hrs

Rajarajeswari College of Engineering (An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Module - 4	No. of Hrs
Development of Lateral Surfaces of Solids:	
Development of lateral surfaces of right regular prisms, cylinders, pyramids and cones	
resting with base on HP only. Problems on applications of development of lateral	8 Hrs
surfaces ex: Funnels	0 111 5
Development of lateral surfaces of their frustums and truncations.	
Module - 5	No. of Hrs
Multidisciplinary Applications & Practice using CAD software (For CIE Only): Free hand Sketching: True free hand, Guided Free hand, Roads, Buildings, Utensils, Hand tools & Furniture's etc. Drawing Simple Mechanisms: (Only for ME with allied branches) Bicycles, Tricycles, Gear trains, Ratchets, two-wheeler cart & Four-wheeler carts to dimensions etc. Electric Wiring and lighting diagrams: (Only for EEE with allied branches) Automatic fire alarm, Call bell system, UPS system, Basic power distribution system. Basic Building Drawing: (Only for Civil with allied branches) Architectural floor plan, basic foundation drawing, steel structures-frames, bridges, trusses. Flow charts drawings: (Only for CSE with allied branches) Types of flow charts like Process Flowchart, Workflow Diagram, Swimlane Flowchart, Data Flow Diagram, System Flowchart, and Decision Flowchart. Electronics Engineering Drawings: (Only for ECE with allied branches) Simple electronics circuit drawings, practice on layers concept.	8 Hrs

Course	Course Outcomes: At the end of the course, the students will be able to							
CO-1	Draw and communicate the objects with definite shape and dimensions.							
CO-2	Recognize and Draw the shape and size of objects through different views.							
CO-3	Develop the lateral surfaces of the object.							
CO-4	Create a Drawing views using CAD software.							
CO-5	Identify the interdisciplinary engineering components through its graphical representation.

CONTINUOUS INTERNAL EVALUATION (CIE)

Assessment Details (both CIE and SEE):

- 1) The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%.
- 2) The minimum passing mark for the CIE is 40% of the maximum marks (20 marks) and that for SEE minimum passing marks is 35% of the maximum marks (18 marks).
- 3) A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject / course if the student secures not less than 35% (18 Marks out of 50) in the Semester End Examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

Continuous Internal Evaluation (CIE)

- CIE shall be evaluated for Max. Marks of 100 and later the same shall be scaled-down to 50 marks as detailed below.
- CIE component should comprise of continuous evaluation of drawing work of students as and when the modules are covered based on below detailed weightage.
- IA Test- 3 covering all the modules is to be conducted for Max. Marks of 100 and evaluation to be based SEE pattern, and the same is to be scaled down to 15 marks.
- The final CIE = Class work marks + Test marks.

RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (CIE) **Evaluation Weightage in Particulars** Marks Reduced to **Total** marks **IA-1 50** Best of Two Internals 10 **IA-2 50** 25 **IA-3** Lab Mock Exam 50 15 **Sketch Book** 20 Sketch Book + Assignments 25 **Assignments** 5

Semester End Examination (SEE)

Total

50

- 1) SEE shall be conducted and evaluated for maximum marks 100. Marks obtained shall be accounted for SEE final marks, reducing it by 50%
- 2) Question paper shall be set jointly by both Internal and External Examiner and made available for each batch as per schedule. **Questions are to be set preferably from Text Books.**
- 3) Related to Module-1: One full question can be set either from "points & lines" or "planes".
- 4) Evaluation shall be carried jointly by both the examiners.
- 5) Scheme of Evaluation: To be defined by the examiners jointly and the same shall be submitted to the university along with question paper.
- 6) One full question shall be set from each of the Module from Modules 1, 2, 3 and 4 as per the below table weightage details. However, the student may be awarded full marks, if he/she completes solution on

Cou	rse Objectives
1	To Explain the operation of Semiconductor diode, Zener diode and their applications.
2	To Explain the Transistor operation and Different configurations, working and construction of
	FET and MOSFET.
3	To Explain the operation of linear Op-amps and its applications
4	To Explain the Basic Logic gates, circuits and their optimization.
5	To Explain the Principles of Communication system

Module - 1	No. of Hrs
Diode Applications - Load line analysis, series- diode configuration. Sinusoidal inputs - half wave rectification, Full wave Rectification, Zener diodes, voltage multiplier Circuits . T1: 2.2,2.3,2.6,2.7,2.11, 2.12	8
Module - 2	No. of Hrs
Bipolar junction transistor - Transistor operation, common base configuration, common emitter configuration, common collector configuration. Junction field effect transistor - construction and characteristics of JFET, Transfer Characteristics. MOSFET- Depletion type MOSFET, Enhancement type MOSFET T1: 3-3, 304, 305, 306, 6-2, 6-3, 6-7, 6-8	8
Module - 3	No. of Hrs
Operational amplifier –Operational amplifier basics, practical Op-Amp circuits, Op-Amp specification –DC offset parameter, frequency parameter, Differential and common mode operation. Practical Op-Amp circuits– Inverting amplifier, non-inverting amplifier, Unity follower, Summingamplifier, Integrator, Differentiator. T1:10.4, 10.5, 10.6, 10.7, 10.9	8
Module– 4	No. of Hrs
Boolean Algebra and Logic Circuits: Binary numbers, Number Base Conversion, octal &Hexa Decimal Numbers, Complements, Basic definitions, Axiomatic Definition of Boolean Algebra, Basic Theorems and Properties of Boolean Algebra, Boolean Functions, Canonical and Standard Forms, Other Logic Operations, Digital Logic Gates (Text 2: 1.2, 1.3, 1.4, 1.5,2.1, 2.2, 2.3, 2.4, 2.5, 2.6, 2.7) Combinational logic: Introduction, Design procedure, Adders- Half adder, Full adder (Text 2:4.1, 4.2, 4.3)	8
Module– 5	No. of Hrs
Elements of a Communication system, Need for Modulation, Amplitude Modulation (Am) Techniques, Frequency Modulation, Phase modulation, Comparison of FM & PM, Comparison of FM and AM. T3: 1.2, 1.3, 3.2.1, 4.1.1, 4.1.2, 4.1.3, 4.2.6, 6.2.1, 6.2.2	8

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Course	Course Outcomes: At the end of the course, the students will be able to						
CO1	Develop the basic knowledge on construction and characteristics of semiconductor devices.						
CO2	Summarize the basic concept of small scale circuits using BJT,JFET,MOSFET scale circuits						
CO3	Apply the knowledge on various applications of operational amplifiers						
CO4	Understand the concepts of Boolean algebra and Logic circuits						
CO5	Illustrate the outline of Communication system.

CIE Evaluation

Assessment Details both (CIE and SEE)

The weightage of continuous Internal Evaluation (CIE) is 50% and for the Semester End Examination (SEE) is 50%. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50). The minimum passing mark for SEE is 35% of maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. Student has to secure a minimum 40% (40 marks out of 100) in the total of the CIE and SEE together.

CIE for the theory:

- 1. Three tests each of 50 marks, after the completion of the syllabus 40%, 70% and 100% respectively.
- 2. Average of best two internal assessment tests each of 50 marks, scale down to 30 marks.
- 3. Any two assessment methods as per regulations i.e. Two assignments / Two Quizzes/ Weekly test / project work for 40 marks, scaled down to 20 marks.
- 4. Total marks scored (30+20 = 50 marks).
- 5. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50).

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

		Theory		
IA Test	Exam conducted	Scaled down to	Average of best two	Total
	for		tests

Semester I/II						
Introduction to Python Programming						
		Category: PLC-	I/II			
		(Common to All Bra	anches)			
		(Integrated)				
Course Code	:	B24PLCK152/252	CIE	:	50 Marks	
Teaching Hours L: T: P	Teaching Hours L: T: P : 2:0:2 SEE : 50 Marks					
Total Hours : 50 Total : 100 Marks						
Credits 3 SEE Duration : 3 Hrs						

Course Objectives					
1.	Learn the syntax and semantics of the Python programming language.				
2.	Readily use the Python functions to facilitate code reuse and manipulate strings.				
3.	Apply various structuring the data using lists, tuples				
4.	Understand the need for working with various documents like Excel, PDF, Word and Others.				
5.	Understand the Object-Oriented Programming concepts in Python.				

Module - 1	No. of Hrs
Python Basics: The Python programming language, Program, Debugging, Variables, Expressions, and Statements, Entering expressions into the Interactive Shell, Your first program, Dissecting your program.	08
Flow control: Boolean Values, Comparison Operators, Boolean Operators, Mixing Boolean and Comparison Operators, Elements of Flow Control, Program Execution, Flow Control Statements, Importing Modules, Ending a Program Early with sys. exit ().	
Textbook 1: Chapters 1 – 2 Textbook 2: Chapters 1.1-1.3, Chapter 2.1-2.10	
Module - 2	No. of Hrs
Functions: def Statements with Parameters, Return Values, and return Statements, The None Value, Keyword Arguments, and print(), Local and Global Scope, the global Statement, Exception Handling, A Short Program: Guess the Number. Lists: The List Data Type, Working with Lists, Augmented Assignment Operators, Methods, Example Program: Magic 8 Ball with a List, List-like Types: Strings and Tuples, References. Textbook 1: Chapters 3, 4	08
Module - 3	No. of Hrs
Dictionaries and Structuring Data: The Dictionary Data Type, Pretty Printing, Using Data Structures to Model Real-World Things. Manipulating Strings: Working with Strings, Useful String Methods, Project: Password Locker. Textbook 1: Chapters 5, 6	08
Module - 4	No. of Hrs
Reading and Writing Files: Files and File Paths, The os.path Module, The File Reading/Writing Process, Saving Variables with the shelve Module, Saving Variables with the print.format() Function, Project: Generating Random Quiz Files, Project: Multi-clipboard. Working with Excel Spreadsheets: Installing the openpyxl Module, Reading Excel Documents, Writing Excel Documents.	08
Textbook 1: Chapters 8, 9 and 12	
Module - 5	No. of Hrs
Classes and objects: Programmer defined types, Attributes, Rectangles, Instances as return values, Objects are mutable, Copying,	

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Classes and functions: Time, Pure functions, Modifiers.

Classes and methods: Object-oriented features, Printing objects, Another example, A more complicated example, The init method, The str method, Operator overloading, Type-based dispatch, Polymorphism, Interface, and implementation.

Textbook 2: Chapters 15 – 17

Course	Course Outcomes: At the end of the course, the students will be able to						
CO1	Understand the fundamental programming constructs to solve basic computational problems.						
CO2	Learn the flow of execution and the need for debugging to rectify program bugs proficiently.						
CO3	Utilize the methods to create and manipulate the importance of data structures in problem-solving.						
CO4	Know the structured and modular code using appropriate Object-Oriented Programming paradigms.						
CO5	Apply the acquired skills to provide solutions to real-world problems.						

	Practical Component
Sl. No.	Experiments for Conduction
1.	a) Develop a program to read the student details like Name, USN, and Marks in three subjects. Display the student details, total marks, and percentages with suitable messages.
	b) Develop a program to read the name and year of birth of a person. Display whether the person is senior citizen or not.
	a) Develop a program to generate Fibonacci sequence of length (N). Read N from the console.
2.	b) Write a function to calculate the factorial of a number. Develop a program to compute binomial coefficient (Given N and R).
3.	Read N numbers from the console and create a list. Develop a program to print mean, variance, and standard deviation with suitable messages.
4.	Read a multi-digit number (as chars) from the console. Develop a program to print the frequency of each digit with a suitable message.
	Develop a program to print the 10 most frequently appearing words in a text file.
5.	[Hint: Use a dictionary with distinct words and their frequency of occurrences. Sort the dictionary in the reverse order offrequency and display the dictionary slice of the first 10 items]
6.	Develop a program to sort the contents of a text file and write the sorted contents into a separate text file [Hint: Use string methods <i>strip()</i> , <i>len()</i> , list methods <i>sort()</i> , <i>append()</i> , and file methods <i>open() readlines()</i> , and <i>write()</i>].
	Implement a Python program to perform the following operations on an Excel spreadsheet:
	• Reading the first 5 rows of all columns
7.	Appending a new row / new column
	 Delete row/column To perform aggregate functions
8.	Write a function named <i>DivExp</i> which takes TWO parameters a, b and returns the value of c, where

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

	c=a/b. Write suitable assertion for $a>0$ in function $DivExp$ and raise an exception for when $b=0$. Develop a suitable program which reads two values from the console and calls a function $DivExp$.
9.	Define a function which takes TWO objects representing complex numbers and returns new complex number with an addition of two complex numbers. Define a suitable class 'Complex' to represent the complex number. Develop a program to read $N(N \ge 2)$ complex numbers and to compute the addition of N complex numbers.
10.	Develop a program that uses class Student which prompts the user to enter marks in three subjects and calculates total marks, percentage and displays the score card details. [Hint: Use list to store the marks in three subjects and total marks. Use <code>_init_()</code> method to initialize name, USN and the lists to store marks and total, Use <code>getMarks()</code> method to read marks into the list, and <code>display()</code> method to display the score card details.]

CIE Evaluation

Assessment Details both (CIE and SEE)

The weightage of continuous Internal Evaluation (CIE) is 50% and for the Semester End Examination (SEE) is 50%. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50). The minimum passing mark for SEE is 35% of maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. Student has to secure a minimum 40% (40 marks out of 100) in the total of the CIE and SEE together.

The CIE marks for the theory component of the **Integrated Course** (**IC**) shall be 25 marks and for the laboratory component 25 marks

CIE for the theory component of IC:

- 1. Three tests each of 50 marks, after the completion of the syllabus 40%, 70% and 100% respectively.
- 2. Average of best two internal assessment tests each of 50 marks, scale down to 30 marks.
- 3. Any two assessment methods as per regulations i.e. Two assignments / Two Quizzes/ Weekly test / project work for (20+20) marks, scaled down to 20 marks.
- 4. Total marks scored (30+20 = 50 marks) scaled down to 25.

CIE for the Practical component of IC:

- 1. On completion of every experiment / program in the laboratory, the students shall be evaluated and marks shall be awarded on the same day.
- 2. Each experiment is evaluated for 10 marks and scaled down to 5 marks
- **3.** Laboratory test at the end of the 15th week of the semester / after completion of all the experiments shall be conducted for **50 marks** and scaled down to **20 marks**.
- 4. Total marks scored for lab component: 05+20= **25 marks**.
- 5. The minimum marks to be secured in CIE to appear for SEE shall be 10(40% of maximum marks 25) in the theory and 10(40% of Maximum marks 25) in the practical.
- 6. The laboratory component of the **integrated course** shall be CIE only. However, in SEE, the questions from the practical component shall be included.
- 7. The maximum of 05 questions is to be set from the practical component and the total marks of all questions should not be more than 25 marks.

UG (B.E) Syllabus 2024-25

I Semester – Chemistry Cycle

Information Science and Engineering (ISE)

Rajarajeswari College of Engineering (An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

SEMESTER I								
Mathematics-I for CS								
Course Code	Course Code : B24MACS101 CIE : 50 Marks							
Teaching Hours L: T:P	:	2:2:2	SEE	:	50 Marks			
Total Hours : 50 Hours Total : 100 Marks								
Credits	:	4	SEE Duration	:	3Hrs			

	Course Objectives				
1	Develop the knowledge of Linear Algebra referring to matrices.				
2	Develop the knowledge of solving engineering problems of pedal equation and Taylors series				
3	Analyze engineering problems by applying Partial Differential Equations.				
4	Develop the knowledge on fundamentals of arithmetic				
5	Develop the knowledge of solving differential equations and their applications in engineering.				

