RAJARAJESWARI COLLEGE OF ENGINEERING

An Autonomous Institution

Under VTU - Belagavi, Approved by AICTE, UGC & GoK

No. 14, Ramohalli Cross, Kumbalagodu, Mysore Road, Bengaluru - 560074

Institute Vision

To empower young minds through technology, research, and innovation, to produce technically competent and socially responsible professionals in higher education.

Institute Mission

To deliver excellence in education through innovative teaching, impactful research, and continuous skill development, preparing students to meet global challenges with technical expertise and ethical responsibility.

To foster a transformative learning environment that integrates technology, research, and practical experience, empowering students to become skilled professionals and socially conscious leaders.

To cultivate a culture of lifelong learning and professional excellence by encouraging creativity, research, and community engagement, equipping students with the skills to thrive in a dynamic world.

To provide a holistic educational experience that combines advanced technology, hands-on research, and community-focused learning, shaping students into competent, ethical professionals who contribute positively to society.

Quality Policy

Rajarajeswari College of Engineering is committed to imparting quality technical education that nurtures competent, ethical professionals with global relevance. We ensure academic excellence through a dynamic, outcome-based curriculum, experienced faculty, and cutting-edge infrastructure. Continuous improvement is driven by innovation, research, and strong industry collaboration. We foster holistic development and a progressive environment that supports lifelong learning, teamwork, and professional growth.

Core Values

Academic Excellence, Integrity, Innovation, Global Competence, Continuous Improvement

Rajarajeswari College of Engineering

M.Tech – Computer Science and Engineering

Syllabus 2024-25

I Semester

Rajarajeswari College of Engineering

(An Autonomous	sins	titution under visvesva	raya Technologicai Unive	ersity,	Belagavi)		
		Semester	I		·		
		Artificial Inte	lligence				
		Category: P	PCC				
	Strea	m: Computer Science &	Engineering (M.Tech)				
		(Theory)					
Course Code	:	P24MTC101	CIE	:	50 Marks		
Teaching Hours L: P: SDA : 3:0:0 SEE : 50 Marks							
Total Hours : 45 Hours Total : 100 Marks							
Credits		3	SEE Duration		3 Hrs		

Cours	se Objectives
1	Define the foundational concepts of artificial intelligence and key problem-solving techniques
2	Explain the knowledge representation and reasoning techniques to solve complex problems in AI systems.
3	Use machine learning algorithms to evaluate their performance in real-world applications
4	Build the applications of natural language processing and robotics to enhance human-computer interaction.
5	Explore the ethical considerations and societal implications of AI technologies.

Module 1	No. of Hrs.
Module 1 :Introduction to Artificial Intelligence and Problem Solving, Definition and scope of AI, History and evolution of AI, Types of AI: Narrow AI vs. General AI, Problem formulation and problem-solving techniques, Search algorithms: Uninformed and informed search strategies, Heuristic search and constraint satisfaction problems.	9
Module 2	No. of Hrs.
Module 2 : Knowledge Representation and Reasoning, Types of knowledge representation, Propositional logic and first-order logic ,Semantic networks and frames, Ontologies and their applications, Deductive and inductive reasoning, Rule-based systems and non-monotonic reasoning, Probabilistic reasoning and Bayesian networks.	9
Module 3	No. of Hrs.
Module 3 : Machine Learning, Introduction to machine learning, Supervised, unsupervised, and reinforcement learning, Common algorithms: Decision trees, SVM, neural networks Evaluation metrics for machine learning models, Practical applications of machine learning in AI systems.	9
Module 4	No. of Hrs.
Module 4 : Natural Language Processing and Robotics, Basics of natural language processing (NLP), Text processing and language models, Sentiment analysis and language generation, Robotics fundamentals and sensor technologies, Robot kinematics, control, and applications of AI in robotics.	9
Module 5	No. of Hrs.
Module 5 : Ethical and Societal Implications of AI, Ethical considerations in AI development ,AI and job displacement ,Privacy concerns and data security, Bias and fairness in AI algorithms, Accountability and transparency in AI systems, The role of government and regulation in AI, Public perception and trust in AI technologies, Future of AI and its impact on society	9

