About Your GRE® Score Report**Score Reporting Policies**

With the *ScoreSelect*® option, you can decide which test scores to send to the institutions you designate. There are three options to choose from:

- Most Recent option – Send your scores from your most recent test administration
- All option – Send your scores from all administrations in the last five years
- Any option – Send your scores from one OR as many test administrations in the last five years (this option is not available on test day when you select up to four FREE score reports)

Scores for a test administration must be reported in their entirety. Institutions will receive score reports that show only the scores that you selected to send to them. There will be no special indication if you have taken additional GRE tests. See the *GRE® Information Bulletin* for details. The policies and procedures explained in the Bulletin for the current testing year supersede previous policies and procedures in previous bulletins.

If your scores are not available for any reason, you will see "Not Available" in Your Test Score History.

GRE test scores are reportable for five (5) years following your test date. For example, scores for a test taken on July 3, 2021, are reportable through July 2, 2026. Note: Score recipients will only receive scores from test administrations that you have selected to send to them.

Beginning in September 2023, the subscores on the Physics and Psychology Tests will be reported as percent correct scores (i.e., the percentage of questions in a subscore area answered correctly). Subscores earned after September 2023 should not be compared with scaled subscores earned prior to September 2023.

Percentile Rank (% Below)

A percentile rank for a test score indicates the percentage of test takers who took that test and received a lower score. Regardless of when the reported scores were earned, the percentile ranks for General Test and Subject Test scores are based on the scores of all test takers who tested within the most recent three-year period.

Free GRE Diagnostic Service

For detailed information about your performance on the Verbal Reasoning and Quantitative Reasoning sections of the computer-delivered GRE General Test, access the free GRE Diagnostic Service from your ETS account. This service includes a description of the types of questions you answered right and wrong, the difficulty level of each question, and the time spent on each question. This service is available approximately 15 days after your test administration and for six months following your test administration.

Retaking a GRE Test

You can take the GRE General Test once every 21 days, up to five times within any continuous rolling 12-month period (365 days). This applies even if you canceled your scores on a test taken previously. You can retake a GRE Subject Test once every 14 days.

Note: This policy will be enforced even if a violation is not immediately identified (e.g., inconsistent registration information) and test scores have been reported. In such cases, the invalid scores will be canceled and score recipients will be notified of the cancellation. Test fees will be forfeited.

LETTER OF RECOMMENDATION

It is with great pleasure that I write this letter of recommendation for Rakshith Kumar M, whom I have had the privilege of being his professor during his undergraduate studies in Computer Science and Engineering at Rajarajeswari College of Engineering.

Rakshith Kumar M is a remarkable person who is driven to investigate the complexities of computer science by his persistent passion for the field and his voracious curiosity. I had the pleasure of teaching him Machine Learning and the Internet of Things, and he did a really excellent job in both subjects. He routinely received high marks on tests and assignments in Machine Learning, demonstrating an extraordinary grasp of complex algorithms. His engaged involvement and perceptive contributions in the Internet of Things demonstrated a thorough understanding of important ideas.

He has also been equally active in extracurricular activities. Rakshith Kumar M embarked on a challenging and innovative project titled "Machine Learning Techniques to Detect and Classify Malware," which was published in the prestigious journal International Journal of Research and Analytical Reviews (IJRAR). His research explored behaviour-based malware detection using PE headers, combining multiple machine learning algorithms such as Random Forest, Decision Tree, SVM, and Gradient Boosting. His work demonstrated a deep understanding of security threats and strong data analysis skills.

Rakshith Kumar M has a positive attitude towards education and is very decisive in his quest for academic growth. Given his excellent academic record, his strong commitment to practical work, and his real passion for computer science, I am absolutely convinced that he is the right candidate for your master's program. I am confident that he will achieve success in his studies and contribute to your educational community.

Sincerely,

Manasa