Module-1: Linear Algebra-I	10hrs.
Rank of a matrix by elementary row transformations. Consistency of linear system of equations. Solution of	
linear system of equations: Gauss elimination, Gauss Jordan, and Gauss-Seidel methods, Rayleigh's Power	
Method to find the dominant eigen value and eigen vector of a square matrix.	
Self-Study: Solution of system of equations by Gauss-Jacobi iterative method. Inverse of a square matrix	
by Cayley- Hamilton theorem.	
Applications: Boolean matrix, Network Analysis, Markov Analysis, Critical point of a Network system,	
Optimum solution.	
Module-2: Polar curves	10hrs.
Polar coordinates, Polar curves, angle between the radius vector and the tangent, angle between two curves. Pedal equation. Curvature and Radius of Curvature-Cartesian, Parametric, Polar and Pedal forms (Proof	
only for Cartesian and Polar Forms). Taylor's and Maclaurin's series expansion for one variable (Statement	
only)— problems.	
Self-study: Centre and circle of curvature, evolutes, and involutes.	
Applications: Computer graphics, Image processing.	401
Module-3: Partial Derivatives	10hrs.
Evaluation of indeterminate forms. Function of two or more variables, Partial derivatives, Differentiation of composite functions. Jacobians (direct examples). Maxima and Minima of functions of two variables and	
problems.	
Self-study: Method of Lagrange's undetermined multipliers with single constraint. Euler's and Euler's	
extension theorem and problems.	
Applications: Series expansion in computer programming, Computing errors and approximations.	
Module-4: Modular Arithmetic	10hrs.
Introduction to Divisibility, GCD and Congruences, Linear Congruences, The Remainder theorem, Solving	
Polynomials, Linear Diophantine Equation, System of Linear Congruences, Euler's Theorem, Wilson	
Theorem and Fermat's little theorem. Applications of Congruences- RSA algorithm.	
Self-study: Properties of Prime Numbers, Fundamental theorem of Arithmetic	
Applications: Cryptography, encoding and decoding, RSA applications in public key encryption.	
Module-5: Differential Equations	10hrs.
Linear and Bernoulli's differential equations. Exact and reducible to exact differential equations. Integrating	
factors on $\frac{1}{N} \left(\frac{\partial M}{\partial y} - \frac{\partial N}{\partial x} \right)$ and $\frac{1}{M} \left(\frac{\partial N}{\partial x} - \frac{\partial M}{\partial y} \right)$, Orthogonal trajectories. Problems. Non-linear differential	
equations: Introduction to general and singular solutions, Solvable for p only, Clairaut's equations, reducible	
to Clairaut's equations -Problems.	
Self-Study: Applications of ODEs, Solvable for x and y.	
Applications: Rate of Growth or Decay, Conduction of heat	

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

List of Laboratory experiments (2 hours/week per batch) 10lab sessions + 1repetition class + 1 Lab Assessment

1	2D plots for Cartesian and polar curves
2	Finding angle between polar curves, curvature and radius of curvature of a given curve
3	Finding partial derivatives and Jacobian
4	Applications to Maxima and Minima of two variables
5	Solution of first-order ordinary differential equation and plotting the solution curves
6	Finding GCD using Euclid's Algorithm
7	Solving linear congruence's $ax \equiv b(modm)$
8	Numerical solution of system of linear equations, test for consistency and graphical representation
9	Solution of system of linear equations using Gauss-Seidel iteration
10	Compute Eigen values and Eigen vectors and find the largest and smallest eigen value by Rayleigh power method.

Course	Course Outcomes : At the end of the course, the students will be able to					
CO1	Test the consistency of a system of linear equations and to solve by direct and iterative methods.					
CO2	Applytheknowledgeofcalculustosolveproblemsrelatedtopolarcurvesanditsapplicationsin					
	Determining the bentness of a curve.					
CO3	Learn the notion of partial differentiation to calculate rate of change of multivariate functions and solve					
	Problems related to composite functions and Jacobian.					
CO4	Get acquainted fundamentals of Arithmetic and to apply modular arithmetic to computer algorithms					
CO5	Solve first-order linear/nonlinear ordinary differential equations analytically using standard methods.					
	Demonstrate various models through higher order differential equations and solve such linear ordinary					
	differential equations

SEMESTER I/II Applied Chemistry for CS Category: ASC Stream: CSE (Common to all CSE allied branches)

(Integrated)

		\ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \			
Course Code	:	B24CHCS102/202	CIE	:	50 Marks
Teaching Hours L: T: P	:	2:2:2	SEE	:	50 Marks
Total Hours	:	50	Total	:	100 Marks
Credits		4	SEE Duration	:	3 Hrs

Course Objectives

- To impart the knowledge of Chemistry involved in Electrochemical cells,
- Corrosion and its control; Conventional, electrochemical and renewable sources of energy
- Polymers; memory and display systems; Water treatment; sensors; e-waste management;
- Nanomaterials and Instrumental methods of analysis

Module – 1 Electrochemistry: Electrode Systems and Corrosion	No.of Hrs
Electrochemistry. Electrode Systems and Corrosion	
ELECTRODES AND CELLS – Introduction- Classification of cells - primary, secondary and concentration cells; Reference electrodes - Calomel electrode; Ion-selective electrodes - Glass electrode. Determination of pH using glass electrode, numerical on concentration cells. CORROSION - Definition, Electrochemical theory of corrosion, Types of corrosion - differential metal, differential aeration; Corrosion Penetration Rate (CPR), numerical. Corrosion control: Metal coating-Galvanization, Inorganic coatings – anodizing. Cathodic protection – Sacrificial anode, Metal finishing - Introduction, technological importance; Electroless plating: Introduction, Electroless plating of copper (PCB).	8
Module – 2	No.of Hrs
Energy: Sources, Conversion and Storage	No.01 Hrs
Chemical fuels: Introduction, Calorific value - definition, gross and net calorific values; Determination of calorific value of a solid / liquid fuel using Bomb calorimeter and numerical on calorific value; Petroleum cracking - fluidized bed catalytic cracking; Octane number. Sustainable energy sources: Hydrogen as a fuel - advantages, production and storage.Production of Biodiesel. Solar cells - Construction and working of Si based PV cell, advantages. Quantum Dot Sensitized Solar Cells (QDSSC's) - Principle, Properties and Applications. Electrochemical Energy Systems: Introduction to batteries, Classification of batteries - primary and secondary batteries; construction, working and applications of Lithium ion batteries.	8
Module - 3 Polymers for Engineering Applications	No.of Hrs
Polymers - Introduction, Molecular weight - number average and weight average molecular weight, Polydispersion index, numerical problems;; Plastics - Definition of resins and plastics; Synthesis, properties and applications of PMMA; Elastomers - Synthesis, properties and application of butyl rubber; Adhesives : Synthesis, properties and applications of epoxy resin. Polymer composites - Composites as structural material; Synthesis and applications of Kevlar; Biodegradable polymers - Introduction, Lactic acid - synthesis, uses	8
Module – 4	No.of Hrs
Materials for Memory & Display System	110.01 1113
Memory Devices: Introduction, Basic concepts of electronic memory, History of organic / polymer electronic memory devices, Classification of electronic memory devices, types of organic memory devices (organic molecules, polymeric materials, organic inorganic hybrid materials). Display Systems: Photoactive and electroactive materials, Nanomaterials and organic	8

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Self-learning: Properties and functions of Silicon(Si),Germanium(Ge),Copper(Cu),							
Aluminium(Al),andBrominated flame retardants in computers.							
Module – 5							
Sensors, Nantochemistry & E-Waste Management No.of Hrs							
SENSORS: Introduction, working, principle and applications of Electrochemical sensors. Electrochemical gas sensors for SOx and NOx. NanoChemistry: Introduction, Synthesis of nanoparticles by using bottom Up method-Sol Gel, precipitation method. Nanomaterials: properties and engineering application of carbon nanotubes and graphene. E-Waste: Introduction, sources of e-waste, Composition, Characteristics, and Need of e- waste management. Toxic materials used in manufacturing electronic and electrical products, health hazards due to exposure to e-waste. Recycling and Recovery: Different approaches of recycling (separation, thermal treatments, hydrometallurgical extraction. Extraction of gold from E-waste.	8						

Course	Outcomes: At the end of the course, the students will be able to
CO1	Understand and apply the principles of chemistry involved in water treatment, corrosion, energy sources, polymers, nanomaterials, phase equilibria, alloys, ceramics and instrumental methods of analysis.
CO2	Analyse the Engineering problems and draw meaningful inferences through applied chemistry.
CO3	Implement sustainable solutions through concepts of Applied Chemistry in the field of Materials, Energy and Environment
CO4	Engage in self-study and make an effective oral presentation on contribution of Chemistry to society
CO5	Apply the knowledge of chemistry to investigate engineering materials by volumetric and instrumental methods and analyze, interpret the data to assess and address the issues of Environmental Pollution

PRACTICAL MODULE

A – Demonstration (any two) offline/virtual:

- A1. Chemical Structure drawing using software: ChemDraw or ACD/ChemSketch
- A2. Determination of strength of an acid in Pb-acid battery
- A3: Synthesis of Iron-oxide Nanoparticles
- A4. Electrolysis of water

B – Exercise (compulsorily any 4 to be conducted):

- B1. Conductometric estimation of acid mixture
- B2. Potentiometric estimation of FAS using K2Cr2O7
- B3. Determination of pKa of vinegar using pH sensor (Glass electrode)
- B4. Determination of rate of corrosion of mild steel by weight loss method
- B5. Estimation of total hardness of water by EDTA method

<u>C-Structured Enquiry (compulsorily any 4 to be conducted):</u>

- C1. Estimation of Copper present in electroplating effluent by optical sensor (colorimetry)
- C2. Determination of Viscosity coefficient of lubricant (Ostwald's viscometer)
- C3. Estimation of iron in TMT bar by diphenyl amine/external indicator method
- C4. Estimation of Sodium present in soil/effluent sample using flame photometry
- C5. Determination of Chemical Oxygen Demand (COD) of industrial waste water sample

<u>D - Open Ended Experiments (any two):</u>

- D1: Evaluation of acid content in beverages by using pH sensors and simulation.
- D2. Construction of photovoltaic cell.
- D3. Design an experiment to Identify the presence of proteins in given sample.
- D4. Searching suitable PDB file and target for molecular docking

CIE Evaluation

Assessment Details both (CIE and SEE)

The weightage of continuous Internal Evaluation (CIE) is 50% and for the Semester End Examination (SEE) is 50%. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50). The minimum passing mark for SEE is 35% of maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. Student has to secure a minimum 40% (40 marks out of 100) in the total of the CIE and SEE together.

The CIE marks for the theory component of the **Integrated Course** (**IC**) shall be 25 marks and for the laboratory component 25 marks

CIE for the theory component of IC:

- 1. Three tests each of 50 marks, after the completion of the syllabus 40%, 70% and 100% respectively.
- 2. Average of best two internal assessment tests each of 50 marks, scale down to 30 marks.
- 3. Any two assessment methods as per regulations i.e. Two assignments / Two Quizzes/ Weekly test / project work for (20+20) marks, scaled down to 20 marks.
- 4. Total marks scored (30+20 = 50 marks) scaled down to 25.

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

CIE for the Practical component of IC:

- 1. On completion of every experiment / program in the laboratory, the students shall be evaluated and marks shall be awarded on the same day.
- 2. Each experiment is evaluated for 10 marks and scaled down to **5 marks**
- 3. Laboratory test at the end of the 15th week of the semester / after completion of all the experiments shall be conducted for **50 marks** and scaled down to **20 marks**.
- 4. Total marks scored for lab component: 05+20= 25 marks.
- 5. The minimum marks to be secured in CIE to appear for SEE shall be 10(40% of maximum marks 25) in the theory and 10(40% of Maximum marks 25) in the practical.
- 6. The laboratory component of the **integrated course** shall be CIE only. However, in SEE, the questions from the practical component shall be included.
- 7. The maximum of 05 questions is to be set from the practical component and the total marks of all questions should not be more than 25 marks.

Rajarajeswari College of Engineering (An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

		Semester I/II						
	Cor	nputer Aided Engineer	ing Drawing					
		Category: ESO	C					
		(Common to all bra	nches)					
		(Practical)						
Course Code	:	B24CEDK103/203	CIE	:	50 Marks			
Teaching Hours L: T: P : 2:0:2 SEE : 50 Marks								
Total Hours : 40 Total : 100 Marks								
Credits		03	SEE Duration	:	3 Hrs			

Cours	Course Objectives						
1	To understand the basic principles and conventions of engineering drawing						
2	To use drawing as a communication mode						
3	To generate pictorial views using CAD software						
4	To understand the development of surfaces						
5	To visualize engineering components						

Module - 1	No. of Hrs
Introduction: Significance of Engineering drawing, BIS Conventions of Engineering Drawing, Free hand sketching of engineering drawing, Scales. Introduction to Computer Aided Drafting Software, Co-ordinate system and reference planes HP, VP, RPP& LPP of 2D/3D environment. Selection of drawing sheet size and scale. Commands and creation of Lines, coordinate points, axes, polylines, square, rectangle, polygons, splines, circles, ellipse, text, move, copy, off-set, mirror, rotate, trim, extend, break,	
Crthographic Projections of Points, Lines and Planes: Introduction to Orthographic projections: Orthographic projections of points in all quadrants. Orthographic projections of lines (Placed in First quadrant only). Orthographic projections of planes similar to Triangle, Square, Rectangle, Pentagon, Hexagon, and Circular laminas (Placed in First Quadrant only using Change of Position Method).	8 Hrs
Module - 2	No. of Hrs
Orthographic Projection of Solids: Orthographic projection of right regular solids Prisms (Square, Pentagon, Hexagon) & Pyramids (Square, Pentagon, Hexagon), Cones, Cubes & Tetrahedron. (Only Solids Resting on HP using Change of Position Method)	8Hrs
Module - 3	No. of Hrs
Isometric Projections: Isometric scale, Isometric projection of hexahedron (cube), right regular prisms, pyramids, cylinders, cones and spheres. Isometric projection of combination of two and three simple solids. (Conversion of simple isometric drawings into orthographic views)	8 Hrs

Rajarajeswari College of Engineering (An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Module - 4	No. of Hrs
Development of Lateral Surfaces of Solids:	
Development of lateral surfaces of right regular prisms, cylinders, pyramids and cones	
resting with base on HP only. Problems on applications of development of lateral	8 Hrs
surfaces ex: Funnels	55
Development of lateral surfaces of their frustums and truncations.	
Module - 5	No. of Hrs
Multidisciplinary Applications & Practice using CAD software (For CIE Only): Free hand Sketching: True free hand, Guided Free hand, Roads, Buildings, Utensils, Hand tools & Furniture's etc. Drawing Simple Mechanisms: (Only for ME with allied branches) Bicycles, Tricycles, Gear trains, Ratchets, two-wheeler cart & Four-wheeler carts to dimensions etc. Electric Wiring and lighting diagrams: (Only for EEE with allied branches) Automatic fire alarm, Call bell system, UPS system, Basic power distribution system. Basic Building Drawing: (Only for Civil with allied branches) Architectural floor plan, basic foundation drawing, steel structures-frames, bridges, trusses. Flow charts drawings: (Only for CSE with allied branches) Types of flow charts like Process Flowchart, Workflow Diagram, Swimlane Flowchart, Data Flow Diagram, System Flowchart, and Decision Flowchart. Electronics Engineering Drawings: (Only for ECE with allied branches) Simple electronics circuit drawings, practice on layers concept.	8 Hrs

Course	Course Outcomes: At the end of the course, the students will be able to							
CO-1	Draw and communicate the objects with definite shape and dimensions.							
CO-2	Recognize and Draw the shape and size of objects through different views.							
CO-3	Develop the lateral surfaces of the object.							
CO-4	Create a Drawing views using CAD software.							
CO-5	Identify the interdisciplinary engineering components through its graphical representation.

CONTINUOUS INTERNAL EVALUATION (CIE)

Assessment Details (both CIE and SEE):

- 1) The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%.
- 2) The minimum passing mark for the CIE is 40% of the maximum marks (20 marks) and that for SEE minimum passing marks is 35% of the maximum marks (18 marks).
- 3) A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject / course if the student secures not less than 35% (18 Marks out of 50) in the Semester End Examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

Continuous Internal Evaluation (CIE)

- CIE shall be evaluated for Max. Marks of 100 and later the same shall be scaled-down to 50 marks as detailed below.
- CIE component should comprise of continuous evaluation of drawing work of students as and when the modules are covered based on below detailed weightage.
- IA Test- 3 covering all the modules is to be conducted for Max. Marks of 100 and evaluation to be based SEE pattern, and the same is to be scaled down to 15 marks.
- The final CIE = Class work marks + Test marks.

RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (CIE)

Particulars	Marks	Evaluation Weightage in marks	Reduced to	Total
IA-1	50	Best of Two Internals	10	
IA-2	50	Best of Two Internals	10	25
IA-3	50	Lab Mock Exam	15	
Sketch Book	20	Skatah Paok I Assignments		25
Assignments	5	Sketch Book + Assignments	-	25
			Total	50

Semester End Examination (SEE)

- 1) SEE shall be conducted and evaluated for maximum marks 100. Marks obtained shall be accounted for SEE final marks, reducing it by 50%
- 2) Question paper shall be set jointly by both Internal and External Examiner and made available for each batch as per schedule. **Questions are to be set preferably from Text Books.**
- 3) Related to Module-1: One full question can be set either from "points & lines" or "planes".
- 4) Evaluation shall be carried jointly by both the examiners.
- 5) Scheme of Evaluation: To be defined by the examiners jointly and the same shall be submitted to the university along with question paper.
- 6) One full question shall be set from each of the Module from Modules 1, 2, 3 and 4 as per the below table weightage details. However, the student may be awarded full marks, if he/she completes solution on

Rajarajeswari College of Engineering (An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Semester I/II							
Introduction to Electronics							
Category: ESC- I/II							
(Common to All Branches except ECE)							
		(Theory)					
Course Code	:	B24ESCK143/243	CIE	:	50 Marks		
Teaching Hours/Week (L:T:P: S)	:	3:0:0	SEE	:	50 Marks		
Total Hours : 40 Total : 100 Marks							
Credits	:	3	SEE Duration	:	3 Hrs		

Cou	rse Objectives
1	To Explain the operation of Semiconductor diode, Zener diode and their applications.
2	To Explain the Transistor operation and Different configurations, working and construction of
	FET and MOSFET.
3	To Explain the operation of linear Op-amps and its applications
4	To Explain the Basic Logic gates, circuits and their optimization.
5	To Explain the Principles of Communication system

Module - 1	No. of Hrs
Diode Applications - Load line analysis, series- diode configuration. Sinusoidal inputs - half wave rectification, Full wave Rectification, Zener diodes, voltage multiplier Circuits . T1: 2.2,2.3,2.6,2.7,2.11, 2.12	8
Module - 2	No. of Hrs
Bipolar junction transistor - Transistor operation, common base configuration, common emitter configuration, common collector configuration. Junction field effect transistor - construction and characteristics of JFET, Transfer Characteristics. MOSFET- Depletion type MOSFET, Enhancement type MOSFET T1: 3-3, 304, 305, 306, 6-2, 6-3, 6-7, 6-8	8
Module - 3	No. of Hrs
Operational amplifier –Operational amplifier basics, practical Op-Amp circuits, Op-Amp specification –DC offset parameter, frequency parameter, Differential and common mode operation. Practical Op-Amp circuits– Inverting amplifier, non-inverting amplifier, Unity follower, Summingamplifier, Integrator, Differentiator. T1:10.4, 10.5, 10.6, 10.7, 10.9	8
Module– 4	No. of Hrs
Boolean Algebra and Logic Circuits: Binary numbers, Number Base Conversion, octal &Hexa Decimal Numbers, Complements, Basic definitions, Axiomatic Definition of Boolean Algebra, Basic Theorems and Properties of Boolean Algebra, Boolean Functions, Canonical and Standard Forms, Other Logic Operations, Digital Logic Gates (Text 2: 1.2, 1.3, 1.4, 1.5,2.1, 2.2, 2.3, 2.4, 2.5, 2.6, 2.7) Combinational logic: Introduction, Design procedure, Adders- Half adder, Full adder (Text 2:4.1, 4.2, 4.3)	8
Module-5	No. of Hrs
Elements of a Communication system, Need for Modulation, Amplitude Modulation (Am) Techniques, Frequency Modulation, Phase modulation, Comparison of FM & PM, Comparison of FM and AM. T3: 1.2, 1.3, 3.2.1, 4.1.1, 4.1.2, 4.1.3, 4.2.6, 6.2.1, 6.2.2	8

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Course	Course Outcomes: At the end of the course, the students will be able to							
CO1	Develop the basic knowledge on construction and characteristics of semiconductor devices.							
CO2	Summarize the basic concept of small scale circuits using BJT,JFET,MOSFET scale circuits							
CO3	Apply the knowledge on various applications of operational amplifiers							
CO4	Understand the concepts of Boolean algebra and Logic circuits							
CO5	Illustrate the outline of Communication system.

CIE Evaluation

Assessment Details both (CIE and SEE)

The weightage of continuous Internal Evaluation (CIE) is 50% and for the Semester End Examination (SEE) is 50%. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50). The minimum passing mark for SEE is 35% of maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. Student has to secure a minimum 40% (40 marks out of 100) in the total of the CIE and SEE together.

CIE for the theory:

- 1. Three tests each of 50 marks, after the completion of the syllabus 40%, 70% and 100% respectively.
- 2. Average of best two internal assessment tests each of 50 marks, scale down to 30 marks.
- 3. Any two assessment methods as per regulations i.e. Two assignments / Two Quizzes/ Weekly test / project work for 40 marks, scaled down to 20 marks.
- 4. Total marks scored (30+20 = 50 marks).
- 5. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50).

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Theory								
IA Test	Exam conducted	Scaled down to	Average of best two	Total				
	for		tests

IA-3	50	30		30+10+10=50				
Two Assignments	2X10=20	10	10					
Two Quizzes	2X10=20	10	10					

Semester End Examination (SEE)

- 1. The question paper shall be set for 100 marks and duration of SEE is 3 hours.
- 2. The question paper will have two parts: Part –A and Part B
- 3. **Part A** should contain minimum **Two or Four** quiz questions from each module of 02 marks / 01 mark each. **Part A is Compulsory** and carries 20 Marks.
- 4. **Part B** contains two questions of 16 marks (with minimum of 3 sub questions) from each module with internal choice. Students should answer five full questions, selecting one full question from each module.
- 5. Students have to answer for 100 marks and marks scored out of 100 shall be proportionally reduced to 50 marks.
- 6. Question papers to be set as per the Blooms Taxonomy levels.

Semester I/II									
Introduction to Python Programming									
Category: PLC- I/II									
		(Common to All Br	anches)						
		(Integrated)							
Course Code	:	B24PLCK152/252	CIE	:	50 Marks				
Teaching Hours L:T:P	Teaching Hours L : T : P : 2:0:2 SEE : 50 Marks								
Total Hours : 50 Total : 100 Marks									
Credits 3 SEE Duration : 3 Hrs									

Course	Course Objectives						
1.	Learn the syntax and semantics of the Python programming language.						
2.							
3.	Apply various structuring the data using lists, tuples						
4.	Understand the need for working with various documents like Excel, PDF, Word and Others.						
5.	Understand the Object-Oriented Programming concepts in Python.						

Module - 1	No. of Hrs
Python Basics: The Python programming language, Program, Debugging, Variables, Expressions, and Statements, Entering expressions into the Interactive Shell, Your first program, Dissecting your program. Flow control: Boolean Values, Comparison Operators, Boolean Operators, Mixing Boolean and Comparison Operators, Elements of Flow Control, Program Execution, Flow Control Statements,	08
Importing Modules, Ending a Program Early with sys. exit (). Touthook 1. Chapters 1. 2. Touthook 2. Chapters 1.1.1.3. Chapter 2.1.2.10	
Textbook 1: Chapters 1 – 2 Textbook 2: Chapters 1.1-1.3, Chapter 2.1-2.10 Module - 2	No. of Hrs
Functions: def Statements with Parameters, Return Values, and return Statements, The None Value, Keyword Arguments, and print(), Local and Global Scope, the global Statement, Exception Handling, A Short Program: Guess the Number. Lists: The List Data Type, Working with Lists, Augmented Assignment Operators, Methods, Example Program: Magic 8 Ball with a List, List-like Types: Strings and Tuples, References. Textbook 1: Chapters 3, 4	08
Module - 3	No. of Hrs
Dictionaries and Structuring Data: The Dictionary Data Type, Pretty Printing, Using Data Structures to Model Real-World Things. Manipulating Strings: Working with Strings, Useful String Methods, Project: Password Locker. Textbook 1: Chapters 5, 6	08
Module - 4	No. of Hrs
Reading and Writing Files: Files and File Paths, The os.path Module, The File Reading/Writing Process, Saving Variables with the shelve Module, Saving Variables with the print.format() Function, Project: Generating Random Quiz Files, Project: Multi-clipboard. Working with Excel Spreadsheets: Installing the openpyxl Module, Reading Excel Documents, Writing Excel Documents.	08
Textbook 1: Chapters 8, 9 and 12	
Module - 5	No. of Hrs
Classes and objects: Programmer defined types, Attributes, Rectangles, Instances as return values, Objects are mutable, Copying,	

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Classes and functions: Time, Pure functions, Modifiers.

Classes and methods: Object-oriented features, Printing objects, Another example, A more complicated example, The init method, The str method, Operator overloading, Type-based dispatch, Polymorphism, Interface, and implementation.

Textbook 2: Chapters 15 – 17

Course	Course Outcomes: At the end of the course, the students will be able to							
CO1	Understand the fundamental programming constructs to solve basic computational problems.							
CO2	Learn the flow of execution and the need for debugging to rectify program bugs proficiently.							
CO3	Utilize the methods to create and manipulate the importance of data structures in problem-solving.							
CO4	Know the structured and modular code using appropriate Object-Oriented Programming paradigms.							
CO5	Apply the acquired skills to provide solutions to real-world problems.							

	Practical Component						
Sl. No.	Experiments for Conduction						
1.	a) Develop a program to read the student details like Name, USN, and Marks in three subjects. Display the student details, total marks, and percentages with suitable messages.						
	b) Develop a program to read the name and year of birth of a person. Display whether the person is a senior citizen or not.						
	a) Develop a program to generate Fibonacci sequence of length (N). Read N from the console.						
2.	b) Write a function to calculate the factorial of a number. Develop a program to compute binomial coefficient (Given N and R).						
3.	Read N numbers from the console and create a list. Develop a program to print mean, variance, and standard deviation with suitable messages.						
4.	Read a multi-digit number (as chars) from the console. Develop a program to print the frequency of each digit with a suitable message.						
	Develop a program to print the 10 most frequently appearing words in a text file.						
5.	[Hint: Use a dictionary with distinct words and their frequency of occurrences. Sort the dictionary in the reverse order offrequency and display the dictionary slice of the first 10 items]						
6.	Develop a program to sort the contents of a text file and write the sorted contents into a separate text file. [Hint: Use string methods $strip()$, $len()$, list methods $sort()$, $append()$, and file methods $open()$, $readlines()$, and $write()$].						
	Implement a Python program to perform the following operations on an Excel spreadsheet:						
	Reading the first 5 rows of all columns						
7.	Appending a new row / new column						
	Delete row/column						
	To perform aggregate functions						
8.	Write a function named DivExp which takes TWO parameters a, b and returns the value of c, where						

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

	c=a/b. Write suitable assertion for $a>0$ in function $DivExp$ and raise an exception for when $b=0$. Develop a suitable program which reads two values from the console and calls a function $DivExp$.
9.	Define a function which takes TWO objects representing complex numbers and returns new complex number with an addition of two complex numbers. Define a suitable class 'Complex' to represent the complex number. Develop a program to read $N(N \ge 2)$ complex numbers and to compute the addition of N complex numbers.
10.	Develop a program that uses class Student which prompts the user to enter marks in three subjects and calculates total marks, percentage and displays the score card details. [Hint: Use list to store the marks in three subjects and total marks. Use <code>_init_()</code> method to initialize name, USN and the lists to store marks and total, Use <code>getMarks()</code> method to read marks into the list, and <code>display()</code> method to display the score card details.]

CIE Evaluation

Assessment Details both (CIE and SEE)

The weightage of continuous Internal Evaluation (CIE) is 50% and for the Semester End Examination (SEE) is 50%. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50). The minimum passing mark for SEE is 35% of maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. Student has to secure a minimum 40% (40 marks out of 100) in the total of the CIE and SEE together.

The CIE marks for the theory component of the **Integrated Course** (**IC**) shall be 25 marks and for the laboratory component 25 marks

CIE for the theory component of IC:

- 1. Three tests each of 50 marks, after the completion of the syllabus 40%, 70% and 100% respectively.
- 2. Average of best two internal assessment tests each of 50 marks, scale down to 30 marks.
- 3. Any two assessment methods as per regulations i.e. Two assignments / Two Quizzes/ Weekly test / project work for (20+20) marks, scaled down to 20 marks.
- 4. Total marks scored (30+20 = 50 marks) scaled down to 25.

CIE for the Practical component of IC:

- 1. On completion of every experiment / program in the laboratory, the students shall be evaluated and marks shall be awarded on the same day.
- 2. Each experiment is evaluated for 10 marks and scaled down to 5 marks
- **3.** Laboratory test at the end of the 15th week of the semester / after completion of all the experiments shall be conducted for **50 marks** and scaled down to **20 marks**.
- 4. Total marks scored for lab component: 05+20= 25 marks.
- 5. The minimum marks to be secured in CIE to appear for SEE shall be 10(40% of maximum marks 25) in the theory and 10(40% of Maximum marks 25) in the practical.
- 6. The laboratory component of the **integrated course** shall be CIE only. However, in SEE, the questions from the practical component shall be included.
- 7. The maximum of 05 questions is to be set from the practical component and the total marks of all questions should not be more than 25 marks.

Theory								
IA Test	Exam conducted	Scaled down to	Average of best two	Total				
	for		tests

Internal Test + Viva	Exam conducted for	Scaled down to 20						
voce	50 Marks	marks						

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Semester End Examination (SEE)

- 1. The question paper shall be set for 100 marks and duration of SEE is 3 hours.
- 2. The question paper will have two parts: Part –A and Part B
- 3. **Part A** should contain minimum **Two or Four** quiz questions from each module of 02 marks / 01 mark each. **Part A is Compulsory** and carries 20 Marks.
- 4. **Part B** contains two questions of 16 marks (with minimum of 3 sub questions) from each module with internal choice. Students should answer five full questions, selecting one full question from each module.
- 5. Students have to answer for 100 marks and marks scored out of 100 shall be proportionally reduced to 50 marks.
- 6. Question papers to be set as per the Blooms Taxonomy levels.

UG (B.E) Syllabus 2024-25

I Semester – Chemistry Cycle

Robotics and Automation (R & A)

Rajarajeswari College of Engineering (An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

SEMESTER I								
Mathematics-I for ME								
Course Code : B24MAME101 CIE : 50 Marks								
Teaching Hours L: T:P : 2:2:2 SEE : 50 Marks								
Total Hours : 50 Hours Total : 100 Marks								
Credits	:	4	SEE Duration	:	3Hrs			

	Course Objectives						
1	Develop the knowledge of Linear Algebra referring to matrices.						
2	Understand the angle of intersection between two curves and the condition for orthogonal curves						
3	Familiarize the importance of calculus associated with one variable and multivariable						
4	Develop the knowledge of solving differential equations and their applications in engineering.						
5	Analyze engineering problems applying Ordinary Differential Equations.						