Course	Blooms Level	
CO1	Explain the foundational concepts of artificial intelligence, including its history, t problem-solving techniques	L2
CO2	Apply knowledge representation and reasoning techniques to solve complex problems in AI systems.	L3
CO3	Implement machine learning algorithms and evaluate their performance in real-world applications	L2
CO4	Explore the principles and applications of natural language processing and robotics to enhance human-computer interaction.	L4

Teaching Hours L: P:T: SDA : 3:0:2:0 SEE : 50 Marks							
Total Hours : 45 Total : 100 Marks							
Credits	:	4	SEE Duration	:	3 Hrs		

Cours	se Objectives
1	Explore the foundational concepts of data science, history, significance, and process
2	Apply statistical methods and data analysis techniques to interpret and develop insights from complex datasets.
3	Implement various machine learning algorithms and assess their performance using appropriate evaluation metrics in real-world scenarios.
4	Utilize data visualization tools and techniques to effectively communicate findings and insights to diverse audiences

Module - 1	No. of Hrs
Module 1:	
Introduction: Big Data and Data Science Hype Getting Past the Hype Datafication. The Current	
Landscape, Data Science Jobs, A Data Science Profile, Statistical Inference, Exploratory Data	
Analysis, and the Data Science Process, Statistical Thinking in the Age of Big Data, Statistical	9
Inference, Populations and Samples, Populations and Samples of Big Data, Big Data Can Mean	
Big Assumptions. Modeling, Exploratory Data Analysis, Philosophy of Exploratory Data	
Analysis, Exercise: EDA, The Data Science Process, A Data Scientist's Role in This Process.	
Module - 2	No. of Hrs
Module 2:	
Algorithms, Machine Learning Algorithms, Three Basic Algorithms, Linear Regression, k-Nearest	
Neighbors (k-NN),k-means, Naive Bayes, Bayes Law, A Spam Filter for Individual Words, A	
Spam Filter That Combines Words: Naive Bayes Exercise Basic Machine Learning Algorithms,	9
Spam Filters, Naive Bayes, and Wrangling, Logistic Regression Thought Experiments Classifiers,	
Logistic Regression Case Study, Estimating α and β, Newton's Method, Stochastic Gradient	
Descent, Implementation, Evaluation, Sample R Code	
Module - 3	No. of Hrs
Module 3:	
Time Stamps and Financial Modeling, Kyle Teague and GetGlue, Timestamps, Exploratory Data	9
Analysis (EDA), Metrics and New Variables or Features, Financial Modeling In-Sample, Out-of-	,
Sample, and Causality, Preparing Financial Data, Log Returns	
Module - 4	No. of Hrs
Module 4:	
Extracting Meaning from Data, Background: Data Science Competitions, Background	
Crowdsourcing, The Kaggle Model, A Single Contestant, Their Customers, Data Visualization and	9
Fraud Detection, Data Visualization History, A Sample of Data Visualization Projects, Mark's	,
Data Visualization, Data Science and Risk About Square, The Risk Challenge, The Trouble with	
Performance Estimation, Model Building Tips.	
Module - 5	No. of Hrs
Module 5:	
Data Engineering: MapReduce, Pregel, and Hadoop, MapReduce, Word Frequency Problem.	
Enter MapReduce. Other Examples of MapReduce, Pregel, Thought Experiment, On Being a Data	9
Scientist, Data Abundanceversus Data Scarcity, Designing Models, Economic Interlude: Hadoop.	
A Brief Introduction in Hadoop, Cloudera, Next Generation Data Scientists, Hubris, and Ethics.

Total Hours	:	45	Total	:	100 Marks	
Credits		3	SEE Duration	:	3 Hrs.	

Cour	Course Objectives				
1	To reduce development time and the resources required to maintain existing applications.				
2	To increase code reuse and provide a competitive advantage through effective use of data structures and algorithms.				