Module-1:Linear Algebra	10hrs.
Elementary row transformation of a matrix, Rank of a matrix. Consistency and solution of a system of	
linear equations - Gauss-elimination method, Gauss-Jordan method and approximate solution by Gauss-	
Seidel method. Eigen values and Eigenvectors, Rayleigh's power method to find the dominant Eigen value	
and Eigenvector.	
Self-Study: Solution of a system of equations by Gauss-Jacobi iterative method. Inverse of a square matrix	
by Cayley- Hamilton theorem.	
Applications of Linear Algebra: Network Analysis, Balancing equations.	
Module-2:Polar curves	10hrs.
Introduction to polar coordinates, Polar curves, Angle between radius vector and tangent, angle between	
two polar curves, Pedal equation. Curvature and Radius of Curvature- Cartesian, Parametric, Polar and	
Pedal forms (Proof only for Cartesian and Polar Forms). Taylor's and Maclaurin's series expansion for one	
variable (Statement only) – problems.	
Self-study: Center and circle of curvature, evolutes and involutes.	
Applications: Applied Mechanics, Strength of Materials, Elasticity.	
Module-3:Partial Derivatives	10hrs.
Indeterminate forms – L-Hospital's rule, Problems. Partial differentiation, Total derivative - differentiation	
of composite functions. Jacobian and problems. Maxima and minima for a function of two variables-	
Problems.	
Self-study: Euler's theorem and problems. Method of Lagrange's undetermined multipliers with a single	
constraint.	
Applications: Computation of stress and strain, Errors and approximations in manufacturing process,	
Estimating the critical points and extreme values, vector calculus.	
Module-4: Ordinary Differential Equations (ODEs) of First Order	10hrs.
Linear and Bernoulli's differential equations. Exact and reducible to exact differential equations Integrating	
factors on $\frac{1}{N} \left(\frac{\partial M}{\partial y} - \frac{\partial N}{\partial x} \right)$ and $\frac{1}{M} \left(\frac{\partial N}{\partial x} - \frac{\partial M}{\partial y} \right)$. Orthogonal trajectories, Newton's law of cooling. Non-linear	
differential equations: Introduction to general and singular solutions, solvable for p only, Clairaut's	
equations, Reducible to Clairaut's equations - Problems.	
Self-Study: Applications of ODEs: L-R circuits. Solvable for x and y.	
Applications: Rate of Growth or Decay, Conduction of heat.	
Module-5:Ordinary Differential Equations of Higher Order	10hrs.
Higher-order linear ODEs with constant coefficients-Inverse differential operator,	
$X = ke^{ax}$, $ksin(ax + b)$ or $kcos(ax + b)$ and X is a Polynomial, Method of variation of parameters,	
Cauchy's and Legendre differential equations - Problems.	
Self-Study: Formulation and solution of oscillations of a spring. Finding the solution by the method of	
undetermined coefficients.	
Applications: Applications to oscillations of a spring, Mechanical systems and Transmission lines.	

Rajarajeswari College of Engineering (An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

List of Laboratory experiments (2hours/week per batch) 10 lab sessions+1 repetition class+1Lab Assessment

1	2D plots for Cartesian and polar curves
2	Finding angle between polar curves, curvature and radius of curvature of a given curve
3	Finding partial derivatives and Jacobian
4	Applications to Maxima and Minima of two variables
5	Solution of first-order ordinary differential equation and plotting the solution curves
6	Solutions of Second-order ordinary differential equations with initial / boundary conditions
7	Solution of differential equation of oscillations of spring with various load
8	Numerical solution of system of linear equations, test for consistency and graphical
	representation
9	Solution of system of linear equations using Gauss-Seidel iteration
10	Compute Eigen values and Eigen vectors and find the largest and smallest Eigen value by
	Rayleigh power method.

Suggested software's: Mathematica/Matlab/Python/Scilab

Course Outcomes: At the end of the course, the students will be able to	
CO1 Test the consistency of a system of linear equations and to solve them by direct and iterative methods	
CO2 Apply the knowledge of calculus to solve problems related to polar curves and its applications in	
Determining the bentness of a curve.	
CO3 Learn the notion of partial differentiation to calculate rate of change of multivariate functions and so	lve
problems related to composite functions and Jacobian.	
CO4 Understand that physical systems can be described by Differential equations and solve such equations.	
CO5 Analyze the solution of linear and non-linear Differential equations

CIE Evaluation

Assessment Details both (CIE and SEE)

The weightage of continuous Internal Evaluation (CIE) is 50% and for the Semester End Examination (SEE) is 50%. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50). The minimum passing mark for SEE is 35% of maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. Student has to secure a minimum 40% (40 marks out of 100) in the total of the CIE and SEE together.

The CIE marks for the theory component of the **Integrated Course (IC)** shall be 25 marks and for the laboratory component 25 marks

CIE for the theory component of **IC**:

- 1. Three tests each of 50 marks, after the completion of the syllabus 40%, 70% and 100% respectively.
- 2. Average of best two internal assessment tests each of 50 marks, scale down to 30 marks.
- **3.** Any two assessment methods as per regulations i.e. Two assignments / Two Quizzes/ Weekly test / project work for (20+20) marks, scaled down to 20 marks.
- **4.** Total marks scored (30+20 = 50 marks) scaled down to **25**.

CIE for the Practical component of IC:

- 1. On completion of every experiment / program in the laboratory, the students shall be evaluated and marks shall be awarded on the same day.
- 2. Each experiment is evaluated for 10 marks and scaled down to **5 marks**
- **3.** Laboratory test at the end of the 15th week of the semester / after completion of all the experiments shall be conducted for **50 marks** and scaled down to **20 marks**.
- 4. Total marks scored for lab component: 05+20= 25 marks.
- 5. The minimum marks to be secured in CIE to appear for SEE shall be 10(40% of maximum marks 25) in the theory and 10(40% of Maximum marks 25) in the practical.
- 6. The laboratory component of the **integrated course** shall be CIE only. However, in SEE, the questions from the practical component shall be included.
- 7. The maximum of 05 questions is to be set from the practical component and the total marks of all questions should not be more than 25 marks.

Theory								
IA Test	Total							
	for		tests

SEMESTER I/II							
Applied Chemistry for ME							
		Category: AS	C				
	St	ream: ME (Common to M.	E & RA branch)				
		(Integrated)					
Course Code	:	B24CHME102/202	CIE	:	50 Marks		
Teaching Hours L : T : P	Teaching Hours L : T : P : 2:2:2 SEE : 50 Marks						
Total Hours : 50 Total : 100 Marks							
Credits		4	SEE Duration		3 Hrs		

Course Objectives

- To impart the knowledge of Chemistry involved in Electrochemical cells,
- Corrosion and its control; Conventional, electrochemical and renewable sources of energy
- Polymers; memory and display systems; Water treatment; sensors; e-waste management;
- Nanomaterials and Instrumental methods of analysis

Module – 1 Electrochemistry: Electrode Systems and Corrosion	No.of Hrs
ELECTRODES AND CELLS – Introduction- Classification of cells - primary, secondary and concentration cells; Reference electrodes - Calomel electrode; Ion-selective electrodes - Glass electrode. Determination of pH using glass electrode, numerical on concentration cells. CORROSION - Definition, Electrochemical theory of corrosion, Types of corrosion - differential metal, differential aeration; Corrosion Penetration Rate (CPR), numerical. Corrosion control: Metal coating-Galvanization, Inorganic coatings – anodizing. Cathodic protection – Sacrificial anode, Metal finishing - Introduction, technological importance; Electroless plating: Introduction, Electroless plating of copper (PCB).	8
Module – 2	No.of Hrs
Energy: Sources, Conversion and Storage	110.01 1115
Chemical fuels: Introduction, Calorific value - definition, gross and net calorific values; Determination of calorific value of a solid / liquid fuel using Bomb calorimeter and numerical on calorific value; Petroleum cracking - fluidized bed catalytic cracking; Octane number. Sustainable energy sources: Hydrogen as a fuel - advantages, production and storage.Production of Biodiesel. Solar cells - Construction and working of Si based PV cell, advantages. Quantum Dot Sensitized Solar Cells (QDSSC's) - Principle, Properties and Applications. Electrochemical Energy Systems: Introduction to batteries, Classification of batteries - primary and secondary batteries; construction, working and applications of Lithium ion batteries.	8
Module – 3 Polymers for Engineering Applications	No.of Hrs
Polymers - Introduction, Molecular weight - number average and weight average molecular weight, Polydispersion index, numerical problems;; Plastics - Definition of resins and plastics; Synthesis, properties and applications of PMMA; Elastomers - Synthesis, properties and application of butyl rubber; Adhesives : Synthesis, properties and applications of epoxy resin. Polymer composites - Composites as structural material; Synthesis and applications of Kevlar; Biodegradable polymers - Introduction, Lactic acid - synthesis, uses.	8
Module – 4	No.of Hrs
Materials for Engineering Applications	110.01 1115
 Alloys: Introduction, classification, composition, properties and applications of stainless steel, solders, brass, alnico. Ceramics: Introduction, classification based on chemical composition, properties and applications of perovskites. Lubricants: Introduction, classification, properties and applications of lubricants. 	8

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Nanomaterials : Introduction, Synthesis of nanomaterials: top-down and bottom-up approaches; Synthesis by sol-gel, Precipitation methods. Carbon Nanotumes, Graphene properties and applications.	
Module – 5	No of Has
Phase equilibria, Water Treatment and Analytical Techniques	No.of Hrs
Phase equilibria – Gibbs phase rule; Concept of Phase component, degrees of freedom with	
examples; Application of Phase rule to (i) one component system - water system; (ii) two	
component system - Pb-Ag system, Water treatment - Introduction, hardness of water, types,	
determination of hardness by EDTA method, Desalination of water – Electrodialysis. BOD and	8
COD - introduction and their significance in waste water treatment, experimental determination	
of COD of waste water - numerical on COD. Analytical Techniques - Instrumentation and	
applications of Potentiometry, Conductometry (Acid Mixtures)	

Course	Outcomes: At the end of the course, the students will be able to
CO1	Understand and apply the principles of chemistry involved in water treatment, corrosion, energy sources,
	polymers, nanomaterials, phase equilibria, alloys, ceramics and instrumental methods of analysis.
CO2	Analyse the Engineering problems and draw meaningful inferences through applied chemistry.
CO3	Implement sustainable solutions through concepts of Applied Chemistry in the field of Materials, Energy
	and Environment
CO4	Engage in self-study and make an effective oral presentation on contribution of Chemistry to society
CO5	Apply the knowledge of chemistry to investigate engineering materials by volumetric and instrumental
	methods and analyze, interpret the data to assess and address the issues of Environmental Pollution

PRACTICAL MODULE

A – Demonstration (any two) offline/virtual:

- A1. Synthesis of polyurethane
- A2. Determination of strength of an acid in Pb-acid battery
- A3. Synthesis of iron oxide nanoparticles
- A4. Electroplating of copper on metallic objects

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

<u>B - Exercise (compulsorily any 4 to be conducted):</u>

- B1. Conductometric estimation of acid mixture
- B2. Potentiometric estimation of FAS using K2Cr2O7
- B3. Determination of pKa of vinegar using pH sensor (Glass electrode)
- B4. Determination of rate of corrosion of mild steel by weight loss method
- B5.Estimation of total hardness of water by EDTA method

<u>C – Structured Enquiry (compulsorily any 4 to be conducted):</u>

- C1. Estimation of Copper present in electroplating effluent by optical sensor (colorimetry)
- C2. Determination of Viscosity coefficient of lubricant (Ostwald's viscometer)
- C3. Estimation of iron in TMT bar by diphenyl amine/external indicator method
- C4. Estimation of Sodium present in soil/effluent sample using flame photometry
- C5. Determination of Chemical Oxygen Demand(COD) of industrial waste water sample

D – Open Ended Experiments (any two)

- D1. Estimation of metal in e-waste by optical sensors
- D2. Electroless plating of Nickle on Copper
- D3. Determination of glucose by electrochemical sensors
- D4. Synthesis of polyaniline and its conductivity measurement

CIE Evaluation

Assessment Details both (CIE and SEE)

The weightage of continuous Internal Evaluation (CIE) is 50% and for the Semester End Examination (SEE) is 50%. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50). The minimum passing mark for SEE is 35% of maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. Student has to secure a minimum 40% (40 marks out of 100) in the total of the CIE and SEE together.

The CIE marks for the theory component of the **Integrated Course** (**IC**) shall be 25 marks and for the laboratory component 25 marks

CIE for the theory component of IC:

- 1. Three tests each of 50 marks, after the completion of the syllabus 40%, 70% and 100% respectively.
- 2. Average of best two internal assessment tests each of 50 marks, scale down to 30 marks.
- 3. Any two assessment methods as per regulations i.e. Two assignments / Two Quizzes/ Weekly test / project work for (20+20) marks, scaled down to 20 marks.
- 4. Total marks scored (30+20 = 50 marks) scaled down to 25.

CIE for the Practical component of IC:

- 1. On completion of every experiment / program in the laboratory, the students shall be evaluated and marks shall be awarded on the same day.
- 2. Each experiment is evaluated for 10 marks and scaled down to 5 marks

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

- 3. Laboratory test at the end of the 15th week of the semester / after completion of all the experiments shall be conducted for **50 marks** and scaled down to **20 marks**.
- 4. Total marks scored for lab component: 05+20= 25 marks.
- 5. The minimum marks to be secured in CIE to appear for SEE shall be 10(40% of maximum marks 25) in the theory and 10(40% of Maximum marks 25) in the practical.
- 6. The laboratory component of the **integrated course** shall be CIE only. However, in SEE, the questions from the practical component shall be included.
- 7. The maximum of 05 questions is to be set from the practical component and the total marks of all questions should not be more than 25 marks.

Computer Aided Engineering Drawing						
		Category: ESO	C			
		(Common to all bra	nches)			
		(Practical)				
Course Code	:	B24CEDK103/203	CIE	:	50 Marks	
Teaching Hours L: T: P : 2:0:2 SEE : 50 Marks				50 Marks		
Total Hours : 40 Total : 100 Marks						
Credits 03 SEE Duration : 3 Hrs				3 Hrs		

Cours	Course Objectives					
1	To understand the basic principles and conventions of engineering drawing					
2	To use drawing as a communication mode					
3	To generate pictorial views using CAD software					
4	To understand the development of surfaces					
5	To visualize engineering components					

Module - 1	No. of Hrs
Introduction: Significance of Engineering drawing, BIS Conventions of Engineering Drawing, Free hand sketching of engineering drawing, Scales. Introduction to Computer Aided Drafting Software, Co-ordinate system and reference planes HP, VP, RPP& LPP of 2D/3D environment. Selection of drawing sheet size and scale. Commands and creation of Lines, coordinate points, axes, polylines, square, rectangle, polygons, splines, circles, ellipse, text, move, copy, off-set, mirror, rotate, trim, extend, break,	
Crthographic Projections of Points, Lines and Planes: Introduction to Orthographic projections: Orthographic projections of points in all quadrants. Orthographic projections of lines (Placed in First quadrant only). Orthographic projections of planes similar to Triangle, Square, Rectangle, Pentagon, Hexagon, and Circular laminas (Placed in First Quadrant only using Change of Position Method).	8 Hrs
Module - 2	No. of Hrs
Orthographic Projection of Solids: Orthographic projection of right regular solids Prisms (Square, Pentagon, Hexagon) & Pyramids (Square, Pentagon, Hexagon), Cones, Cubes & Tetrahedron. (Only Solids Resting on HP using Change of Position Method)	8Hrs
Module - 3	No. of Hrs
Isometric Projections: Isometric scale, Isometric projection of hexahedron (cube), right regular prisms, pyramids, cylinders, cones and spheres. Isometric projection of combination of two and three simple solids. (Conversion of simple isometric drawings into orthographic views)	8 Hrs

Rajarajeswari College of Engineering (An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Module - 4	No. of Hrs
Development of Lateral Surfaces of Solids:	
Development of lateral surfaces of right regular prisms, cylinders, pyramids and cones	
resting with base on HP only. Problems on applications of development of lateral	8 Hrs
surfaces ex: Funnels	55
Development of lateral surfaces of their frustums and truncations.	
Module - 5	No. of Hrs
Multidisciplinary Applications & Practice using CAD software (For CIE Only): Free hand Sketching: True free hand, Guided Free hand, Roads, Buildings, Utensils, Hand tools & Furniture's etc. Drawing Simple Mechanisms: (Only for ME with allied branches) Bicycles, Tricycles, Gear trains, Ratchets, two-wheeler cart & Four-wheeler carts to dimensions etc. Electric Wiring and lighting diagrams: (Only for EEE with allied branches) Automatic fire alarm, Call bell system, UPS system, Basic power distribution system. Basic Building Drawing: (Only for Civil with allied branches) Architectural floor plan, basic foundation drawing, steel structures-frames, bridges, trusses. Flow charts drawings: (Only for CSE with allied branches) Types of flow charts like Process Flowchart, Workflow Diagram, Swimlane Flowchart, Data Flow Diagram, System Flowchart, and Decision Flowchart. Electronics Engineering Drawings: (Only for ECE with allied branches) Simple electronics circuit drawings, practice on layers concept.	8 Hrs

Course	Course Outcomes: At the end of the course, the students will be able to					
CO-1	Draw and communicate the objects with definite shape and dimensions.					
CO-2	Recognize and Draw the shape and size of objects through different views.					
CO-3	Develop the lateral surfaces of the object.					
CO-4	Create a Drawing views using CAD software.					
CO-5	Identify the interdisciplinary engineering components through its graphical representation.