Module - 1	No. of Hrs.
Search Trees: Two Models of Search Trees. General Properties and Transformations. Height of a	
Search Tree. Basic Find, Insert, and Delete. Returning from Leaf to Root. Dealing with Non	9
unique Keys. Queries for the Keys in an Interval. Building Optimal Search Trees. Converting	
Trees into Lists. Removing a Tree. Balanced Search Trees: Height-Balanced Trees. Weight-	
Balanced Trees. (a, b)- And B-Trees. Red-Black Trees and Trees of Almost Optimal Height. Top-	
Down Rebalancing for Red-Black Trees.	
Module - 2	No. of Hrs.
Tree Structures for Sets of Intervals. Interval Trees. Segment Trees. Trees for the Union of	
Intervals. Trees for Sums of Weighted Interval. Trees for Interval-Restricted Maximum Sum	9
Queries. Orthogonal Range Trees. Higher-Dimensional Segment Trees. Other Systems of Building	
Blocks. Range-Counting and the Semigroup Model. Kd-Trees and Related Structures.	
Module - 3	No. of Hrs.
Heaps: Balanced Search Trees as Heaps. Array-Based Heaps. Heap-Ordered Trees and Half	
Ordered Trees. Leftist Heaps. Skew Heaps. Binomial Heaps. Changing Keys in Heaps. Fibonacci	9
Heaps. Heaps of Optimal Complexity. Double-Ended Heap Structures and Multidimensional	
Heaps. Heap-Related Structures with Constant-Time Updates	
Module - 4	No. of Hrs.
Graph Algorithms: Bellman - Ford Algorithm; Single source shortest paths in a DAG; Johnson's	
Algorithm for sparse graphs; Flow networks and Ford-Fulkerson method; Maximum bipartite	9
matching. Polynomials and the FFT: Representation of polynomials; The DFT and FFT; Efficient	
implementation of FFT	
Module - 5	No. of Hrs.
String-Matching Algorithms: Naïve string Matching; Rabin - Karp algorithm; String matching	
with finite automata; Knuth-Morris-Pratt algorithm; Boyer – Moore algorithms	9

Cours	Blooms Level

3

SEE Duration

Module - 1	No. of Hrs
INTRODUCTION : What is software engineering? Software Engineering Concepts, Development	
Activities, Managing Software Development, Modeling with UML, Project Organization and	9
Communication	
Module - 2	No. of Hrs
REQUIREMENT ELICITATION AND ANALYSIS: Requirements Elicitation: Requirements	
Elicitation Concepts, Requirements Elicitation Activities, Managing Requirements Elicitation,	9
Analysis: Analysis Concepts, Analysis Activities, Managing Analysis.	
Module - 3	No. of Hrs
SYSTEM DESIGN: System design-Decomposing the system: Overview of System Design,	
System Design Concepts, System Design Activities: Objects to Subsystems, System Design –	9
Addressing design goals: Activities: An overview of system design actives, UML deployment	
diagrams, Addressing Design Goals, Managing System Design.	
Module - 4	No. of Hrs
OBJECT DESIGN, IMPLEMENTATION AND TESTING: Object design-Reusing pattern	
solutions: An Overview of Object Design, Reuse Concepts: Design Patterns, Reuse Activities,	9
Managing Reuse, Object design-Specifying interface: An overview of interface specification,	
Interfaces Specification Concepts, Interfaces Specification Activities, Managing Object Design,	
Mapping model to code: Mapping Models to Code Overview, Mapping Concepts, Mapping	
Activities, Managing Implementation, Testing: An overview of testing, Testing concepts,	
Managing testing.	
Module - 5	No. of Hrs
SOFTWARE MAINTENANCE AND SOFTWARE CONFIGURATION MANAGEMENT:	
Software maintenance: What is Software Maintenance?, Factors that Mandate Change, Lehman's	9
Laws of system evolution, Types of software maintenance, Software maintenance process and	
actives, Reverse Engineering, Software Re-engineering, Patterns for Software Maintenance, Tool	
support for Software Maintenance. Software Configuration Management: The baseline of	
Software Life Cycle, What is Software Configuration Management, Why Software Configuration	
Management, Software Configuration Management Functions, Software Configuration	
Management Tools.	

Cours	Course Outcomes : At the end of the course, the students will be able to				
CO1	Apply Object Oriented Software Engineering approach in every aspect of software project	L3			
CO2	Adapt appropriate object oriented design aspects in the development process	L4			
CO3	Adapt the concepts and tools related to software configuration management	L4

Rajarajeswari College of Engineering (An Autonomous Institution under Visvesvaraya Technological University, Belagavi)

		Semester I			
		Internet of Thi	ngs		
		Category: IPC	C^{-}		
Strea	am:	Computer Science & Er	ngineering (M.Tech)		
		(Theory+Practic	al)		
Course Code	:	P24MTC105	CIE	:	50 Marks
Teaching Hours L:P:SDA	:	3:2:0	SEE	:	50 Marks
Total Hours	:	40+10	Total	:	100 Marks
Credits		4	SEE Duration	1:	3 Hrs

Cour	Course Objectives					
1	Explore the knowledge on combination of functionalities and services of networking					
2	Explain the definition and significance of the Internet of Things.					
3	Discuss the architecture, operation and business benefits of an IoT solution.					