CONTINUOUS INTERNAL EVALUATION (CIE)

Assessment Details (both CIE and SEE):

- 1) The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%.
- 2) The minimum passing mark for the CIE is 40% of the maximum marks (20 marks) and that for SEE minimum passing marks is 35% of the maximum marks (18 marks).
- 3) A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject / course if the student secures not less than 35% (18 Marks out of 50) in the Semester End Examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

Continuous Internal Evaluation (CIE)

- CIE shall be evaluated for Max. Marks of 100 and later the same shall be scaled-down to 50 marks as detailed
- CIE component should comprise of continuous evaluation of drawing work of students as and when the modules are covered based on below detailed weightage.
- IA Test- 3 covering all the modules is to be conducted for Max. Marks of 100 and evaluation to be based SEE pattern, and the same is to be scaled down to 15 marks.

RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (CIE)

The final CIE = Class work marks + Test marks.

Evaluation Weightage in Particulars Marks Reduced to Total

		marks				
IA-1	50	Best of Two Internals	10			
IA-2	50	Best of Two Internals		25		
IA-3	50	Lab Mock Exam	15			
Sketch Book	20	Skatah Book + Assignments		25		
Assignments	5	Sketch Book + Assignments	-	25		
			Total	50		

Semester End Examination (SEE)

- 1) SEE shall be conducted and evaluated for maximum marks 100. Marks obtained shall be accounted for SEE final marks, reducing it by 50%
- 2) Question paper shall be set jointly by both Internal and External Examiner and made available for each batch as per schedule. Questions are to be set preferably from Text Books.
- 3) Related to Module-1: One full question can be set either from "points & lines" or "planes".
- 4) Evaluation shall be carried jointly by both the examiners.
- 5) Scheme of Evaluation: To be defined by the examiners jointly and the same shall be submitted to the university along with question paper.
- 6) One full question shall be set from each of the Module from Modules 1, 2, 3 and 4 as per the below table weightage details. However, the student may be awarded full marks, if he/she completes solution on

Rajarajeswari College of Engineering (An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Semester I/II							
		Introduction to Electro	onics				
		Category: ESC- I/II					
	(Co	ommon to All Branches e	xcept ECE)				
		(Theory)					
Course Code	:	B24ESCK143/243	CIE	:	50 Marks		
Teaching Hours/Week (L:T:P: S)	:	3:0:0	SEE	:	50 Marks		
Total Hours : 40 Total : 100 Marks							
Credits	:	3	SEE Duration	:	3 Hrs		

Cours	se Objectives
1	To Explain the operation of Semiconductor diode, Zener diode and their applications.
2	To Explain the Transistor operation and Different configurations, working and construction of
	FET and MOSFET.
3	To Explain the operation of linear Op-amps and its applications
4	To Explain the Basic Logic gates, circuits and their optimization.
5	To Explain the Principles of Communication system

Module - 1	No. of Hrs
Diode Applications - Load line analysis, series- diode configuration. Sinusoidal inputs - half wave rectification, Full wave Rectification, Zener diodes, voltage multiplier Circuits . T1: 2.2,2.3,2.6,2.7,2.11, 2.12	8
Module - 2	No. of Hrs
Bipolar junction transistor - Transistor operation, common base configuration, common emitter configuration, common collector configuration. Junction field effect transistor - construction and characteristics of JFET, Transfer Characteristics. MOSFET- Depletion type MOSFET, Enhancement type MOSFET T1: 3-3, 304, 305, 306, 6-2, 6-3, 6-7, 6-8	8
Module - 3	No. of Hrs
Operational amplifier –Operational amplifier basics, practical Op-Amp circuits, Op-Amp specification –DC offset parameter, frequency parameter, Differential and common mode operation. Practical Op-Amp circuits– Inverting amplifier, non-inverting amplifier, Unity follower, Summingamplifier, Integrator, Differentiator. T1:10.4, 10.5, 10.6, 10.7, 10.9	8
Module– 4	No. of Hrs
Boolean Algebra and Logic Circuits: Binary numbers, Number Base Conversion, octal &Hexa Decimal Numbers, Complements, Basic definitions, Axiomatic Definition of Boolean Algebra, Basic Theorems and Properties of Boolean Algebra, Boolean Functions, Canonical and Standard Forms, Other Logic Operations, Digital Logic Gates (Text 2: 1.2, 1.3, 1.4, 1.5,2.1, 2.2, 2.3, 2.4, 2.5, 2.6, 2.7) Combinational logic: Introduction, Design procedure, Adders- Half adder, Full adder (Text 2:4.1, 4.2, 4.3)	8
Module– 5	No. of Hrs
Elements of a Communication system, Need for Modulation, Amplitude Modulation (Am) Techniques, Frequency Modulation, Phase modulation, Comparison of FM & PM, Comparison of FM and AM. T3: 1.2, 1.3, 3.2.1, 4.1.1, 4.1.2, 4.1.3, 4.2.6, 6.2.1, 6.2.2	8

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Course	Course Outcomes: At the end of the course, the students will be able to				
CO1	Develop the basic knowledge on construction and characteristics of semiconductor devices.				
CO2	Summarize the basic concept of small scale circuits using BJT,JFET,MOSFET scale circuits				
CO3	Apply the knowledge on various applications of operational amplifiers				
CO4	Understand the concepts of Boolean algebra and Logic circuits				
CO5	Illustrate the outline of Communication system.

CIE Evaluation

Assessment Details both (CIE and SEE)

The weightage of continuous Internal Evaluation (CIE) is 50% and for the Semester End Examination (SEE) is 50%. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50). The minimum passing mark for SEE is 35% of maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. Student has to secure a minimum 40% (40 marks out of 100) in the total of the CIE and SEE together.

CIE for the theory:

- 1. Three tests each of 50 marks, after the completion of the syllabus 40%, 70% and 100% respectively.
- 2. Average of best two internal assessment tests each of 50 marks, scale down to 30 marks.
- 3. Any two assessment methods as per regulations i.e. Two assignments / Two Quizzes/ Weekly test / project work for 40 marks, scaled down to 20 marks.
- 4. Total marks scored (30+20 = 50 marks).
- 5. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50).

IA-3	50	30		30+10+10=50			
Two Assignments	2X10=20	10	10				
Two Quizzes	2X10=20	10	10				

Semester End Examination (SEE)

- 1. The question paper shall be set for 100 marks and duration of SEE is 3 hours.
- 2. The question paper will have two parts: Part –A and Part B
- 3. **Part A** should contain minimum **Two or Four** quiz questions from each module of 02 marks / 01 mark each. **Part A is Compulsory** and carries 20 Marks.
- 4. **Part B** contains two questions of 16 marks (with minimum of 3 sub questions) from each module with internal choice. Students should answer five full questions, selecting one full question from each module.
- 5. Students have to answer for 100 marks and marks scored out of 100 shall be proportionally reduced to 50 marks.
- 6. Question papers to be set as per the Blooms Taxonomy levels.

Semester I/II									
Introduction to Python Programming									
Category: PLC- I/II									
		(Common to All Br	anches)						
		(Integrated)							
Course Code	Course Code : B24PLCK152/252 CIE : 50 Marks								
Teaching Hours L : T : P	Teaching Hours L: T: P : 2:0:2 SEE : 50 Marks								
Total Hours : 50 Total : 100 Marks									
Credits		3	SEE Duration	:	3 Hrs				

Course	e Objectives								
1.	Learn the syntax and semantics of the Python programming language.								
2.	Readily use the Python functions to facilitate code reuse and manipulate strings.								
3.	Apply various structuring the data using lists, tuples								
4.	Understand the need for working with various documents like Excel, PDF, Word and Others.								
5.	Understand the Object-Oriented Programming concepts in Python.								

Module - 1	No. of Hrs
Python Basics: The Python programming language, Program, Debugging, Variables, Expressions, and Statements, Entering expressions into the Interactive Shell, Your first program, Dissecting	08
your program. Flow control: Boolean Values, Comparison Operators, Boolean Operators, Mixing Boolean and Comparison Operators, Elements of Flow Control, Program Execution, Flow Control Statements, Importing Modules, Ending a Program Early with sys. exit ().	
Textbook 1: Chapters 1 – 2 Textbook 2: Chapters 1.1-1.3, Chapter 2.1-2.10	
Module - 2	No. of Hrs
Functions: def Statements with Parameters, Return Values, and return Statements, The None Value, Keyword Arguments, and print(), Local and Global Scope, the global Statement, Exception Handling, A Short Program: Guess the Number. Lists: The List Data Type, Working with Lists, Augmented Assignment Operators, Methods, Example Program: Magic 8 Ball with a List, List-like Types: Strings and Tuples, References. Textbook 1: Chapters 3, 4	08
Module - 3	No. of Hrs
Dictionaries and Structuring Data: The Dictionary Data Type, Pretty Printing, Using Data Structures to Model Real-World Things. Manipulating Strings: Working with Strings, Useful String Methods, Project: Password Locker. Touth or let 1. Chapters 5.	08
Textbook 1: Chapters 5, 6	N C. II
Module - 4 Reading and Writing Files: Files and File Paths, The os.path Module, The File Reading/Writing Process, Saving Variables with the shelve Module, Saving Variables with the print.format() Function, Project: Generating Random Quiz Files, Project: Multi-clipboard. Working with Excel Spreadsheets: Installing the openpyxl Module, Reading Excel Documents, Writing Excel Documents.	No. of Hrs 08
Textbook 1: Chapters 8, 9 and 12	
Module - 5	No. of Hrs

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Classes and functions: Time, Pure functions, Modifiers.

Classes and methods: Object-oriented features, Printing objects, Another example, A more complicated example, The init method, The str method, Operator overloading, Type-based dispatch, Polymorphism, Interface, and implementation.

Textbook 2: Chapters 15 – 17

Course	Course Outcomes: At the end of the course, the students will be able to									
CO1	Understand the fundamental programming constructs to solve basic computational problems.									
CO2	Learn the flow of execution and the need for debugging to rectify program bugs proficiently.									
CO3	Utilize the methods to create and manipulate the importance of data structures in problem-solving.									
CO4	Know the structured and modular code using appropriate Object-Oriented Programming paradigms.									
CO5	Apply the acquired skills to provide solutions to real-world problems.									

	Practical Component								
Sl. No.	Experiments for Conduction								
1.	a) Develop a program to read the student details like Name, USN, and Marks in three subjects. Display the student details, total marks, and percentages with suitable messages.b) Develop a program to read the name and year of birth of a person. Display whether the person is a senior citizen or not.								
2.	a) Develop a program to generate Fibonacci sequence of length (N). Read N from the console.b) Write a function to calculate the factorial of a number. Develop a program to compute binomial coefficient (Given N and R).								
3.	Read N numbers from the console and create a list. Develop a program to print mean, variance, and standard deviation with suitable messages.								
4.	Read a multi-digit number (as chars) from the console. Develop a program to print the frequency of each digit with a suitable message.								
5.	Develop a program to print the 10 most frequently appearing words in a text file. [Hint: Use a dictionary with distinct words and their frequency of occurrences. Sort the dictionary in the reverse order offrequency and display the dictionary slice of the first 10 items]								
6.	Develop a program to sort the contents of a text file and write the sorted contents into a separate text file. [Hint: Use string methods $strip()$, $len()$, list methods $sort()$, $append()$, and file methods $open()$, $readlines()$, and $write()$].								
7.	Implement a Python program to perform the following operations on an Excel spreadsheet: • Reading the first 5 rows of all columns • Appending a new row / new column • Delete row/column • To perform aggregate functions								
8.	Write a function named DivExp which takes TWO parameters a, b and returns the value of c, where								

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

	c=a/b. Write suitable assertion for $a>0$ in function $DivExp$ and raise an exception for when $b=0$. Develop a suitable program which reads two values from the console and calls a function $DivExp$.
9.	Define a function which takes TWO objects representing complex numbers and returns new complex number with an addition of two complex numbers. Define a suitable class 'Complex' to represent the complex number. Develop a program to read $N(N \ge 2)$ complex numbers and to compute the addition of N complex numbers.
10.	Develop a program that uses class Student which prompts the user to enter marks in three subjects and calculates total marks, percentage and displays the score card details. [Hint: Use list to store the marks in three subjects and total marks. Use <code>_init_()</code> method to initialize name, USN and the lists to store marks and total, Use <code>getMarks()</code> method to read marks into the list, and <code>display()</code> method to display the score card details.]

CIE Evaluation

Assessment Details both (CIE and SEE)

The weightage of continuous Internal Evaluation (CIE) is 50% and for the Semester End Examination (SEE) is 50%. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50). The minimum passing mark for SEE is 35% of maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. Student has to secure a minimum 40% (40 marks out of 100) in the total of the CIE and SEE together.

The CIE marks for the theory component of the **Integrated Course** (**IC**) shall be 25 marks and for the laboratory component 25 marks

CIE for the theory component of IC:

- 1. Three tests each of 50 marks, after the completion of the syllabus 40%, 70% and 100% respectively.
- 2. Average of best two internal assessment tests each of 50 marks, scale down to 30 marks.
- 3. Any two assessment methods as per regulations i.e. Two assignments / Two Quizzes/ Weekly test / project work for (20+20) marks, scaled down to 20 marks.
- 4. Total marks scored (30+20 = 50 marks) scaled down to 25.

CIE for the Practical component of IC:

- 1. On completion of every experiment / program in the laboratory, the students shall be evaluated and marks shall be awarded on the same day.
- 2. Each experiment is evaluated for 10 marks and scaled down to 5 marks
- **3.** Laboratory test at the end of the 15th week of the semester / after completion of all the experiments shall be conducted for **50 marks** and scaled down to **20 marks**.
- 4. Total marks scored for lab component: 05+20= 25 marks.
- 5. The minimum marks to be secured in CIE to appear for SEE shall be 10(40% of maximum marks 25) in the theory and 10(40% of Maximum marks 25) in the practical.
- 6. The laboratory component of the **integrated course** shall be CIE only. However, in SEE, the questions from the practical component shall be included.
- 7. The maximum of 05 questions is to be set from the practical component and the total marks of all questions should not be more than 25 marks.

I Semester – Chemistry Cycle

Civil Engineering (CV)

Rajarajeswari College of Engineering (An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

SEMESTER I								
Mathematics-I for CV								
Course Code : B24MACV101 CIE : 50 Marks								
Teaching Hours L:T: P	:	2:2:2	SEE	:	50 Marks			
Total Hours	:	50 Hours	Total	:	100 Marks			
Credits	:	4	SEE Duration	:	3 Hrs.			

	Course Objectives					
1	Understand the angle of intersection between two curves and the condition for orthogonal curves					
2	Familiarize the importance of calculus associated with one variable and two variables.					
3	Develop the knowledge of solving differential equations and their applications in engineering.					
4	Analyze engineering problems applying Ordinary Differential Equations.					
5	Develop the knowledge of Linear Algebra referring to matrices.					

Module-1: Differential Calculus	10hrs.
Introduction to polar coordinates, Polar curves, Angle between radius vector and tangent, angle between two	
polar curves. Pedal equation. Curvature and Radius of Curvature- Cartesian, Parametric, Polar and Pedal	,
forms (Proof only for Cartesian and Polar Forms). Taylor's and Maclaurin's series expansion for one	,
variable (Statement only) – problems	,
Self-study: Center and circle of curvature, evolutes and involutes.	,
Applications: Structural design and paths, strength of materials, Elasticity.	
Module-2: Series Expansion and Multi variable Calculus	10 hrs.
Indeterminate forms – L-Hospital's rule, problems. Partial differentiation, Total Derivative - Differentiation	ı
of composite functions. Jacobian and problems. Maxima and minima for a function of two variables - problems.	ı
Self-study: Euler's theorem and problems. Method of Lagrange's undetermined multipliers with single	
constraint.	,
Applications: Computation of stress and strain, Errors and approximations, Estimating the critical points	,
and extreme values.	1
Module-3: Ordinary Differential Equations (ODEs) of First Order	10 hrs.
Linear and Bernoulli's differential equations. Exact and reducible to exact differential equations - Integrating	
factors on $\frac{1}{N} \left(\frac{\partial M}{\partial y} - \frac{\partial N}{\partial x} \right) and \frac{1}{M} \left(\frac{\partial N}{\partial x} - \frac{\partial M}{\partial y} \right)$, Orthogonal trajectories and Newton's law of cooling. Nonlinear	ı
differential equations: Introduction to general and singular solutions, solvable for p only, Clairaut's	1
equations, Reducible to Clairaut's equations - Problems.	
Self-Study: Applications of ODEs in Civil Engineering problems like bending of the beam, whirling of	,
shaft, solution of non-linear ODE by the method of solvable for x and y.	,
Applications: Rate of Growth or Decay, Conduction of heat.	,
Module-4: Ordinary Differential Equations of Higher Order	10 hrs.
Higher-order linear ODEs with constant coefficients - Inverse differential operator,	
$X = ke^{ax}$, $k\sin(ax + b)$ or $k\cos(ax + b)$ and X is a Polynomial, Method of variation of parameters,	
Cauchy's and Legendre's differential equations -problems.	,
Self-Study: Formulation and solution of Cantilever beam. Finding the solution by the method of	,
undetermined coefficients.	
Applications: Oscillations of a spring, Transmission lines, Highway engineering.	
Module-5: Linear Algebra	10 hrs.
Elementary row transformation of a matrix, Rank of a matrix. Consistency and solution of a system of linear	
equations - Gauss-elimination method, Gauss-Jordan method and approximate solution by Gauss-Seidel	,
method, Rayleigh's power method to find the dominant Eigen value and Eigen vector.	,
Self-Study: Solution of a system of linear equations by Gauss-Jacobi iterative method. Inverse of a square	
matrix by Cayley- Hamilton theorem.	
Applications: Structural Analysis, Balancing equations.	

Rajarajeswari College of Engineering (An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

List of Laboratory experiments (2 hours/week per batch) 10 lab sessions +1 repetitionclass + 1 Lab Assessment

1	2D plots for Cartesian and polar curves								
2	Finding angle between polar curves, curvature and radius of curvature of a given curve								
3	Finding partial derivatives and Jacobian								
4	Applications to Maxima and Minima of two variables								
5	Solution of first-order ordinary differential equation and plotting the solution curves								
6	Solutions of Second-order ordinary differential equations with initial/boundary								
	conditions								
7	Solution of a differential equation of oscillations of a spring/deflection of a beam with								
	different loads								
8	Numerical solution of system of linear equations, test for consistency and graphical								
	representation								
9	Solution of system of linear equations using Gauss-Seidel iteration								
10	Find the largest and smallest Eigenvalue bythe Rayleigh power method.								

Suggested software's: Mathematica/Matlab/Python/Scilab

Cour	Course Outcomes: At the end of the course, the students will be able to							
	Apply the knowledge of calculus to solve problems related to polar curves and its applications in determining the bentness of a curve.							
CO2	Apply the Mathematical properties to solve illustrative Engineering problems, calculate Maxima and minima of a function and calculate Eigen value relate to Eigenvector of system of equations.							
CO3	Understand that physical systems can be described by Differential equations and solve such equations							
CO4	Analyze the solution of linear and non-linear Differential equations.							
CO5	Test the consistency of a system of linear equations and to solve them by direct and iterative methods.

CIE Evaluation

Assessment Details both (CIE and SEE)

The weightage of continuous Internal Evaluation (CIE) is 50% and for the Semester End Examination (SEE) is 50%. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50). The minimum passing mark for SEE is 35% of maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. Student has to secure a minimum 40% (40 marks out of 100) in the total of the CIE and SEE together.

The CIE marks for the theory component of the **Integrated Course (IC)** shall be 25 marks and for the laboratory component 25 marks

CIE for the theory component of IC:

- 1. Three tests each of 50 marks, after the completion of the syllabus 40%, 70% and 100% respectively.
- 2. Average of best two internal assessment tests each of 50 marks, scale down to 30 marks.
- **3.** Any two assessment methods as per regulations i.e. Two assignments / Two Quizzes/ Weekly test / project work for (20+20) marks, scaled down to 20 marks.
- **4.** Total marks scored (30+20 = 50 marks) scaled down to **25**.

CIE for the Practical component of IC:

- 1. On completion of every experiment / program in the laboratory, the students shall be evaluated and marks shall be awarded on the same day.
- 2. Each experiment is evaluated for 10 marks and scaled down to **5 marks**
- **3.** Laboratory test at the end of the 15th week of the semester / after completion of all the experiments shall be conducted for **50 marks** and scaled down to **20 marks**.
- 4. Total marks scored for lab component: 05+20= 25 marks.
- 5. The minimum marks to be secured in CIE to appear for SEE shall be 10(40% of maximum marks 25) in the theory and 10(40% of Maximum marks 25) in the practical.
- 6. The laboratory component of the **integrated course** shall be CIE only. However, in SEE, the questions from the practical component shall be included.
- 7. The maximum of 05 questions is to be set from the practical component and the total marks of all questions should not be more than 25 marks.

Theory								
IA Test	Exam conducted	Scaled down to	Average of best two	Total				
	for		tests					
IA-1	50	30						
IA-2	50	30	30					
IA-3	50	30		50/2=25				
Two Assignments	2X10=20	10	10					
Two Quizzes	2X10=20	10	10					

LAB									
Continuous performance and record writing	Each experiments evaluated for 10 marks	Scaled down to 05 marks	5+20=25						
Internal Test + Viva voce	Exam conducted for 50 Marks	Scaled down to 20 marks							

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Semester End Examination (SEE)

- 1. The question paper shall be set for 100 marks and duration of SEE is 3 hours.
- 2. The question paper will have two parts: Part –A and Part B
- 3. **Part A** should contain minimum **Two or Four** quiz questions from each module of mark each. **Part A is Compulsory** and carries 20 Marks.
- 4. **Part-B**contains two questions of 16 marks (with minimum of 3 sub questions) from each module with internal choice. Students should answer five full questions, selecting one full question from each module.
- 5. Students have to answer for 100 marks andmarks scored out of 100 shall be proportionally reduced to 50 marks.
- 6. Question papers to be set as per the Blooms Taxonomy levels.

Rubrics for Semester End Examination (SEE)								
Q. No	CONTENTS	MARKS						
	PART - A							
1	Two or Four Quiz questions from each module of 2 marks / 1 mark	20						
	PART – B							
	(Minimum 3 subdivisions only)							
2 or 3	Module: 1	16						
4 or 5	Module: 2	16

SEMESTER I/II									
Applied Chemistry for CV									
Category: ASC									
		Stream: CV							
		(Integrated)							
Course Code	:	B24CHCV102/202	CIE	:	50 Marks				
Teaching Hours L: T: P	Teaching Hours L: T: P : 2:2:2 SEE : 50 Marks								
Total Hours : 50 Total : 100 Marks									
Credits		4	SEE Duration	:	3 Hrs				

Course Objectives

- To impart the knowledge of Chemistry involved in Electrochemical cells, Corrosion and its control;
- Conventional, electrochemical and renewable sources of energy;
- Polymers; memory and display systems;
- Water treatment; sensors; e-waste management; Nanomaterials and Instrumental methods of analysis

Module – 1 Electrochemistry: Electrode Systems and Corrosion	No.of Hrs
ELECTRODES AND CELLS – Introduction- Classification of cells - primary, secondary and concentration cells; Reference electrodes - Calomel electrode; Ion-selective electrodes - Glass electrode. Determination of pH using glass electrode, numerical on concentration cells. CORROSION - Definition, Electrochemical theory of corrosion, Types of corrosion - differential metal, differential aeration; Corrosion Penetration Rate (CPR), numerical. Corrosion control: Metal coating-Galvanization, Inorganic coatings – anodizing. Cathodic protection – Sacrificial anode, Metal finishing - Introduction, technological importance; Electroless plating: Introduction, Electroless plating of copper (PCB).	8
Module - 2	No.of Hrs
Energy: Sources, Conversion and Storage	
Chemical fuels: Introduction, Calorific value - definition, gross and net calorific values; Determination of calorific value of a solid / liquid fuel using Bomb calorimeter and numerical on calorific value; Petroleum cracking - fluidized bed catalytic cracking; Octane number. Sustainable energy sources: Hydrogen as a fuel - advantages, production and storage.Production of Biodiesel. Solar cells - Construction and working of Si based PV cell, advantages. Quantum Dot Sensitized Solar Cells (QDSSC's) - Principle, Properties and Applications. Electrochemical Energy Systems: Introduction to batteries, Classification of batteries - primary and secondary batteries; construction, working and applications of Lithium ion batteries.	8
Module – 3 Polymers for Engineering Applications	No.of Hrs
Polymers - Introduction, Molecular weight - number average and weight average molecular weight, Polydispersion index, numerical problems;; Plastics - Definition of resins and plastics; Synthesis, properties and applications of PMMA; Elastomers - Synthesis, properties and application of butyl rubber; Adhesives : Synthesis, properties and applications of epoxy resin. Polymer composites - Composites as structural material; Synthesis and applications of Kevlar; Biodegradable polymers - Introduction, Lactic acid - synthesis, uses.	8
Module – 4 Structural Materials	No.of Hrs
Metals and Alloys: Introduction, Properties and application of Iron and its alloys (any two), Aluminium (any two) and its alloys. Cement: Introduction, composition, properties, classification, manufacturing process of cement, process of setting and hardening of cement, additives for cement. Geo polymer concrete: Introduction, synthesis, constituents, properties and applications.	8

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Refractories: Introduction, classification based on chemical composition, properties and application of refractory materials.	
Glass: Introduction, Composition, Types, Preparation of Soda-lime glass, properties and applications of glass.	
Module – 5	N. CH.
Water treatment, Nanomaterials and Analytical Techniques	No.of Hrs
Water treatment: Introduction, hardness of water, types, determination of hardness by EDTA method, disadvantages of hard water, removal of hardness, Desalination of water – Electrodialysis. BOD and COD - introduction, experimental determination of COD of waste water - numerical on COD, treatment of waste water , primary, secondary and tertiary treatment methods. Nanomaterials: Introduction, Synthesis of nanomaterials: top-down and bottom-up approaches; Synthesis by sol-gel, Precipitation methods. Carbon Nanotumes, Graphene properties and applications. Analytical techniques: Principle, Instrumentation and applications of Potentiometry,	8

Course	Course Outcomes: At the end of the course, the students will be able to			
CO1	Understand and apply the principles of chemistry involved in water treatment, corrosion, energy sources, polymers, nanomaterials, phase equilibria, alloys, ceramics and instrumental methods of analysis.			
CO2	Analyse the Engineering problems and draw meaningful inferences through applied chemistry.			
CO3	Implement sustainable solutions through concepts of Applied Chemistry in the field of Materials, Energy and Environment			
CO4	Engage in self-study and make an effective oral presentation on contribution of Chemistry to society			
CO5	Apply the knowledge of chemistry to investigate engineering materials by volumetric and instrumental methods and analyze, interpret the data to assess and address the issues of Environmental Pollution

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

PRACTICAL MODULE

A – Demonstration (any two) offline/virtual:

- A1. Synthesis of polyurethane
- A2. Quantitative estimation of Aluminium by precipitation method
- A3. Synthesis of iron oxide nanoparticles
- A4. Determination of chloride content in the given water sample by Argentometric method

B – Exercise (compulsorily any 4 to be conducted):

- B1. Conductometric estimation of acid mixture
- B2. Potentiometric estimation of FAS using K2Cr2O7
- B3. Determination of pKa of vinegar using pH sensor (Glass electrode)
- B4. Determination of rate of corrosion of mild steel by weight loss method
- B5. Estimation of Sodium present in soil/effluent sample using flame photometry

<u>C – Structured Enquiry (compulsorily any 4 to be conducted):</u>

- C1. Estimation of Copper present in electroplating effluent by optical sensor (colorimetry)
- C2. Determination of Viscosity coefficient of lubricant (Ostwald's viscometer)
- C3. Estimation of iron in TMT bar by diphenyl amine/external indicator method
- C4. Estimation of total hardness of water by EDTA method
- C5. Determination of Chemical Oxygen Demand(COD) of industrial waste water sample

D – Open Ended Experiments (any two):

- D1. Gravimetric estimation of gypsum in Portland cement
- D2. Electroplating of desired metal on substrate
- D3. Estimation of manganese dioxide in pyrolusite
- D4. Analysis of cement for its components

CIE Evaluation

Assessment Details both (CIE and SEE)

The weightage of continuous Internal Evaluation (CIE) is 50% and for the Semester End Examination (SEE) is 50%. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50). The minimum passing mark for SEE is 35% of maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. Student has to secure a minimum 40% (40 marks out of 100) in the total of the CIE and SEE together.

The CIE marks for the theory component of the **Integrated Course (IC)** shall be 25 marks and for the laboratory component 25 marks

CIE for the theory component of IC:

- 1. Three tests each of 50 marks, after the completion of the syllabus 40%, 70% and 100% respectively.
- 2. Average of best two internal assessment tests each of 50 marks, scale down to 30 marks.
- 3. Any two assessment methods as per regulations i.e. Two assignments / Two Quizzes/ Weekly test / project work for (20+20) marks, scaled down to 20 marks.

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

4. Total marks scored (30+20 = 50 marks) scaled down to 25.

CIE for the Practical component of IC:

- 1. On completion of every experiment / program in the laboratory, the students shall be evaluated and marks shall be awarded on the same day.
- 2. Each experiment is evaluated for 10 marks and scaled down to 5 marks
- 3. Laboratory test at the end of the 15th week of the semester / after completion of all the experiments shall be conducted for **50 marks** and scaled down to **20 marks**.
- 4. Total marks scored for lab component: 05+20= 25 marks.
- 5. The minimum marks to be secured in CIE to appear for SEE shall be 10(40% of maximum marks 25) in the theory and 10(40% of Maximum marks 25) in the practical.
- 6. The laboratory component of the **integrated course** shall be CIE only. However, in SEE, the questions from the practical component shall be included.
- 7. The maximum of 05 questions is to be set from the practical component and the total marks of all questions should not be more than 25 marks.

Rajarajeswari College of Engineering (An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Semester I/II								
Computer Aided Engineering Drawing								
	Category: ESC							
	(Common to all branches)							
(Practical)								
Course Code	:	B24CEDK103/203	CIE	:	50 Marks			
Teaching Hours L: T: P	:	2:0:2	SEE	:	50 Marks			
Total Hours : 40 Total : 100 Marks								
Credits		03	SEE Duration	:	3 Hrs			

Cours	Course Objectives					
1	To understand the basic principles and conventions of engineering drawing					
2	To use drawing as a communication mode					
3	To generate pictorial views using CAD software					
4	To understand the development of surfaces					
5	To visualize engineering components					

Module - 1	No. of Hrs
Introduction: Significance of Engineering drawing, BIS Conventions of Engineering Drawing, Free hand sketching of engineering drawing, Scales. Introduction to Computer Aided Drafting Software, Co-ordinate system and reference planes HP, VP, RPP& LPP of 2D/3D environment. Selection of drawing sheet size and scale. Commands and creation of Lines, coordinate points, axes, polylines, square, rectangle, polygons, splines, circles, ellipse, text, move, copy, off-set, mirror, rotate, trim, extend, break,	
Crthographic Projections of Points, Lines and Planes: Introduction to Orthographic projections: Orthographic projections of points in all quadrants. Orthographic projections of lines (Placed in First quadrant only). Orthographic projections of planes similar to Triangle, Square, Rectangle, Pentagon, Hexagon, and Circular laminas (Placed in First Quadrant only using Change of Position Method).	8 Hrs
Module - 2	No. of Hrs
Orthographic Projection of Solids: Orthographic projection of right regular solids Prisms (Square, Pentagon, Hexagon) & Pyramids (Square, Pentagon, Hexagon), Cones, Cubes & Tetrahedron. (Only Solids Resting on HP using Change of Position Method)	8Hrs
Module - 3	No. of Hrs
Isometric Projections: Isometric scale, Isometric projection of hexahedron (cube), right regular prisms, pyramids, cylinders, cones and spheres. Isometric projection of combination of two and three simple solids. (Conversion of simple isometric drawings into orthographic views)	8 Hrs

Rajarajeswari College of Engineering (An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Module - 4	No. of Hrs				
Development of Lateral Surfaces of Solids:					
Development of lateral surfaces of right regular prisms, cylinders, pyramids and cones					
resting with base on HP only. Problems on applications of development of lateral	8 Hrs				
surfaces ex: Funnels					
Development of lateral surfaces of their frustums and truncations.					
Module - 5	No. of Hrs				
Multidisciplinary Applications & Practice using CAD software (For CIE Only): Free hand Sketching: True free hand, Guided Free hand, Roads, Buildings, Utensils, Hand tools & Furniture's etc. Drawing Simple Mechanisms: (Only for ME with allied branches) Bicycles, Tricycles, Gear trains, Ratchets, two-wheeler cart & Four-wheeler carts to dimensions etc. Electric Wiring and lighting diagrams: (Only for EEE with allied branches) Automatic fire alarm, Call bell system, UPS system, Basic power distribution system. Basic Building Drawing: (Only for Civil with allied branches) Architectural floor plan, basic foundation drawing, steel structures-frames, bridges, trusses. Flow charts drawings: (Only for CSE with allied branches) Types of flow charts like Process Flowchart, Workflow Diagram, Swimlane Flowchart, Data Flow Diagram, System Flowchart, and Decision Flowchart. Electronics Engineering Drawings: (Only for ECE with allied branches) Simple electronics circuit drawings, practice on layers concept.	8 Hrs				

Course	Course Outcomes : At the end of the course, the students will be able to						
CO-1	1 Draw and communicate the objects with definite shape and dimensions.						
CO-2	Recognize and Draw the shape and size of objects through different views.						
CO-3	Develop the lateral surfaces of the object.						
CO-4	Create a Drawing views using CAD software.						
CO-5	Identify the interdisciplinary engineering components through its graphical representation.