Module - 1	No. of Hrs.
What is The Internet of Things? Overview and Motivations, Examples of Applications, IPV6 Role, Areas of Development and Standardization, Scope of the Present Investigation. Internet of Things Definitions and frameworks-IoT Definitions, IoT Frameworks, Basic Nodal Capabilities.	
Internet of Things Application Examples-Overview, Smart Metering/Advanced Metering Infrastructure-Health/Body Area Networks, City Automation, Automotive Applications, Home Automation, Smart Cards, Tracking, OverThe-Air-Passive Surveillance/Ring of Steel, Control Application Examples, Myriad Other Applications.	8
Module - 2	No of Hrs.
Fundamental IoT Mechanism and Key Technologies-Identification of IoT Object and Services, Structural Aspects of the IoT, Key IoT Technologies. Evolving IoT StandardsOverview and Approaches, IETF IPV6 Routing Protocol for RPL Roll, Constrained Application Protocol, Representational State Transfer, ETSI M2M, Third Generation Partnership Project Service Requirements for Machine-Type Communications, CENELEC, IETF IPv6 Over Low power WPAN, Zigbee IP(ZIP),IPSO	8
Module - 3	No of Hrs.
Layer ½ Connectivity: Wireless Technologies for the IoT-WPAN Technologies for IoT/M2M, Cellular and Mobile Network Technologies for IoT/M2M, Layer 3 Connectivity :IPv6 Technologies for the IoT: Overview and Motivations. Address Capabilities, IPv6 Protocol Overview, IPv6 Tunneling, IPsec in IPv6,Header Compression Schemes, Quality of Service in IPv6, Migration Strategies to IPv6	8
Module - 4	No. of Hrs.
Case Studies illustrating IoT Design-Introduction, Home Automation, Cities, Environment, Agriculture, Productivity Applications.	8
Module - 5	No. of Hrs.
Data Analytics for IoT – Introduction, Apache Hadoop, Using HadoopMapReduce for Batch Data Analysis, Apache Oozie, Apache Spark, Apache Storm, Using Apache Storm for Realtime Data Analysis, Structural Health Monitoring Case Study.	8

Course Outcomes : At the end of the course, the students will be able to		
CO1	Choose appropriate schemes for the applications of IOT in real time scenarios	L2
CO2	Manage the Internet resources through different protocols used in each layer	L1
CO3	Compare various protocols and algorithms in different layers that facilitate effective communication mechanisms	L3
CO4	Identify how IoT differs from traditional data collection systems	L2

Rajarajeswari College of Engineering (An Autonomous Institution under Visvesvaraya Technological University, Belagavi)

Text I	Books
1	Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications
	Daniel Minoli Wiley 2013
2	Internet of Things: A Hands-on Approach ArshdeepBahga, Vijay Madisetti Universities Press 2015
Refere	ence Text Books
1	The Internet of Things Michael Miller Pearson 2015 First Edition
2	Designing Connected Products Claire Rowland, Elizabeth Goodman et.al O'Reilly First Edition, 2015

Sl.NO	Experiments
1	Transmit a string using UART
2	Point-to-Point communication of two Motes over the radio frequency
3	Multi-point to single point communication of Motes over the radio frequency AN (Sub netting).
4	I2C protocol study
5	Reading Temperature and Relative Humidity value from the sensor
6	Study of Connectivity and Configuration of Raspberry-Pi/Be agle Board circuit with Basic peripherals, LEDs, Understanding GPIO and its use in program.
7	Study of different operating systems for RaspberryPi/Be agle board.Understanding the Process of osinstallation on Raspberry–Pi/Be agle board.
8	Familiarization with the concept of IOT, Arduino/Raspberry Pi and perform necessary Software installation.