CONTINUOUS INTERNAL EVALUATION (CIE)

Assessment Details (both CIE and SEE):

- 1) The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%.
- 2) The minimum passing mark for the CIE is 40% of the maximum marks (20 marks) and that for SEE minimum passing marks is 35% of the maximum marks (18 marks).
- 3) A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject / course if the student secures not less than 35% (18 Marks out of 50) in the Semester End Examination (SEE), and a minimum of 40% (40 marks out of 100) in the sum of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

Continuous Internal Evaluation (CIE)

- CIE shall be evaluated for Max. Marks of 100 and later the same shall be scaled-down to 50 marks as detailed below.
- CIE component should comprise of continuous evaluation of drawing work of students as and when the modules are covered based on below detailed weightage.
- IA Test- 3 covering all the modules is to be conducted for Max. Marks of 100 and evaluation to be based SEE pattern, and the same is to be scaled down to 15 marks.
- The final CIE = Class work marks + Test marks.

RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (CIE)

Particulars	Marks	Evaluation Weightage in marks	Reduced to	Total	
IA-1	50	- Best of Two Internals	10		
IA-2	50	Best of Two Internals	10	25	
IA-3	50	Lab Mock Exam	15		
Sketch Book	20	Skatah Dook - Assignments		25	
Assignments	5	Sketch Book + Assignments	-	25	
			Total	50	

Semester End Examination (SEE)

- 1) SEE shall be conducted and evaluated for maximum marks 100. Marks obtained shall be accounted for SEE final marks, reducing it by 50%
- 2) Question paper shall be set jointly by both Internal and External Examiner and made available for each batch as per schedule. **Questions are to be set preferably from Text Books.**
- 3) Related to Module-1: One full question can be set either from "points & lines" or "planes".
- 4) Evaluation shall be carried jointly by both the examiners.
- 5) Scheme of Evaluation: To be defined by the examiners jointly and the same shall be submitted to the university along with question paper.
- 6) One full question shall be set from each of the Module from Modules 1, 2, 3 and 4 as per the below table weightage details. However, the student may be awarded full marks, if he/she completes solution on

Teaching Hours/Week (L:T:P: S)	Teaching Hours/Week (L:T:P: S) : 3:0:0 SEE : 50 Marks								
Total Hours : 40 Total : 100 Marks									
Credits	:	3	SEE Duration	:	3 Hrs				

Cou	rse Objectives
1	To Explain the operation of Semiconductor diode, Zener diode and their applications.
2	To Explain the Transistor operation and Different configurations, working and construction of
	FET and MOSFET.
3	To Explain the operation of linear Op-amps and its applications
4	To Explain the Basic Logic gates, circuits and their optimization.
5	To Explain the Principles of Communication system

Module - 1	No. of Hrs
Diode Applications - Load line analysis, series- diode configuration. Sinusoidal inputs - half wave rectification, Full wave Rectification, Zener diodes, voltage multiplier Circuits . T1: 2.2,2.3,2.6,2.7,2.11, 2.12	8
Module - 2	No. of Hrs
Bipolar junction transistor - Transistor operation, common base configuration, common emitter configuration, common collector configuration. Junction field effect transistor - construction and characteristics of JFET, Transfer Characteristics. MOSFET- Depletion type MOSFET, Enhancement type MOSFET T1: 3-3, 304, 305, 306, 6-2, 6-3, 6-7, 6-8	8
Module - 3	No. of Hrs
Operational amplifier –Operational amplifier basics, practical Op-Amp circuits, Op-Amp specification –DC offset parameter, frequency parameter, Differential and common mode operation. Practical Op-Amp circuits– Inverting amplifier, non-inverting amplifier, Unity follower, Summingamplifier, Integrator, Differentiator. T1:10.4, 10.5, 10.6, 10.7, 10.9	8
Module- 4	No. of Hrs
Boolean Algebra and Logic Circuits: Binary numbers, Number Base Conversion, octal &Hexa Decimal Numbers, Complements, Basic definitions, Axiomatic Definition of Boolean Algebra, Basic Theorems and Properties of Boolean Algebra, Boolean Functions, Canonical and Standard Forms, Other Logic Operations, Digital Logic Gates (Text 2: 1.2, 1.3, 1.4, 1.5,2.1, 2.2, 2.3, 2.4, 2.5, 2.6, 2.7) Combinational logic: Introduction, Design procedure, Adders- Half adder, Full adder (Text 2:4.1, 4.2, 4.3)	8
Module- 5	No. of Hrs
Elements of a Communication system, Need for Modulation, Amplitude Modulation (Am) Techniques, Frequency Modulation, Phase modulation, Comparison of FM & PM, Comparison of FM and AM. T3: 1.2, 1.3, 3.2.1, 4.1.1, 4.1.2, 4.1.3, 4.2.6, 6.2.1, 6.2.2	8

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Course	Course Outcomes: At the end of the course, the students will be able to						
CO1	Develop the basic knowledge on construction and characteristics of semiconductor devices.						
CO2	Summarize the basic concept of small scale circuits using BJT,JFET,MOSFET scale circuits						
CO3	Apply the knowledge on various applications of operational amplifiers						
CO4	Understand the concepts of Boolean algebra and Logic circuits						
CO5	Illustrate the outline of Communication system.

CIE Evaluation

Assessment Details both (CIE and SEE)

The weightage of continuous Internal Evaluation (CIE) is 50% and for the Semester End Examination (SEE) is 50%. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50). The minimum passing mark for SEE is 35% of maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. Student has to secure a minimum 40% (40 marks out of 100) in the total of the CIE and SEE together.

CIE for the theory:

- 1. Three tests each of 50 marks, after the completion of the syllabus 40%, 70% and 100% respectively.
- 2. Average of best two internal assessment tests each of 50 marks, scale down to 30 marks.
- 3. Any two assessment methods as per regulations i.e. Two assignments / Two Quizzes/ Weekly test / project work for 40 marks, scaled down to 20 marks.
- 4. Total marks scored (30+20 = 50 marks).
- 5. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50).

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Theory								
IA Test	Exam conducted	Scaled down to	Average of best two	Total				
	for		tests					
IA-1	50	30						
IA-2	50	30	30					
IA-3	50	30		30+10+10=50				
Two Assignments	2X10=20	10	10					
Two Quizzes	2X10=20	10	10					

Semester End Examination (SEE)

- 1. The question paper shall be set for 100 marks and duration of SEE is 3 hours.
- 2. The question paper will have two parts: Part –A and Part B
- 3. **Part A** should contain minimum **Two or Four** quiz questions from each module of 02 marks / 01 mark each. **Part A is Compulsory** and carries 20 Marks.
- 4. **Part B** contains two questions of 16 marks (with minimum of 3 sub questions) from each module with internal choice. Students should answer five full questions, selecting one full question from each module.
- 5. Students have to answer for 100 marks and marks scored out of 100 shall be proportionally reduced to 50 marks.
- 6. Question papers to be set as per the Blooms Taxonomy levels.

Rajarajeswari College of Engineering (An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Semester I/II							
Introduction to Python Programming							
		Category: PLC-	I/II				
		(Common to All Br	ranches)				
		(Integrated)					
Course Code	Course Code : B24PLCK152/252 CIE : 50 Marks						
Teaching Hours L: T: P : 2:0:2 SEE : 50 Marks							
Total Hours : 50 Total : 100 Marks							
Credits 3 SEE Duration : 3 Hrs							

Course	e Objectives						
1.	. Learn the syntax and semantics of the Python programming language.						
2.	Readily use the Python functions to facilitate code reuse and manipulate strings.						
3.	Apply various structuring the data using lists, tuples						
4.	Understand the need for working with various documents like Excel, PDF, Word and Others.						
5.	Understand the Object-Oriented Programming concepts in Python.						

Module - 1	No. of Hrs
Python Basics: The Python programming language, Program, Debugging, Variables, Expressions, and Statements, Entering expressions into the Interactive Shell, Your first program, Dissecting your program.	08
Flow control: Boolean Values, Comparison Operators, Boolean Operators, Mixing Boolean and Comparison Operators, Elements of Flow Control, Program Execution, Flow Control Statements, Importing Modules, Ending a Program Early with sys. exit ().	
Textbook 1: Chapters 1 – 2 Textbook 2: Chapters 1.1-1.3, Chapter 2.1-2.10	
Module - 2	No. of Hrs
Functions: def Statements with Parameters, Return Values, and return Statements, The None Value, Keyword Arguments, and print(), Local and Global Scope, the global Statement, Exception Handling, A Short Program: Guess the Number. Lists: The List Data Type, Working with Lists, Augmented Assignment Operators, Methods, Example Program: Magic 8 Ball with a List, List-like Types: Strings and Tuples, References. Textbook 1: Chapters 3, 4	08
Module - 3	No. of Hrs
Dictionaries and Structuring Data: The Dictionary Data Type, Pretty Printing, Using Data Structures to Model Real-World Things. Manipulating Strings: Working with Strings, Useful String Methods, Project: Password Locker. Textbook 1: Chapters 5, 6	08
Module - 4	No. of Hrs
Reading and Writing Files: Files and File Paths, The os.path Module, The File Reading/Writing Process, Saving Variables with the shelve Module, Saving Variables with the print.format() Function, Project: Generating Random Quiz Files, Project: Multi-clipboard. Working with Excel Spreadsheets: Installing the openpyxl Module, Reading Excel Documents, Writing Excel Documents.	08
Textbook 1: Chapters 8, 9 and 12	
Module - 5	No. of Hrs
Classes and objects: Programmer defined types, Attributes, Rectangles, Instances as return values, Objects are mutable, Copying,	

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Classes and functions: Time, Pure functions, Modifiers.

Classes and methods: Object-oriented features, Printing objects, Another example, A more complicated example, The init method, The str method, Operator overloading, Type-based dispatch, Polymorphism, Interface, and implementation.

Textbook 2: Chapters 15 – 17

Course	Course Outcomes: At the end of the course, the students will be able to							
CO1	Understand the fundamental programming constructs to solve basic computational problems.							
CO2	Learn the flow of execution and the need for debugging to rectify program bugs proficiently.							
CO3	Utilize the methods to create and manipulate the importance of data structures in problem-solving.							
CO4	Know the structured and modular code using appropriate Object-Oriented Programming paradigms.							
CO5	Apply the acquired skills to provide solutions to real-world problems.							

	Practical Component
Sl. No.	Experiments for Conduction
1.	a) Develop a program to read the student details like Name, USN, and Marks in three subjects. Display the student details, total marks, and percentages with suitable messages.
	b) Develop a program to read the name and year of birth of a person. Display whether the person is a senior citizen or not.
	a) Develop a program to generate Fibonacci sequence of length (N). Read N from the console.
2.	b) Write a function to calculate the factorial of a number. Develop a program to compute binomial coefficient (Given N and R).
3.	Read N numbers from the console and create a list. Develop a program to print mean, variance, and standard deviation with suitable messages.
4.	Read a multi-digit number (as chars) from the console. Develop a program to print the frequency of each digit with a suitable message.
5.	Develop a program to print the 10 most frequently appearing words in a text file. [Hint: Use a dictionary with distinct words and their frequency of occurrences. Sort the dictionary in the reverse order offrequency and display the dictionary slice of the first 10 items]
6.	Develop a program to sort the contents of a text file and write the sorted contents into a separate text file. [Hint: Use string methods $strip()$, $len()$, list methods $sort()$, $append()$, and file methods $open()$, $readlines()$, and $write()$].
	Implement a Python program to perform the following operations on an Excel spreadsheet:
7.	 Reading the first 5 rows of all columns Appending a new row / new column Delete row/column To perform aggregate functions
8.	Write a function named <i>DivExp</i> which takes TWO parameters <i>a, b</i> and returns the value of <i>c, where</i>

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

	c=a/b. Write suitable assertion for $a>0$ in function $DivExp$ and raise an exception for when $b=0$. Develop a suitable program which reads two values from the console and calls a function $DivExp$.
9.	Define a function which takes TWO objects representing complex numbers and returns new complex number with an addition of two complex numbers. Define a suitable class 'Complex' to represent the complex number. Develop a program to read $N(N \ge 2)$ complex numbers and to compute the addition of N complex numbers.
10.	Develop a program that uses class Student which prompts the user to enter marks in three subjects and calculates total marks, percentage and displays the score card details. [Hint: Use list to store the marks in three subjects and total marks. Use <code>_init_()</code> method to initialize name, USN and the lists to store marks and total, Use <code>getMarks()</code> method to read marks into the list, and <code>display()</code> method to display the score card details.]

CIE Evaluation

Assessment Details both (CIE and SEE)

The weightage of continuous Internal Evaluation (CIE) is 50% and for the Semester End Examination (SEE) is 50%. The minimum passing mark for the CIE is 40% of maximum marks (20 marks out of 50). The minimum passing mark for SEE is 35% of maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each course. Student has to secure a minimum 40% (40 marks out of 100) in the total of the CIE and SEE together.

The CIE marks for the theory component of the **Integrated Course** (**IC**) shall be 25 marks and for the laboratory component 25 marks

CIE for the theory component of IC:

- 1. Three tests each of 50 marks, after the completion of the syllabus 40%, 70% and 100% respectively.
- 2. Average of best two internal assessment tests each of 50 marks, scale down to 30 marks.
- 3. Any two assessment methods as per regulations i.e. Two assignments / Two Quizzes/ Weekly test / project work for (20+20) marks, scaled down to 20 marks.
- 4. Total marks scored (30+20 = 50 marks) scaled down to 25.

CIE for the Practical component of IC:

- 1. On completion of every experiment / program in the laboratory, the students shall be evaluated and marks shall be awarded on the same day.
- 2. Each experiment is evaluated for 10 marks and scaled down to 5 marks
- **3.** Laboratory test at the end of the 15th week of the semester / after completion of all the experiments shall be conducted for **50 marks** and scaled down to **20 marks**.
- 4. Total marks scored for lab component: 05+20= 25 marks.
- 5. The minimum marks to be secured in CIE to appear for SEE shall be 10(40% of maximum marks 25) in the theory and 10(40% of Maximum marks 25) in the practical.
- 6. The laboratory component of the **integrated course** shall be CIE only. However, in SEE, the questions from the practical component shall be included.
- 7. The maximum of 05 questions is to be set from the practical component and the total marks of all questions should not be more than 25 marks.

		Theory

Common Courses

I Semester – Chemistry Cycle

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Semester-I					
Communicative English					
		Category:	AEC		
		Common to All	Branches		
		(The	ory)		
Course Code	:	B24ENGK106	CIE	:	50 Marks
Teaching Hours L : T : P	:	1:0:0	SEE	:	50 Marks
Total Hours : 15 Total : 100 Marks					
Credits		1	SEE Duration	:	1 Hr

Cours	e Objectives: The course Communicative English (BENGK106) will enable the students
1.	To know about Fundamentals of Communicative English and Communication Skills in general.
2.	To train to identify the nuances of phonetics, intonation and enhance pronunciation skills for better Communication skills.
3.	To impart basic English grammar and essentials of important language skills.
4.	To enhance with English vocabulary and language proficiency for better communication skills.
5.	To learn about Techniques of Information Transfer through presentation.