4 Credit courses (L:P:SDA 3:2:0):

Component	Evaluation Criteria	Marks Allocation
CIE -	Theory Component (50 Marks)	
Internal Assessment Test 1	Covers 30% of the syllabus (50 marks, 1.5-hour duration)	50
Internal Assessment Test 2	Covers 70% of the syllabus (50 marks, 1.5-hour duration)	50
Internal Assessment Test 3	Covers 100% of the syllabus (50 marks, 1.5-hour duration)	50

Rajarajeswari College of Engineering (An Autonomous Institution under Visvesvaraya Technological University, Belagavi)

a. Total Internal Assessment (Scaled Down)	Best of 7 and Average of 7 Lest			
b. Seminar Presentation	Seminar presentation 1 & 2 - Average of 2 Presentation (Each 10 marks)	10		
c. Assignment	Assignments 1,2 — Average of 2 assignments (Each 10 marks)	10		
Total a+b+c	Sum of Tests + Assignment+ Seminar (Scaled Down to 25)	50		
Minimum passing marks	50% (13/25) of the maximum ma	rks of CIE		
IPCC- CIE	- Practical Component (25 Marks)			
Average of 10 Experiments - Conduction (10)	on (10)+ Record (10)+ VIVA	30		
Conducted after all lab sessions		20		
Sum of Lab conduction & Practical Inte	ernal Test	50		
Minimum 50% in 0	CIE - Practical (13/25) - Scaled Down to 25			
SEE - '	Theory Component (50 Marks)			
Minimum passing marks	100			
Passing Criteria for CIE +SEE (Theory) The student secures not less than 50% (50 marks out of 10 in the sum total of the CIE (Continuous Internal Evaluation and SEE (Semester End Examination) taken together.

Semester 1
Algorithms & AI Lab
Category: PCCL

Stream: Computer Science & Engineering (M.Tech)

(Practical)

	(======================================		
Course Code	P24MTC106	CIE Marks	50
Teaching Hours/Week(L:T:P:SDA)	0:0:2:0	SEE Marks	50
Credits	01	Exam Hours	03

Course objectives: This course will enable students to:

Implement and evaluate Algorithm and AI in Python programming language.

Descriptions (if any):

Installation procedure of the required software must be demonstrated, carried out in groups. and documented in the journal.

Sl.NO	Programs List:
1	Implement a simple linear regression algorithm to predict a continuous target variable based on a given dataset.
2	Develop a program to implement a Support Vector Machine for binary classification. Use a sample dataset and visualize the decision boundary.
3	Develop a simple case-based reasoning system that stores instances of past cases. Implement a retrieval method to find the most similar cases and make predictions based on them.
4	Write a program to demonstrate the ID3 decision tree algorithm using an appropriate dataset for classification.
5	Build an Artificial Neural Network by implementing the Backpropagation algorithm and test it with suitable datasets.
6	Implement a KNN algorithm for regression tasks instead of classification. Use a small dataset, and predict continuous values based on the average of the nearest neighbors
7	Create a program that calculates different distance metrics (Euclidean and Manhattan) between two points in a dataset. Allow the user to input two points and display the calculated distances
8	Implement the k-Nearest Neighbor algorithm to classify the Iris dataset, printing both correct and incorrect predictions.
9	Develop a program to implement the non-parametric Locally Weighted Regression algorithm, fitting data points and visualizing results.
10	Implement a Q-learning algorithm to navigate a simple grid environment, defining the reward structure and analyzing agent performance.

Laboratory Outcomes: The student should be able to:

Implement and demonstrate AI algorithms.

Evaluate different algorithms.

PCCL - 1 Credit Course - Laboratory

<u>CIE - Practical Component (50 Marks) + SEE - Practical Component (50 Marks)</u>

CIE - Practical Component (50 Marks)					
Lab Conduction	Average of 10 Experiments - Conduction (10)+ Record (10)+ VIVA (10)	30			
Practical Internal Test	Conducted after all lab sessions	20			
Total	Sum of Lab conduction & Practical Internal Test	50			
Passing Criteria	Minimum 50% in CIE - Practical (25/50)				

SEE - Practical Component (100 Marks)

Practical Exam	Write up + Execution + Report + VIVA	100
Dessina Cuitoria	Minimum 50% in SEE - Practical (25/50)	
Passing Criteria	(Scaled Down to 50: Minimum marks: 25/50	

Passing Criteria for CIE +SEE (Lab)	The student secures not less than 50% (50 marks out of 100) in the sum total of the CIE (Continuous Internal Evaluation) and SEE (Semester End Examination) taken together.