Teaching-Learning Process:

These are sample Strategies, which teacher can use to accelerate the attainment of the various course outcomes and make Teaching –Learning more effective:

Teachers shall adopt suitable pedagogy for effective teaching - learning process. The pedagogy shall involve the combination of different methodologies which suit modern technological tools and software's to meet the present requirements of the Global employment market.

(i) Direct instructional method (Low/Old Technology), (ii) Flipped classrooms (High/advanced Technological tools), (iii) Blended learning (Combination of both), (iv) Enquiry and evaluation based learning,(v) Personalized learning, (vi) Problems based learning through discussion, (vii) Following the method of expeditionary learning Tools and techniques, (viii) Use of audio visual methods through language Labs in teaching of of LSRW skills. Apart from conventional lecture methods, various types of innovative teaching techniques through videos, animation films may be adapted so that the delivered lesson can progress the students In theoretical applied and practical skills in teaching of communicativeskills in general.

Module - 1	No. of Hrs
Introduction to Communicative English: Communicative English, Fundamentals of	
Communicative English, Process of Communication, Barriers to Effective Communicative English,	03
Different styles and levels in Communicative English. Interpersonal and Intrapersonal	
Communication Skills	
Module - 2	No. of Hrs
Introduction to Phonetics: Phonetic Transcription, English Pronunciation, Pronunciation	
Guidelines to consonants and vowels, Sounds Mispronounced, Silent and Non silent Letters,	03
Syllables and Structure. Word Accent, Stress Shift and Intonation, Spelling Rules and Words often	
Misspelt. Common Errors in Pronunciation	
Module - 3	No. of Hrs
Basic English Communicative Grammar and Vocabulary PART - I : Grammar: Basic English	
Grammar and Parts of Speech, Articles and Preposition. Question Tags, One Word Substitutes,	03
Strong and Weak forms of words, Introduction to Vocabulary, All Types of Vocabulary -	
Exercises on it.	

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Module - 4	No. of Hrs		
Basic English Communicative Grammar and Vocabulary PART - II: Words formation -			
Prefixes and Suffixes, Contractions and Abbreviations. Word Pairs (Minimal Pairs) – Exercises,	03		
Tense and Types of tenses, The Sequence of Tenses (Rules in use of Tenses) and Exercises on it.			
Module - 5			
Communication Skills for Employment :Information Transfer: Oral Presentation and its			
Practice. Difference between Extempore/Public Speaking, Communication Guidelines. Mother	03		
Tongue Influence (MTI), Various Techniques for Neutralization of Mother Tongue Influence.			
Reading and Listening Comprehensions – Exercises.			

Course	Course Outcomes: At the end of the course, the students will be able to					
CO1	Understand and apply the Fundamentals of Communication Skills in their communication skills					
CO2	Identify the nuances of phonetics, intonation and enhance pronunciation skills					
CO3	To impart basic English grammar and essentials of language skills as per present requirement					
CO4	Understand and use all types of English vocabulary and language proficiency					
CO5	Adopt the Techniques of Information Transfer through presentation

Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50). The minimum passing mark for the SEE is 35% of the maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination(SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

Continuous Internal Evaluation(CIE): Three Unit Tests each of 50 Marks (duration 01 hour). The pattern of the question paper is MCQ (multiple choice questions).

1st, 2nd, and 3rd tests shall be conducted after completion of the syllabus of 30-35%, 70-75%, and 100% of the course/s respectively. However best two tests out of three shall be taken into consideration.

Two assignments each of 10 Marks. The teacher has to plan the assignments and get them completed by the students well before the closing of the term so that marks entry in the examination portal shall be done in time.

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Conducting Seminar for 10 Marks. The Teachers shall choose the types of assignments depending on the requirement of the course and plan to attain the Cos and POs.

Total Marks scored = Average of best two tests (30) + Two Assignments (10) + Seminar (10) = 50 Marks (maximum)

Semester End Examinations (SEE): SEE paper shall be set for 50 questions, each of the 01 mark. The pattern of the question paper is MCQ (multiple choice questions). The time allotted for SEE is 01 hour. The student must secure a minimum of 35% of the maximum marks for SEE.

Activity Based Learning (Suggested Activities in Class)/ Practical Based learning

- Contents related activities (Activity-based discussions)
- For active participation of students instruct the students to prepare Flowcharts and Handouts
- Organizing Group wise discussions Connecting to placement activities
- Quizzes and Discussions, Seminars and assignments

CO5	ಸಾಂಸ್ಕೃತಿಕ್ಕ ಜನಪದ ಹಾಗೂ ಪ್ರವಾಸ ಕಥನಗಳ ಪರಿಚಯ ಮಾಡಿಕೊಡುವುದು.

University prescribed Text Books:

ಸಾಂಸ್ಕೃತಿಕ ಕನ್ನಡ

ಡಾ.ಹಿ. ಚಿ ಬೋರಲಿಂಗಯ್ಯ ಮತ್ತು ಡಾ. ಎಲ್ ತಿಮ್ಮೇಶ

ಪ್ರಕಟಣೆ: ಪ್ರಸಾರಾಂಗ,

ವಿಶ್ವೇಶ್ವರಯ್ಯ ತಾಂತ್ರಿಕ ವಿಶ್ವವಿದ್ಯಾಲಯ, ಬೆಳಗಾವಿ.

ಸೂಚನೆ:

1.ಹೆಚ್ಚಿನ ಮಾಹಿತಿ ಮತ್ತು ವಿವರಣೆಗಳಿಗೆ (9900832331) ಇವರನ್ನು ಸಂಪರ್ಕಿಸಿ.

2.ಮಾದರಿ ಪ್ರಶ್ನೆಪತ್ರಿಕೆ, ಕೋರ್ಸ್ ಆಯ್ಕೆ ಮಾಹಿತಿ, ಅಧ್ಯಯನ ಸಾಮಗ್ರಿ ಮತ್ತು ಬಹು ಆಯ್ಕೆ ಮಾದರಿಯ ಪ್ರಶ್ನೆಗಳ ಕೈಪಿಡಿಗಾಗಿ ವಿಶ್ವವಿದ್ಯಾಲಯದ ವೆಬ್ ಸೈಟ್ ನೋಡುವುದು.

Assessment Details (both CIE and SEE)

The weightage of Continuous Internal Evaluation (CIE) is 50% and for Semester End Exam (SEE) is 50%. The minimum passing mark for the CIE is 40% of the maximum marks (20 marks out of 50). The minimum passing mark for the SEE is 35% of the maximum marks (18 marks out of 50). A student shall be deemed to have satisfied the academic requirements and earned the credits allotted to each subject/ course if the student secures not less than 35% (18 Marks out of 50) in the semester-end examination(SEE), and a minimum of 40% (40 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Continuous Internal Evaluation(CIE): Three Unit Tests each of 50 Marks (duration 01 hour). The pattern of the question paper is MCQ (multiple choice questions).

1st, 2nd, and 3rd tests shall be conducted after completion of the syllabus of 30-35%, 70-75%, and 100% of the course/s respectively. However best two tests out of three shall be taken into consideration.

Two assignments each of 10 Marks. The teacher has to plan the assignments and get them completed by the students well before the closing of the term so that marks entry in the examination portal shall be done in time.

Conducting Seminar for 10 Marks. The Teachers shall choose the types of assignments depending on the requirement of the course and plan to attain the Cos and POs.

Total Marks scored = Average of best two tests (30) + Two Assignments (10) + Seminar (10) = 50 Marks (maximum)

Semester End Examinations (SEE): SEE paper shall be set for 50 questions, each of the 01 mark. The pattern of the question paper is MCQ (multiple choice questions). The time allotted for SEE is 01 hour. The student must secure a minimum of 35% of the maximum marks for SEE.

Activity Based Learning (Suggested Activities in Class)/ Practical Based learning

- Contents related activities (Activity-based discussions)
- For active participation of students instruct the students to prepare Flowcharts and Handouts
- Organizing Group wise discussions Connecting to placement activities
- Quizzes and Discussions, Seminars and assignments

SEMESTER- I /II						
ಬಳಕೆ ಕನ್ನಡ						
		Category: HSN				
Common to All Branches						
		(Theory)				
Course Code	Course Code : B24HBKK107/207 CIE : 50 Marks					
Teaching Hours L: T: P : 1:0:0 SEE : 50 Marks						
Total Hours : 15 Total : 100 Marks						
Credits		1	SEE Duration	:	1 Hr	

Cours	Course Objectives: ಬಳಕೆ ಕನ್ನಡ ಕಲಿಕೆಯ ಉದ್ದೇಶಗಳು				
1.	To Create the awareness regarding the necessity of learning local language for comfortable and healthy life.				
2.	To enable learners to Listen and understand the Kannada language properly.				
3.	To speak, read and write Kannada language as per requirement.				
4.	To train the learners for correct and polite conservation.				
5.	To know about Karnataka state and its language, literature and General information about this state.				

Teaching-Learning Process :ಬೋಧನೆ ಮತ್ತು ಕಲಿಕಾ ವ್ಯವಸ್ಥೆ

These are sample Strategies, which teacher can use to accelerate the attainment of the various course outcomes and make Teaching –Learning more effective:

- 1.ಬಳಕೆ ಕನ್ನಡವನ್ನು ತರಗತಿಯಲ್ಲಿ ಶಿಕ್ಷಕರು ಬೋಧಿಸಲು ವಿಟಿಯು ಸೂಚಿಸಿರುವ ಪಠ್ಯಪುಸ್ತಕವನ್ನು ಉಪಯೋಗಿಸಬೇಕು.
- 2.ಪ್ರಮುಖ ಅಂಶಗಳ ಚಾರ್ಟ್ ಗಳನ್ನು ತಯಾರಿಸಲು ಉತ್ತೇಜಿಸುವುದು ಮತ್ತು ಅವುಗಳನ್ನು ಚರ್ಚಿಸಲು ಅವಕಾಶ ಮಾಡಿಕೊಡುವುದು.
- 3.ಪ್ರತಿ ವಿದ್ಯಾರ್ಥಿ ಪುಸ್ತಕವನ್ನು ತರಗತಿಯಲ್ಲಿ ಬಳಸುವಂತೆ ನೋಡಿಕೊಳ್ಳುವುದು ಮತ್ತು ಪ್ರತಿ ಪಾಠ ಮತ್ತು ಪ್ರವಚನಗಳ ಮೂಲ ಅಂಶಗಳಿಗೆ ಸಂಬಂಧಪಟ್ಟಂತೆ ಪೂರಕ ಚಟುವಟಿಕೆಗಳಿಗೆ ತೊಡಗಿಸತಕ್ಕದ್ದು.
- 4.ಡಿಜಿಟಲ್ ತಂತ್ರಜ್ಞಾನದ ಮುಖಾಂತರ ಇತ್ತೀಚೆಗೆ ಡಿಜಿಟಲೀಕರಣಗೊಂಡಿರುವ ಭಾಷೆ ಕಲಿಕೆಯ ವಿಧಾನಗಳನ್ನು ಪಿಪಿಟಿ ಮತ್ತು ದೃಶ್ಯ ಮಾಧ್ಯಮದ ಮುಖಾಂತರ ಚರ್ಚಿಸಲು ಕ್ರಮ ಕೃಗೊಳ್ಳುವುದು. ಇದರಿಂದ ವಿದ್ಯಾರ್ಥಿಗಳನ್ನು ತರಗತಿಯಲ್ಲಿ ಹೆಚ್ಚು ಏಕಾಗ್ರತೆಯಿಂದ ಪಾಠ ಕೇಳಲು ಮತ್ತು ಅಧ್ಯಯನದಲ್ಲಿ ತೊಡಗಲು ಅನುಕೂಲವಾಗುತ್ತದೆ.
- 5.ಭಾಷಾ ಕಲಿಕೆಯ ಪ್ರಯೋಗಾಲಯದ ಮುಖಾಂತರ ಬಹುಬೇಗ ಕನ್ನಡ ಭಾಷೆಯನ್ನು ಕಲಿಯಲು ಅನುಕೂಲವಾಗುವಂತೆ ಕಾರ್ಯ ಚಟುವಟಿಕೆಗಳನ್ನು ಮತ್ತು ಕ್ರಿಯಾ ಯೋಜನೆಗಳನ್ನು ರೂಪಿಸುವುದು.

MOOGAMBIGAI CHARITABLE AND EDUCATIONAL TRUST

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

Semester I/II							
	Scientific Foundations of Health						
	Category: AEC/SDC						
	Common to All Branches						
(Theory)							
Course Code	:	B24SFHK108/208	CIE	:	50 Marks		
Teaching Hours L : T : P	:	1:0:0	SEE	:	50 Marks		
Total Hours : 15 Total : 100 Marks							
Credits		1	SEE Duration	:	1 Hr		

Course Objectives		
1.	To know about Health and wellness (and its Beliefs) & It's balance for positive mindset.	
2.	To Build the healthy lifestyles for good health for their better future.	
3.	To Create a Healthy and caring relationships to meet the requirements of good/social/positive life.	
4.	To learn about Avoiding risks and harmful habits in their campus and outside the campus for their bright future	
5.	To Prevent and fight against harmful diseases for good health through positive mindset	

Teaching-Learning Process

These are sample Strategies, which teacher can use to accelerate the attainment of the various course outcomes and make Teaching –Learning more effective:

Teachers shall adopt suitable pedagogy for effective teaching - learning process. The pedagogy shall involve the combination of different methodologies which suit modern technological tools.

(i) Direct instructional method (Low/Old Technology), (ii) Flipped classrooms (High/advanced Technological tools), (iii) Blended learning (Combination of both), (iv) Enquiry and evaluation based learning, (v) Personalized learning, (vi) Problems based learning through discussion, (vii) Following the method of expeditionary learning Tools and techniques, (viii) Use of audio visual methods.

Apart from conventional lecture methods, various types of innovative teaching techniques through videos, animation films may be adapted so that the delivered lesson can progress the students In theoretical applied and practical skills.

Module - 1	No. of Hrs
Good Health & It's balance for positive mindset: Health -Importance of Health,	
Influencing factors of Health, Health beliefs, Advantages of good health, Health & Behavior,	03
Health & Society, Health & family, Health & Personality, Psychological disorders-Methods to	
improve good psychological health, Changing health habits for good health.	
Module - 2	No. of Hrs
Building of healthy lifestyles for better future: Developing healthy diet for good health, Food	
& health, Nutritional guidelines for good health, Obesity & overweight disorders and its	03
management, Eating disorders, Fitness components for health, Wellness and physical function,	
How to avoid exercise injuries.	
Module - 3	No. of Hrs
Creation of Healthy and caring relationships: Building communication skills, Friends and	
friendship - Education, the value of relationship and communication skills, Relationships for	
Better or worsening of life, understanding of basic instincts of life (more than a biology),	03
Changing health behaviors through social engineering.	
Module - 4	No. of Hrs
Avoiding risks and harmful habits: Characteristics of health compromising behaviours,	
Recognizing and avoiding of addictions, How addiction develops, Types of addictions,	03
influencing factors of addictions, Differences between addictive people and non addictive people	

Rajarajeswari College of Engineering

(An Autonomous Institution Under Visvesvaraya Technological University, Belagavi)

& their behaviours. Effects of addictions Such as, how to recovery from addictions.	
Module - 5	No. of Hrs
Preventing & fighting against diseases for good health: How to protect from different types of	
infections, How to reduce risks for good health, Reducing risks & coping with chronic conditions,	
Management of chronic illness for Quality of life, Health & Wellness of youth :a challenge for	03
upcoming future, Measuring of health & wealth status.	

Course Outcomes: At the end of the course, the students will be able to		
CO1	To understand and analyse about Health and wellness (and its Beliefs) & It's balance for positive mindset.	
CO2	Develop the healthy lifestyles for good health for their better future.	
CO3	Build a Healthy and caring relationships to meet the requirements of good/social/positive life.	
CO4	To learn about Avoiding risks and harmful habits in their campus and outside the campus for their bright future.	
CO5	Prevent and fight against harmful diseases for good health through positive mindset.
